Professional Summary:

Senior Business Analyst with 10 years of experience in Banking and Financial Services, specializing in Retail Banking Operations, Trade Finance and Payments domain. Strong expertise in Business Process analysis, BPMN 2.0 process modelling, and digital transformation initiatives. Proven expertise in designing end-to-end process models, and translating complex banking requirements into BRDs, FRDs, and User stories. Proven ability to partner with senior stakeholders, drive process optimization and automation initiatives, support Agile delivery, and ensure regulatory and compliance alignment across digital banking solutions.

Core Skills & Tools:

- **Banking Domains:** Retail Banking, Trade Finance, Payments, Digital Banking.
- **Trade Finance:** Letter of Credit (LC), Bank Guarantee, Collections.
- **Payments:** ACH, NEFT, RTGS, Bulk Transfers, SWIFT, Message type-MT & MX.
- **Business Analysis:** Requirement Gathering, BRD, FSD, User Stories, Use Cases, GAP Analysis.
- **Process Modelling & Transformation:** Target Operating Model (TOM), BPMN 2.0, As-Is / To-Be Modelling, Process Architecture, Customer Journey Mapping, Process Optimization, Automation
- **Tools:** Signavio, Apromore, MS Visio, Miro, JIRA.
- **Core & Trade Systems:** Finacle, T24, Trade Pro, Finastra (FCC & FTI).
- **Data & Reporting:** SQL (basic), Excel, KPI Analysis, Dashboard Support.
- **Delivery & Governance:** Agile, SDLC, SIT/UAT, Stakeholder Management & Communication, SPOC for Clients.

Professional Experience:

A. KPMG-India: Senior Consultant: June 2026-Till date.

- Led end-to-end proposal development for strategic pursuits, coordinating with cross-functional teams to deliver high-quality, client-centric proposals within tight deadlines.
- Conducted market and competitor research, analyzed client requirements, and supported opportunity qualification to strengthen business development initiatives and improve win rates.
- Collaborated with Partners, Directors, and Solution Leads to develop compelling value propositions, win themes, executive summaries, and differentiated solution narratives.
- Maintained proposal knowledge repositories, reusable content libraries, and pursuit documentation to improve proposal efficiency, consistency, and governance across engagements.

B. Deloitte India- Senior Consultant (Jan 2022-Present):

- Managed end-to-end digital self-service banking through a web-based portal for Trade Finance system of a leading Middle East Bank, which enables Banks Trade Finance department to process transactions of different Trade Finance products like Letter of Credit (LC), Collections, Guarantees, using Finastra solutions FCC & FTI, further reducing the branch walk-in customers.
- Customized process in FCC initiating Trade Finance requests like issuing Import LC, Export Collection, Undertaking Issued & Shipping Guarantee etc. for Corporate Banking customers and further integrating it to FTI & vice-versa.

- Partnered with Business, Operations, Technology, and SME stakeholders to conduct process discovery workshops, analyse banking workflows, regulatory requirements, system dependencies, and identify opportunities for business process transformation and digital modernization.
- Led BPMN 2.0-based process modelling initiatives using Signavio for AS-IS process mapping, Customer Journey Mapping, Pain Point Analysis, TO-BE process design, and Process Architecture to support Trade Finance digital transformation initiatives.
- Supported Target Operating Model (TOM) initiatives by defining future-state business processes, governance workflows, and process architecture for Trade Finance digital transformation, ensuring alignment with business objectives and regulatory requirements.
- Created Business Requirement Document (BRD), Functional Requirement Document (FRD), Mock-ups, functional workflows, regulatory & compliance constraints through brainstorming & workshops with Business Users, SME interviews and regulatory review sessions.

- Converted requirements into Epics, User stories, Acceptance criteria and worked closely with Product owner to maintain Product backlog.
- Facilitated requirement prioritization using MoSCoW, business value vs effort and ensured alignment between business priorities & scope.
- Acted as bridge between business and technology, clarified requirements for development team & supported integrations with FCC, FTI & core banking system (T24).
- Reviewed functional and UAT test cases, supported business users during UAT and managed defect triage and resolution.
- Engaged in onshore deployments across Jordan, Iraq and KSA, ensuring seamless production rollout and successful adoption of digital channels to replace branch-based workflows.

