Dashboard & Reporting • Portfolio & Resource Management • Project Management • Data Migration & Environment Setup

Requirements Gathering • Stakeholder Communication • Process Documentation • Technical Support • SQL • Java • JSP • Oracle DB

PROFESSIONAL EXPERIENCE

Senior Software Engineer – Adobe Workfront | Wipro | Coimbatore, India May 2024 – Present

- Led the design and implementation of Adobe Workfront solutions, aligning platform capabilities with enterprise project management and digital workflow needs.
- Architected and delivered scalable workflow automations using Workfront Fusion, significantly reducing manual operations and improving process efficiency.
- Customized and extended core Workfront components including Projects, Portfolios, custom forms, templates, and reporting frameworks to support complex business use cases.
- Built advanced dashboards and custom reports enabling leadership to track KPIs, resource allocation, and project delivery in real time.
- Led end-to-end implementation and migration initiatives including data transformations, environment setup, and production rollouts.

Workfront Developer | DLUX Tech | Coimbatore, India Mar 2022 – May 2024

- Collaborated with Project Managers and customers on Workfront platform implementations and system deployment.
- Developed and maintained custom Workfront components: workflows, custom fields, layout templates, forms, resource/portfolio/program management, notifications, reports, and dashboards.
- Designed and implemented data models and third-party integrations using Workfront Fusion.
- Managed user profile administration and access control across the Workfront environment.
- Drove ongoing rollout, adoption, and continuous improvement initiatives; maintained system documentation and best practices.
- Executed proof-of-concept implementations to validate product feasibility and optimize the Workfront system for the Marketing department.

Software Developer | DoFort Technologies | Bangalore, India Apr 2019 – Dec 2020

- Developed daily business reports covering sales and manufacturing functions.
- Implemented UI screens using Java and JSP; authored complex SQL queries for Oracle and SQL Server databases.
- Gathered and interpreted requirements from functional stakeholders on the client side.
