## PERSONAL SUMMARY

Data Governance Professional with 6.7 years of overall IT experience, including 3.6 years in Data Governance and 3 years in Application Support. Experienced in the Collibra Data Intelligence Platform, specializing in Metadata Ingestion, Data Cataloging, Data Lineage, and Data Quality. Skilled in working with PostgreSQL, Oracle, and Snowflake, with a strong understanding of metadata management, data governance, and data stewardship.

## TECHNICAL SKILLS

- **Data Governance:** Collibra Data Catalog, Metadata Ingestion (EDGE), Data Lineage, Data Profiling, Data Classification (PII), Data Stewardship, Business Glossary.
- **Databases:** Snowflake, Oracle, Postgres, SQL.
- **Cloud & DevOps:** AWS (EC2, ECS), Jenkins, Unix, DevOps Basics.

## WORK HISTORY

### Collibra Data Governance Analyst | Cognizant (Project: S&P Global) Jan 2023 – Present

- **Metadata Architecture:** Orchestrated seamless metadata ingestion from Postgres, Oracle, and Snowflake using Collibra EDGE.
- **Automation & Efficiency:** Automated schema refresh and profiling schedules in Collibra to maintain continuous data governance.
- **Security & Compliance:** Configured automated Data Classification and profiling jobs to identify PII and sensitive data.
- **Stakeholder Collaboration:** Collaborated with **Business Stakeholders, Data Owners and Data Stewards** to define data requirements, business rules, ownership and governance standards across critical data domains.
- **Business-Technical Bridge:** Acted as a bridge between **business and technical teams**, working closely with Data Engineering and IT teams to translate business data requirements into practical governance and data-management solutions.

- **Data Security & Governance:** Partnered with **IT and Security teams** to ensure data was properly governed, secure and compliant with established access, quality and governance standards.
- **Data Asset Management:** Designed and maintained the Collibra Data Catalog to enable business users to discover and trust enterprise data assets.
- **Standardization:** Developed Business Glossary and Data Dictionary assets to standardize business terms and improve collaboration.
- **Conducted data profiling** using SQL on Bonds and Ratings datasets to identify data quality issues and support improvements across accuracy, completeness, consistency, and validity dimensions.

## **Application Support Analyst | Cognizant (Project: S&P Global) Nov 2019 – Dec 2022**

- **Infrastructure Management:** Managed application infrastructure utilizing the AWS console for EC2 instances and ECS clusters.
- **Release Management:** Led critical production releases for global applications using Jenkins and Unix.
- **Operational Excellence:** Conducted daily checkouts for global stock market indices to ensure accurate market processes.
- **Monitoring:** Monitored application servers for CPU, memory, and disk utilization to ensure optimal performance.

## **TOOLS**

- Collibra, ServiceNow, Jenkins, MobaXterm, Toad, DBeaver, WinSCP, Postman, FileZilla

## **EDUCATION**

Bachelor of Engineering Technology: Electronics and Instrumentation  
Chettinad College of Engineering & Technology – May 2017  
Karur, India | CGPA: 7.3

## **TECHNOLOGY SKILLS**

- AWS
- SQL
- Unix Commands
- Jenkins

- DevOps basics
- Python basics

## PROJECTS

Customer: S&P Dow Jones Indices, New York

Description: Create indices for share market stocks
