SUMMARY

Software Engineer with 5+ years of experience specializing in designing and deploying high-performance, scalable Big Data pipelines. I leverage technologies like Apache Spark, Airflow, and cloud platforms to transform raw data into actionable business insights. Proven track record in optimizing data processes and building robust and future-ready systems.

SKILLS

Programming	SCALA, SQL, PySpark, Java, Python, Shell Script
Data Engineering	Apache Spark, Hadoop, Hive, Sqoop, Databricks, Airflow
Cloud Platforms	AWS (S3, EC2, EMR, Lambda, IAM, Step Functions, CloudWatch), GCP
DevOps and Tools	GitHub, GitLab, CI/CD Pipelines, Jira, Grafana
Databases	Oracle, PostgreSQL, MySQL

WORK EXPERIENCE

Nielsen - Software Engineer 1 July 2024 – Present

- **Technologies:** SCALA, Spark, EMR, Athena, S3, Postgres, MySQL, Airflow, Python, GitLab, Jira, REST APIs
- Architected and deployed end-to-end **Airflow + Scala data pipelines** processing **500M+ records weekly**, enabling near-real-time client reporting and reducing data latency by **35%**.
- Designed and implemented data aggregation workflows to convert daily campaign viewership data into **weekly, monthly, and annual reports**, improving reporting speed and accuracy.
- Proactively identified and eliminated **data slippage** across dependent Spark pipelines, enhancing pipeline reliability and ensuring SLA compliance.
- Optimized Spark jobs for performance and cost efficiency, achieving a **20% reduction in cluster resource usage** through partitioning, broadcast joins, and tuning.
- Resolved production bottlenecks and implemented monitoring using **Airflow alerts + CloudWatch**, minimizing downtime and improving system resilience.

Cognizant - Associate Software Engineer Feb 2021 – July 2024

- **Technologies:** Python, Pyspark, Hadoop, Spark SQL, MySQL, Hive, Sqoop, HDFS, GCP
- Developed and maintained distributed Spark applications handling **terabyte-scale datasets** for enterprise-grade reporting and analytics.
- Performed detailed data analysis using **Hive and Spark SQL** to resolve data consistency issues during SIT/UAT phases, improving data quality in production.
- Implemented Spark performance tuning strategies including caching, partitioning, and serialization optimizations, resulting in a **40% reduction in job runtime**.
- Created and managed **RDD** and **DataFrame** transformations for large-scale ETL pipelines on YARN-managed clusters.
- Integrated Sqoop and Hive for seamless ingestion from RDBMS to HDFS, automating data ingestion workflows and reducing manual intervention.
- Led root-cause analysis and resolution of critical data pipeline issues, ensuring minimal business disruption.

EDUCATION

2016 - 2020	B.Tech, Bhilai Institute of Technology, Durg	8.44/10
2015 - 2016	Higher Secondary Certificate (CBSE), Senior Secondary School, Sec-10	85.4%
2013 - 2014	Secondary School Certificate (CBSE), Senior Secondary School, Sec-7	8.8/10
