SUMMARY

Data & Analytics professional with 10+ years of experience in data science, AI, and business strategy across financial and operational domains. Expertise in building ML models, LLM-driven solutions, and cloud-deployed analytics pipelines to enable data-backed decision-making. Skilled in stakeholder engagement, automation, and delivering business impact through Power BI and MLOps.

SKILLS

- **Statistical Modeling:** Regression, Clustering, Forecasting, Market Basket Analysis.
- **Tools & Tech:** Python (Pandas, Scikit-learn, PyTorch, LangChain, Hugging Face, XGBoost, Isolation Forest), SQL, Power BI, Vector Databases.
- **Generative AI & LLMs:** LLMs (GPT, Falcon), Retrieval-Augmented Generation (RAG), Embeddings, Semantic Search.
- **Cloud Deployment:** Azure ML.
- **Data Science Process:** EDA, Feature Engineering, Model Development, Deployment, Monitoring, Explainability.
- **AI Microservices:** API-based and Event-driven Architectures for scalable ML pipelines.
- **MLOps:** CI/CD, Model Monitoring, Retraining, Responsible AI Practices.

PROFESSIONAL EXPERIENCE

SENIOR ANALYST

Accenture

December 2022 – Present

- Developed dynamic dashboards for real-time audit insights, improving the speed and accuracy of decision-making and analyzed financial product performance and recommended optimization strategies for improved service offerings.
- Designed and deployed customer segmentation models **using KMeans and XGBoost** to improve campaign targeting and increase ROI by 20%.
- Implemented advanced anomaly detection techniques including **Isolation Forest** to identify early warning signals in fraud-prone scenarios, improving risk identification by 25%.
- Led a team of analysts to deliver strategic data-driven solutions, ensuring alignment with business objectives.
- Collaborated with the GenAI team to fine-tune prompts and develop **LLM-based solutions** and Mentored junior analysts and led cross-functional project teams for **AI/ML-driven decision-making**.

SENIOR ASSOCIATE-DATA ANALYSIS

Larsen and Toubro Construction

October 2021 - December 2022

- Built and deployed **machine learning models** for risk prediction and demand forecasting, improving procurement planning by 20%.
- Created robust **ETL pipelines** to handle large datasets, ensuring data accuracy and standardization for downstream analytics.
- Designed performance dashboards to monitor key KPIs across regions, enabling faster response to resource gaps.

JUNIOR ENGINEER(Data Analyst)

Bharat Sanchar Nigam Limited (Govt. Of India)

July 2018 - September 2021

- Conducted **A/B testing** and statistical analysis to optimize network reliability, reducing downtime by 15%.
- Built forecasting models using **time-series** techniques to identify network congestion trends and improve service quality.
- Automated reporting workflows using **Python**, reducing data preparation time by 30%.

BUSINESS ANALYST

A&A Solutions

April 2015 - May 2018

- **Drafted Business Requirement Documents (BRD) and Functional Requirement Documents (FRD) to align technical solutions with business goals.**
- Conducted in-depth data analysis to identify operational inefficiencies, resulting in optimized workflows and improved decision-making processes.

CONSULTANT

Geo Planet Solutions Pvt Limited

October 2013 - March 2015

- **Provided client support** by troubleshooting and resolving configuration issues promptly, ensuring minimal downtime and maximum client satisfaction.
- **Conducted feasibility studies and preliminary assessments for mining projects**, evaluating technical and economic viability, and presenting findings to stakeholders to inform decision-making processes.

PROJECTS

Conversational AI Assistant using RAG

- **Objective:** Designed and deployed a Retrieval-Augmented Generation (RAG) pipeline integrating a Large Language Model with domain-specific knowledge for contextual responses.
- **Technologies:** Python, LangChain, Hugging Face, FAISS, Azure ML.
- **Results:** Reduced query response latency by 40% and improved accuracy of domain-specific answers by 35%.

AI Microservices Deployment

- **Objective:** Built modular AI microservices for text summarization and NER, orchestrated through an event-driven architecture.
- **Technologies:** Python (FastAPI), Docker, Azure Functions, Kafka, Hugging Face Transformers.
- **Results:** Achieved scalable deployment and reduced model serving time by 50%.

AR Aging Dashboard

- **Objective:** To design an AR (Accounts Receivable) aging dashboard that tracks key metrics, including trends, deductions, collections, and unapplied cash, while identifying overdue accounts and payment patterns to improve cash flow.
- **Technologies:** Python (Pandas, Matplotlib), SQL, Power BI.
- **Results:** Reduced 30-day and above due accounts by 30% within six months. Developed detailed client payment profiles to analyze and predict payment patterns from customer invoices. Improved overall cash flow by 20% through enhanced payment collection strategies.

Semantic Search Platform

- **Objective:** Implemented a semantic search engine for financial document retrieval using embeddings and vector databases.
- **Technologies:** Sentence Transformers, FAISS, PyTorch, Streamlit.
- **Results:** Improved document retrieval relevance by 45%, enabling faster audit analysis and research.

SIGMA -ZI

- **Objective:** Deploy ML models to assess construction safety risks.
- **Technologies:** Python (NLP, Time Series Forecasting), Docker, Kubernetes, Power BI.
- **Results:** Enhanced prediction speed by 30% through containerized deployments.

Customer Segment Analysis and Recommendation

- **Objective:** Build a recommendation engine for customer retention.
- **Technologies:** Python, PyTorch, Azure Data Factory.
- **Results:** Boosted revenue by 10% through precise customer targeting.

Asset life cycle analysis

- **Objective :** Analysis of with the age of asset how the cost (IOM) increases and decides the best probable time to sell out the asset.
- **Technologies:** R programming. GAM,ARIMA, Time Series Forecasting
- **Results:** Able to sale/dispose assets on time reducing the financial loss .

EDUCATION

Master of Science in Machine Learning & AI

Liverpool John Moores University Liverpool, England
Expected Graduation: March'26

BACHELOR OF TECHNOLOGY

Rajasthan Technical University Kota, Rajasthan
Year: 2013

CERTIFICATIONS & ACHIEVEMENTS

- **Google Data Analytics |Coursera | 2022**
 - **Azure AI Fundamentals |2024**
-
