PROFESSIONAL EXPERIENCE

Avalara Technologies, Pune (Remote)

Applications Engineer, November 2024 – Present

- Developed and retrofitted integrations with third-party vendors such as Concur, Everbridge, ServiceNow, Okta, iCIMS, and Espresa to enable seamless data exchange and process automation.
- Built and deployed a Workday Extend application to measure quality of hire through post-hire surveys, improving recruitment analytics and decision-making.
- Designed a Workday Extend application to track worker promotion reviews and nominations within the talent performance cycle, enhancing visibility for HR and leadership teams.
- Developed and optimized integrations with global benefit providers to streamline Open Eligibility periods and ensure accurate employee benefits administration.
- Engineered API-based integrations to implement a centralized Vendor Management System with Staffing Nation, reducing vendor management overhead and improving data consistency.
- Designing a Payroll Effective Change Interface (PECI) integration for a Brazilian third-party payroll vendor, ensuring compliance with local requirements.

Deloitte Consulting India (Offices of the US), Mumbai

Workday Integration Consultant, May 2021 – October 2024

- Spearheaded design, development, and hyper care for a Phase X Absence & Time Tracking implementation project, which was spread across two time zones for a fortune 500 pharmaceutical company.
- Implemented studio integrations involving RaaS calls and complex advanced reports.
- Design & developed Peci integrations for an Acquisition based project aimed at eliminating a middleware application, SnapLogic.

- Led the way to design & develop ~17 EIB integrations for a Russia based payroll provider which were then configured on various business processes.
- Exposure to BIRT & composite reports while assisting fellow peers for financial reporting.
- Maintaining & enhancing key financial core-connector & studio integrations with Workday Web Services around journal loads, budget loads, etc.
- Experience in designing & developing following financial integrations-
 - Boomerang integrations to update customer & supplier invoices.
 - Implemented journal load & Ad Hoc Bank transaction integrations with a third-party system
 - Built an interface between Adaptive Planning & Workday to load budgets.
- Single-handedly built dashboard capturing integration runs, health checks, and schedule statuses to showcase system insights to key decision makers.
- Leading India based offshore team & assisting wherever required.
- Optimized critical integrations & business functions enhancing Workday experience for the client.
- Designing an Extend application for existing customer which will influence subscription to the Extend services.
- In addition to project deliverables, involved in firm activities to add value for the organization.

L&T Infotech, Navi Mumbai

PeopleSoft Technical Consultant, July 2018 – May 2021

- Experience in third-party integrations- Concur, Guidewire, Vertex, Bank of America, and the US Bank.
- Propose technical solutions and possible workaround for the defects reported to the continuation of the business processes.
- Key Responsibilities: handling batch jobs scheduled through Cisco's scheduler- Tidal; performing enhancements as per business requirements; and providing estimates for a change request.
- Control over Application Designer, MS SQL Server 2012, SQR & PeopleCode. Closely worked on the component interface, application engine, ExcelToCI, PS Query, pivot grid, page field configurator, data migration workbench, business process weaver, data archive manager, application packages and integration broker.
- Apart from an ongoing project, actively worked in the Centre of Excellence team for tools development. The task included creation and deployment of tools which facilitate support & maintenance projects and accelerate upgrade projects.
