Bengaluru, Karnataka | linkedin.com/in/deva-prathap-74b01336

PROFESSIONAL SUMMARY

Senior Operations Manager with 11 years of experience in Banking Operations, specializing in Card Operations, Fraud Operations, Check Processing & Reconciliation, and Risk & AML/KYC Compliance. Proven expertise in end-to-end Debit, Credit and Commercial Card lifecycles, fraud detection and investigation, dispute management, and high-volume check processing and reconciliation. Strong background in operational risk management, AML/KYC and regulatory compliance, audit readiness and control governance aligned with banking standards. Experienced in leading large-scale operations (120+ FTE), driving service delivery excellence, and managing SLA/KPI performance across global teams. Demonstrated success in process optimization, automation initiatives, UAT and system implementations, reconciliation controls, and continuous improvement programs.

CORE COMPETENCIES

- FinCrime, AML & KYC Operations (BSA, USA PATRIOT Act, OFAC, FinCEN)
- Root-Cause Analysis & Audit Governance
- Risk Dashboards, Compliance Metrics & Business Reviews (WBR/MBR/MPR)
- Fraud Investigation & Case Management
- SOP Development & Policy/Regulatory Compliance
- Team Leadership & Performance Management

PROFESSIONAL EXPERIENCE

SLK Software Pvt. Ltd. | Bengaluru, Karnataka | Client: Regions Bank and Synovus Bank Senior Operations / Program Manager | July 2025 – March 2026

- Led a 130-member risk and audit team, strengthening SLK's global risk posture through SOP reforms, policy rewrites and risk-control enhancements, improving audit accuracy by 22%.
- Oversaw multiple teams and projects across a larger account/portfolio, ensuring operational priorities, delivery requirements and performance objectives remained aligned.
- Led strategic planning, budgeting and P&L accountability, where applicable.
- Managed senior-level client relationships and business growth support, maintaining stakeholder engagement across the account.
- Mentored managers and drove leadership development across the team.
- Set operational strategy, process improvement initiatives and compliance oversight across the function.
- Reported to leadership on performance metrics, risks and issues, providing visibility into operational performance and control effectiveness.
- Drove Weekly Business Reviews (WBRs), Monthly Business Reviews (MBRs) and Monthly Program Reviews (MPRs), consolidating audit insights, risk trends and operational performance for senior leadership decision-making.
- Led the annual Talent Review for the 130-member risk and audit team, managing promotions, succession planning and long-term career development pathways.
- Owned end-to-end performance management, including goal-setting, quarterly check-ins, competency assessments and development planning.
- Conducted interviews and capability assessments for new auditors and managers to maintain hiring standards.
- Implemented structured training and calibration programmes, reducing inter-auditor variance by 28% and improving reviewer proficiency.

Operations Manager | June 2023 – July 2025

- Conducted root-cause investigations on escalations, identifying policy gaps, violation patterns and operational loopholes; implemented corrective measures that reduced repeat defects by 20–30% quarter-over-quarter.
- Drove incident-response governance, triaging high-impact audit failures and coordinating corrective actions with Security, Operations, Legal and Risk teams to prevent recurrence.
- Managed operational migration activities for card operations, coordinating process transition, resource readiness, documentation, stakeholder dependencies and issue resolution through BAU stabilisation.
- Owned assigned country/workstream delivery for card operations, tracking milestones, dependencies, actions and readiness requirements across Operations, Technology, Risk and other stakeholders.
- Owned RAID management for assigned workstreams, tracking risks, issues, assumptions, dependencies and actions, and driving mitigation, escalation and timely closure with stakeholders.
- Coordinated cutover activities for card operations, ensuring operational readiness, stakeholder sign-offs, issue closure and support arrangements were in place for go-live.
- Led operational handover to BAU teams following migration, coordinating knowledge transfer, SOPs, readiness checks, open issues and post-go-live support.

- Developed and maintained detailed L5/L6 process documentation and SOPs for card operations, supporting process transition, standardisation, training and BAU readiness.
- Used JIRA to track project/workstream actions, delivery milestones, issues, dependencies and readiness activities through implementation and transition.
- Built and deployed risk dashboards and compliance metrics, improving leadership decision-making and reducing audit cycle time by 35%; managed confidential investigation data in accordance with InfoSec and privacy requirements.
- Managed team/project delivery, SLA/KPI tracking and risk mitigation, ensuring quality, timelines and compliance standards were consistently met.
- Owned client communication and stakeholder management, handling escalations and coordinating across multiple departments.
- Managed third-party contracts and service-level agreements, and supported RFPs by tailoring content to client needs and regulatory requirements.
- Drove effort estimation, staff allocation and resource planning to support revenue and profitability targets, including performance reviews and schedule optimisation.
- Established monthly goals, communicated priorities and tracked progress; trained and supported less experienced staff in managing workloads and assignments.

