About me

Visionary **Cloud and DevOps Leader** with 15+ years of progressive experience designing, automating, and optimizing enterprise-grade **cloud solutions** across Azure and AWS. Proven success in strategic cloud adoption, **multi-cloud architecture**, and **DevOps transformation** through **automation**, **cost governance**, and **security-by design practices**.

Expert in **Infrastructure as Code (IaC)** using **Terraform** with advanced modules leveraging **dynamic blocks**, **conditionals**, **loops**, and **reusable child-parent structures** for **flexible, scalable deployments**. Skilled in orchestrating hybrid and multi-cloud environments integrating A

Projects

On Multicloud

09/2021 – Present

- **Cloud Strategy & Architecture:** Designing resilient architectures leveraging **Availability Zones**, **Load Balancers**, **App Gateways**, **Scale Sets**, and **Azure Front Door**; establishing **Landing Zones** with policy-based governance, tagging, and resource organization.
- **Infrastructure as Code (IaC):** Architecting Terraform-based IaC frameworks using **workspaces**, **modules**, **dynamic expressions**, **optional variables**, and **looping constructs** for environment-agnostic deployment and lifecycle management.
- **Kubernetes & Containers:** Implemented **AKS clusters** with **Azure CNI Overlay**, **Calico network policies**, and **GitOps-based deployment** via **ArgoCD**; integrated container registries (ACR) with secure image scanning pipelines.
- **CI/CD & GitOps:** Designed **Azure DevOps and GitHub Actions pipelines** for continuous integration, automated testing, security scanning, and blue-green/canary deployments. Managed pipeline agents, service principals, secrets via **Key Vault**.
- **Security & Compliance:** Defined **Azure Policy**, **Blueprints**, and **Role-Based Access Control (RBAC)** to enforce least privilege. Configured **NSGs**, **ASGs**, **WAFs**, and **Private Endpoints**. Integrated **Sentinel**, **Defender for Cloud**, and **Key Vault** for secrets and certificates.
- **Monitoring & Observability:** Architected monitoring stacks using **Azure Monitor**, **Log Analytics**, **Application Insights**, **CloudWatch**, with proactive alerting, dashboarding, and SLA/SLO-based performance baselines.
- **Cost & Performance Optimization:** Applied **FinOps** principles—rightsizing VMs, decommissioning idle resources, and implementing **budgets**, **cost alerts**, and **automation policies** to ensure efficient utilization.
- **Automation & Scripting:** Automated deployments, resource scaling, and configuration management with **Python SDKs**, **Azure CLI**, and **PowerShell** for end-to-end lifecycle management.
- **Collaboration & Mentorship:** Partnered with cross-functional teams (Dev, SecOps, and Finance) to align technology with business objectives; mentored DevOps engineers on IaC, pipeline automation, and secure coding best practices.

Tools & Platform

- Azure & Aws
- Kubernetes, ArgoCD
- Workflows & ADO CICD
- Terraform
- GitHub Actions
- Prometheus , Grafana loki
- Snyk, Tflint
- Python, bash & Power shell
- Cost optimization

Education

MBA, Annamalai University

06/2008 – 05/2010 | Pune , MH

B-Tech, Maharashtra institute of Technology

08/2003 – 08/2006

Aurangabad, MH

Diploma, Government

Polytechnique wahim

08/2000 – 07/2003

Washim , MH

Professional Experience

Senior Engineer (DevOps - Tech Lead),

Reliance industries ltd

09/2018 – Present | Remote MH

Engineer, Reliance Jio

09/2015 – 08/2018 | Yavatmal

IT Manager, Endurance Technologies pvt ltd.

02/2014 – 11/2014 | Aurangabad

Specialist, Nokia Siemens Networks

07/2007 – 02/2014 | Pune
