Professional Summary

Growth-oriented IT professional with 5 years of overall experience and 4+ years on Microsoft Power Platform, delivering enterprise applications, automations, and integrations. Strong hands-on experience with Microsoft Copilot Studio, Power Apps, Power Automate, Dataverse, and enterprise system connectivity using APIs and Azure services. Experienced in solution packaging, governance, and CI/CD pipelines with Azure DevOps.

Core Skills

- Microsoft Copilot Studio (Power Virtual Agents), Prompt Engineering, Generative Answers
- Power Apps (Canvas & Model-Driven), Power Fx, Component Libraries, Responsive UX
- Power Automate (Cloud & Desktop), Webhooks, HTTP Connectors, Child Flows, Error Handling
- Dataverse, SharePoint Online, Security Roles, Business Rules

REST APIs (including Microsoft Graph API), Azure Functions, Azure App Services, SQL Server, Stored Procedures

- Programming: C# (basic), Python, JavaScript, PowerShell, SQL/T-SQL
- ALM & DevOps: Solutions, Environment Variables, Connection References, PAC CLI, Azure DevOps Pipelines
- Responsible AI Awareness, Governance, DLP Policies, CoE Starter Kit

Professional Experience

HCL Technologies Ltd — Lead Engineer (Apr 2022 – Apr 2025)

Project: ALLEGRO – SYNAPPS Integration (Synchrony)

Role: Sr. Power Platform / MS Dynamics 365 Developer

Environment: Power Apps (Canvas), Power Automate, Copilot Studio, Dataverse, SharePoint, SQL, Azure

- Developed enterprise Canvas Apps with modular architecture, reusable components, and environment-based routing (Dev/UAT/Prod).

- Built Power Automate flows integrating with backend systems using REST APIs, HTTP connectors, and on-prem gateway.
- Implemented webhooks and child flows with structured error handling, retry policies, and correlation IDs.
- Designed Copilot Studio bots with topic design, generative answers, Dataverse/SharePoint connectors, and Teams escalation.
- Applied prompt engineering techniques to generate flows, Power Fx expressions, and test payloads using Copilot.
- Implemented ALM using managed solutions, environment variables, and Azure DevOps CI/CD pipelines.
- Ensured governance and compliance using DLP policies, secure parameters, and connection references.
- Optimized platform performance through delegation strategies, query shaping, and controlled data loading.

Boven Technologies Pvt Ltd — Software Engineer (Jun 2020 – Apr 2022)

Project: PM Toolkit

Role: Power Apps / CRM Developer

Environment: Power Apps (Canvas), Power Automate, SharePoint, SQL

- Developed task-based Canvas Apps with parameterized forms and execution workflows.
- Built flows invoking SQL stored procedures with approvals and Teams/email notifications.
- Used Copilot to scaffold screens, optimize Power Fx logic, and draft automation logic.
- Created Copilot Studio topic drafts for FAQs and operational guidance.
- Implemented solution packaging and documented deployment and rollback steps.

Technical Skills

- Power Platform: Power Apps, Power Automate, Power BI, Dataverse, Power Pages, AI Builder
- Azure: Azure Functions, App Services, Azure SQL, Azure AD, Storage Accounts, Virtual Machines
- Databases: SQL Server, SSMS, SSDT, SSIS, SSRS, SSAS
- Web & APIs: RESTful Services, JSON, XML, JavaScript, jQuery, Bootstrap
- Reporting: Power BI, SSRS, Tableau, QlikView, Crystal Reports

Certifications

- Microsoft Certified: Power Platform Developer Associate (PL-400)

Education

B.Sc. Degree — Yogi Vemana University