Infosys BPM Ltd. | Bengaluru, Karnataka | Client: SunTrust Banks, subsequently merged with BB&T

Assistant Manager | January 2022 – June 2023

Team Leader | October 2019 – December 2021

- Led teams of up to 100+ analysts across Fraud Operations and the Financial Crime Unit (AML/KYC), including a 65+ member fraud investigations team and a 60 FTE deposit/card fraud team supporting one of the largest US retail banks, consistently achieving 100% TAT and 99%+ accuracy.
- Maintained fraud loss mitigation below \$50K through effective case prioritization, decision-making and process controls; recognized with the Best Team Lead Award and multiple Ramp Awards.
- Coached, trained and performance-managed team members, promoting quality, compliance and continuous improvement across operations.
- Reviewed flagged transactions and investigated deposited checks for potential fraud, escalating cases for decisioning and taking appropriate actions including blocking accounts/cards and re-issuing cards in line with process guidelines.
- Investigated disputed transactions using case management systems and the Enterprise Fraud Management Process, reporting findings in accordance with Regulation E and US banking regulations; handled Debit, Gift and ATM card disputes.
- Prepared daily and weekly MIS reports and fraud trend analysis, and conducted WBRs and MBRs with stakeholders covering operational performance and risk metrics.
- Ensured compliance with BSA, USA PATRIOT Act, FinCEN guidelines and OFAC sanctions, including risk assessments, policy/procedure development and employee training.
- Investigated potential sanctions violations and monitored transactions for suspicious activity, preparing and submitting reports to relevant authorities.
- Liaised with clients, Risk teams and law enforcement/compliance stakeholders on complex cases and drove process improvements that reduced fraud losses and false positives.

Corporate Card Operations & Migration

- Managed operational migration activities for Corporate Card operations, coordinating process transition, operational readiness, documentation, dependencies and issue resolution through BAU stabilisation.
- Owned assigned card operations workstreams, tracking delivery milestones, dependencies, readiness requirements and stakeholder actions across Operations, Technology, Risk and partner teams.
- Owned RAID for the Corporate Card migration, tracking operational, technology and readiness risks; drove mitigation and escalation of critical dependencies and maintained closure through go-live.
- Coordinated UAT, operational readiness and cutover activities, tracking outstanding issues, dependencies and stakeholder sign-offs through go-live.
- Coordinated people, process, system, control and training readiness for Corporate Card migration, tracking outstanding actions and stakeholder sign-offs and supporting cutover execution through go-live.
- Led transition to the receiving BAU team, completing knowledge transfer, L5/L6 SOPs, process documentation, control requirements and outstanding actions, with post-go-live support through stabilisation.
- Developed and maintained detailed L5/L6 SOPs and process documentation, supporting operational transition, process standardisation, training and BAU readiness.
- Used JIRA to track project/workstream actions, delivery milestones, issues, dependencies, defects and readiness activities throughout implementation and transition.
- Supported card operations and implementation activities involving Mainframe-based processing environments, working with Technology teams on system readiness, testing and production issues.

Process Analyst | June 2015 – October 2019

- Processed 4,000+ Commercial Card applications, activations and transaction queries monthly, consistently maintaining 100% TAT compliance.
- Maintained quality scores of 99.5%+, consistently exceeding operational benchmarks.
- Resolved card disputes, chargebacks and billing discrepancies, supporting timely resolution and a seamless cardholder experience.

- Ensured compliance with Visa and Mastercard scheme regulations and internal SLAs through accurate processing, documentation and controls.
- Monitored and resolved declined transactions, credit-limit adjustments and billing errors as part of day-to-day Commercial Card operations.
- Coordinated with clients and cardholders on account-related queries while maintaining accurate records and documentation to support audit readiness.

PROJECTS COMPLETED / SUPPORTED

- AI-Based Check Fraud Detection – Supported the AI team in implementing an AI-based check fraud detection tool to identify anomalies, reducing fraudulent cases through advanced analytics.
- Contract Validation & Onboarding Tool (Green Belt) – Automated manual contract creation and client onboarding, reducing typos and improving quality.
- Request Email Indexing System (Green Belt) – Streamlined validation, tagging and confirmation of workflow requests, handling a volume of 1,500–2,000 per day.