C. RBL Bank- Process Lead (Oct 2018- Jan 2022):

- Led end-to-end Standard Operating Procedures (SOPs) development for backend Banking operations (e.g. Retail Banking & Trade Operations), by converting informal processes into standardized, audit-ready documentation aligned with regulatory and internal policies.
- Led business process transformation initiatives across Retail Banking and Trade Operations by assessing AS-IS operating processes and designing TO-BE process flows to improve operational efficiency, governance, compliance, and operational controls.
- Conducted detailed process walkthroughs, SME interviews, and live process observations to capture current-state workflows, validate system touchpoints, hands-off, and inter-unit dependencies.
- Partnered with Business stakeholders, SMEs, Operations, Technology, Risk, and Compliance teams to conduct process discovery workshops, identify pain points, document current-state workflows, and define future-state business processes aligned with business and regulatory objectives.
- Designed BPMN-compliant process maps using MS Visio, along with RACI matrices, checklists, and hands-off procedures to ensure clarity of ownership, controls, and SLAs.
- Embedded operational risk controls, maker-checker mechanisms, approval frameworks, and mitigation measures within SOPs to strengthen compliance and operational resilience.
- Collaborated closely with Operations, Business, Technology, Compliance, Risk, and Audit teams to review, validate, and govern SOPs through structured version control and approval workflows.
- Supported internal, external, and regulatory audits by maintaining accurate SOP repositories, tracking adherence, and resolving process deviations and audit observations.
- Drove periodic process reviews and re-engineering initiatives to address regulatory changes, system upgrades, audit findings, and business enhancements, improving efficiency and risk posture.
- Contributed to the design and refinement of the Target Operating Model (TOM) by standardizing operational processes, governance frameworks, roles and responsibilities (RACI), approval workflows, and control mechanisms across Retail Banking and Trade Operations.
- Identified opportunities for process simplification, digitization, and automation; performed feasibility and risk analysis; and articulated business requirements for technology enabled solutions.
- Acted as a Business analyst for automation initiatives, working with system designer, developers, and QA teams to implement process improvements and digital transformation solutions.
- Managed priorities aligned with business requirements, monitored process KPIs, provided timely stakeholder updates, and ensured on-time delivery while adhering to organizational standards and regulatory guidelines.

D. Hinduja Global Solutions- Process Consultant (Mar 2015-Oct 2017):

- Worked as Business Analyst on a leading South African bank Trade finance transformation project to replace physical document handling with a centralized ticket-based portal, enabling automated request routing, role-based access control, and end-to end visibility across Trade finance operations.
- Collaborated with Trade Finance leadership, branch operations, and backend teams to analyse delays caused by physical document movement, lack of request visibility, manual tracking, and inefficient segregation of Letters of Credit (LCs).
- Defined key business objectives, including creation of a single digital entry point for Trade finance requests, automated routing to respective backend teams, controlled access and improved auditability and compliance.
- Identified and engaged relevant stakeholder for requirements elicitation, validation and sign-offs, ensuring alignment across business, operations, and technology teams.
- Documented As-Is and To-Be process flows using MS Visio.
- Gathered and documented functional & non-functional requirements, preparing BRDs, FRDs, Epics, and User stories with clearly defined acceptance criteria.
- Defined requirements for operational dashboards to support request tracking, SLA monitoring and workload management for Trade Finance operations teams.
- Supported development teams by providing requirement clarifications, managing change requests, and performing impact analysis throughout the delivery lifecycle.
- Assisted with UAT by coordinating with branch and backend teams, validating business scenarios, ensuring defect resolution and obtaining business sign-off.
- Supported production deployment, conducted user training for branch and backend teams, and ensured successful adoption of the portal to fully replace physical document submission.

Certifications:

- BPMN 2.0 Certified
- Certified Foundation Level Business Analyst (CFLBA)
- Trade Finance Certification
- Payments Domain Certification
- Project Management Professional (PMP)

Education:
