- Certificate of Achievement for **DIGITAL SKILLS: USER EXPERIENCE** from Accenture
- Six Sigma White Belt certification
- Certification on SQL from SoloLearn(intermediate)
- AWS certified

EDUCATION AND CERTIFICATION

Program	Institute	Year
CBAP- Trained Business Analyst	TrainSmart Academy, Mumbai	2023
B.Tech in Information Technology	Anna University, Chennai	2015

KEY ORGANISATIONAL ACHIEVEMENTS

Nov 2023- Present	Citi bank	Product Owner	Pune, India
-------------------	-----------	---------------	-------------

- Playing a vital role in managing various activities of the project (compliance project- Retail surveillance)like requirement elicitation, analyzing the information gathered, documenting the functional or business requirements in BRD and coordinating with team on the progress of the JIRA . Using Visio for drawing flowcharts for complex projects and using JIRA for project management. Working on RCM Actimize tool.
- As a Product Owner, I leverage the DevinAsk, Friday.ai, citi tylus and copilot tools to streamline the requirements gathering and analysis process. The tool assists in capturing business needs, clarifying functional and non-functional requirements, identifying dependencies, and refining solution expectations with stakeholders.
- Additionally, DevinAsk, Friday.ai, citi tylus and copilot tools supports the creation of well-structured user stories by helping translate business requirements into actionable development items. It enables the definition of user personas, acceptance criteria, business rules, and edge-case scenarios, ensuring that user stories are clear, comprehensive, and aligned with business objectives.
- By utilizing GENAI tools, I am able to improve requirement quality, enhance collaboration between business and delivery teams, accelerate backlog preparation, and ensure that development efforts remain focused on delivering maximum business value.
- Defining the user stories, priortizing and distributing it among the team. Taking part in the PI planning and preparing the requirements for every quarter.Maintaining the product road map with the product manager or the year.
- Performing data analysis and data profiling for various surveillences and coordinating with users on the same. Performing UAT checks for every release before releasing the product to users. responsible for owning the product backlog and refining stories among the scrum team.
- Help the team to design, document and maintain system processes for new systems.
- Connect with impacted users with clear communication, have proper calls and emails with them and give them enhanced solutions.
- Communicating with business units, stakeholders, and technical leaders to gather and clarify business requirements, developing To be business process Flows, identifying the impact of the implementation on these business process flows and coordinating the review of the detail design for the business.
- Conducting Gap Analysis, Scope Analysis, Impact Analysis on Business Process using techniques like use case diagrams (UML), Context Diagram in conjunction with Technical Leads
- Experience in mapping business requirements & designing customized solutions with strong analytical skills & capabilities to analyze business practices and define optimal procedures

**Sept 2021 –
Nov 2023**

Finastra- GPP-SP
