

Debasish Padhy

PROFILE SUMMARY

- Accomplished Data Engineering professional with 8+ years of experience driving **enterprise-scale data architecture and cloud transformation initiatives** across Azure and GCP ecosystems.
- Proven expertise in **designing and optimizing scalable, high-performance data pipelines** leveraging PySpark, Databricks, and distributed computing frameworks for large-scale data processing.
- Strong track record in **data platform modernization and ETL/ELT strategy**, enabling seamless migration from legacy systems to cloud-native, cost-efficient architectures.
- Adept at **translating complex business requirements into data-driven solutions**, delivering actionable insights through advanced analytics, KPI frameworks, and visualization tools like Power BI.
- Demonstrated leadership in **DataOps, CI/CD implementation, and workflow orchestration**, ensuring robust, automated, and reliable data ecosystems using tools like Airflow and Azure DevOps.
- Recognized for **stakeholder engagement, cross-functional collaboration, and team mentorship**, driving project success while fostering best practices in data engineering and governance.

WORK EXPERIENCE

Senior Data Engineer

Cimpress India Private Limited | Bengaluru, India

Sep 2023 – Present

- Spearhead optimization of **large-scale data pipelines** using Snowflake and dbt, reducing runtime and compute costs through innovative incremental models.
- Architect and implement **incremental processing frameworks**, cutting refresh times to one-sixth of full load duration, boosting operational efficiency.
- Collaborate with cross-functional teams to ensure **data accuracy, metric alignment, and root-cause resolution** for production issues.
- Develop and automate **reporting pipelines** for business reviews, streamlining communication and improving consistency across stakeholders.
- Lead initiatives to create **reusable Python packages with CI/CD capabilities**, standardizing deployment across the engineering team.
- Mentor junior engineers on **data engineering best practices, CI/CD, and cloud workflows**, accelerating onboarding and integration.
- Drive **NLP-based keyword extraction pipelines** for communication data, delivering actionable insights for strategic decisions.
- Enhance **data models and analytics explores**, improving operational and leadership reporting capabilities.
- Implement robust **data governance frameworks**, ensuring compliance and high data quality across all assets.
- Develop and Integrate **conversation slack bots with Snowflake cortex AI**, enabling stakeholders to interact with data without manual intervention.

Key Achievements:

- Achieved **10x runtime reduction** for large-scale data processing, delivering substantial cost savings.
- Automated reporting workflows, eliminating manual effort and improving consistency.
- Developed a **concurrency algorithm for phone call analytics**, now a key operational metric.
- Implemented a **new data architecture design**, enhancing accessibility and usability across business units.
- Recognized for **innovative problem-solving and exceptional contributions** by senior management.

PERSONAL DETAILS

luckypadhy011@gmail.com

+91 8709850249

CORE COMPETENCIES

Data Architecture Design	=====
Scalable Data Pipeline Development	=====
Cloud Data Strategy (Azure/GCP)	=====
Data Platform Modernization	=====
ETL/ELT Optimization	=====
Big Data Processing & Distributed Systems	=====
Data Governance & Quality Assurance	=====
Performance Tuning & Cost Optimization	=====
CI/CD & DataOps Implementation	=====
Stakeholder Engagement & Solution Design	=====

IT SKILLS

Cloud & Platforms

- Azure (Azure Fabric, Databricks, Data Factory, Synapse, ADLS Gen2, DevOps)
- AWS (S3, Lambda, Fargate, MWAA)
- GCP (BigQuery, Composer, Cloud Storage)

Big Data & Data Engineering

- PySpark, Spark SQL, Spark Streaming, Spark ML
- Hadoop, Hive
- Data Warehousing, Data Modeling
- ETL / ELT, DBT

Programming & Tools

- Python (OOP, NumPy, Pandas, Scikit-learn, TensorFlow, Keras)
- SQL, PostgreSQL, SQL Server, Greenplum
- Apache Airflow

Other Tools & Technologies

- Docker, Kubernetes
- Power BI (KPI dashboards)

Data Science

- Statistics, Machine Learning, Deep Learning
- Transformers, LLMs, Generative AI, Agentic AI

EDUCATION

Master of Technology (Data Science & Engineering)

Birla Institute of Technology and Science (BITS), Pilani
2021 – 2023

Bachelors in Mechanical Engineering

NIT Jamshedpur
2017

SOFT SKILLS

Progressive Leadership

Change Agent

Effective Communication

Result-oriented

Problem-solving

Analytical Thinking

PERSONAL DETAILS

Date of Birth: May 2, 1996

Permanent Address: Berhampur,
Odisha

Languages Known: English, Hindi

Senior Associate – Big Data Analytics

Affine Analytics | Bengaluru, India

Jan 2022 – Oct 2023

- Designed and delivered **data engineering solutions** on Azure Synapse and Databricks to solve complex business and technical challenges.
- Automated data ingestion pipelines using **Azure Data Factory**, ensuring seamless integration across systems.
- Conducted **data validation pipelines** to guarantee integrity against source systems.
- Collaborated with clients and SMEs to **gather requirements and implement tailored solutions**.
- Developed comprehensive **documentation and best practices** for engineering processes.
- Implemented **performance enhancements** for critical datasets to support scalable analytics.
- Mentored junior engineers on **advanced Python and Spark techniques**.
- Developed a **data quality monitoring system**, proactively resolving discrepancies.
- Contributed to **cloud-based data warehouse implementations**, improving data accessibility and reducing query response times.

Key Achievements:

- Migrated large datasets from HDFS to **Azure Data Lake Storage**, improving processing times.
- Created **automated scripts** reducing manual intervention and boosting productivity.
- Delivered multiple high-impact projects, earning **client commendations**.
- Enhanced pipeline performance, reducing query runtimes and optimizing resource usage.
- Developed KPIs that **enabled better strategic decision-making** for clients.

Associate Consultant

Cervello India Pvt Ltd | Bengaluru, India

Nov 2020 – Dec 2021

- Developed **industry-specific data engineering solutions** for healthcare and oil & gas sectors.
- Executed **platform migration projects** using pgAdmin, Informatica, and SQL-based transformations.
- Designed and implemented **data models** to support analytics use cases.
- Conducted **training programs for team members**, enhancing knowledge and skill transfer.
- Monitored and optimized workflows for timely delivery of data products.
- Provided **technical guidance** to clients and internal teams.
- Completed multiple **data migration projects** with high data integrity.
- Developed solutions improving **data accessibility and usability**.
- Received **positive client feedback** for exceptional delivery and innovative solutions.
- Optimized workflows, achieving measurable efficiency gains.

Database Developer / Engineer

Capgemini India | Bengaluru, India

Jul 2017 – Sep 2020

- Analyzed and optimized **Oracle stored procedures and functions** for improved efficiency.
- Developed **complex SQL scripts** for ETL processes, ensuring data integrity.
- Collaborated with cross-functional teams to deliver **custom data solutions**.
- Conducted **performance tuning** of queries and database processes.
- Assisted in **legacy-to-modern database migrations**, ensuring seamless transitions.
- Created detailed **documentation** for database processes and best practices.
- Migrated large datasets from legacy systems, improving **accessibility and usability**.
- Developed innovative solutions **enhancing data processing efficiency**, saving time and resources.
- Recognized for **contributions to project success** and client satisfaction.
