PROFILE SUMMARY

- **Team Lead** with **11.8** years of IT experience in application development, enhancement, maintenance, service delivery.
- Designed and developed N-tire web, windows using **C#, ASP.NET core, MVC, API, Angular** as front end and securing using **JWT** token and **SQL Server**.
- Good understanding of Architecture concepts like **SOLID principles, Design patterns** and **Microservices**.
- Proficient in SQL Server, with hands-on experience in **developing stored procedures, triggers, and views, executing database backup and recovery, creating scheduled jobs, performing database migrations, and implementing SSIS solutions**.
- Worked extensively with **Azure Logic Apps, Azure Functions, Azure Data Factory (ADF) pipelines, Azure Data Lake Storage, and Microsoft Power BI (Power BI Desktop)** to develop cloud-based integration, data processing, and reporting solutions.
- Working knowledge of **Azure DevOps** and familiar with **Kubernetes** and **Docker**.
- Experience working across the complete **Software Development Life Cycle (SDLC)**, including requirements analysis, design, development, testing, deployment, and maintenance, within Agile Scrum environments.
- Working knowledge of **IT service management (ITSM)** and issue-tracking tools, including **Remedy, ServiceNow, Cherwell, and Jira**.
- Capable of managing projects end-to-end, from requirements gathering and **solution design to implementation and delivery**.

CORE COMPETENCIES

- **Microsoft Power Platform:** Power Apps, Canvas Apps, Model-driven Apps, Power Automate, Dataverse, Power BI, Power Platform Connectors, Custom Connectors, PCF
- **Dataverse / MDP:** Dataverse Web API, FetchXML, Data Modeling, Business Rules, Plugins, Queries, Security, Data Validation, Data Migration, Reconciliation
- **Azure:** Azure Functions, Azure Logic Apps, Azure DevOps, Webhooks, Event-driven Integration, API Integration, Application Workflows
- **Development:** C#, .NET, TypeScript, JavaScript, React, REST APIs, JSON, Web APIs
- **Data:** SQL Server, SQL Queries, SharePoint, Dataverse, Data Transformation, Data Validation, Data Migration, Deduplication, Reconciliation
- **Reporting:** Power BI, Data Modeling, KPI Dashboards, Cost Reporting, Savings Reporting, Completion Metrics, Integration Status

EDUCATION

- B.Sc Computers Science from S.S.G.S Degree College, Guntakal passing year April 2011.
- Master of Software Engineering from BITS, Pilani passing year December 2015.

WORK EXPERIENCE

Manager | Capgemini

December 2024 - September 2025

Client - Mercedes

- Led the application maintenance team by coordinating support activities, streamlining maintenance processes, and ensuring smooth application operations.
- Responsible for maintaining applications developed using .NET Core, Angular and SQL Server.
- Worked on change requests and resolved issues related to Azure Logic Apps and Azure Functions for existing applications.
- Developed a mini chatbot project using Angular and OpenAI API technologies to strengthen technical expertise in building modern AI-powered applications.

Team Lead | Accenture Solutions

September 2021 - June 2023

Client - M&G Investments

- Designed and developed enterprise applications using Power Apps, Dataverse, Power Automate, Azure services, .NET, REST APIs, and Power BI.
- Developed and maintained Azure Logic Apps and Azure Functions to facilitate seamless data integration between applications.
- Designed and managed Azure Data Factory (ADF) pipelines to orchestrate and load data products into Azure SQL Database.
- Designed and developed enterprise applications using Power Apps, Dataverse, Power Automate, Azure services, .NET, REST APIs, and Power BI.
- Developed Canvas and Model-driven Power Apps to digitize manual business processes and provide users with centralized, role-based application experiences.
- Designed Dataverse data models, relationships, business rules, views, forms, and queries to establish a consistent source of truth for enterprise data.
- Worked closely with cross-functional teams, contributing ideas and best practices to improve project execution and delivery.
- Applied strong analytical, troubleshooting and debugging skills to resolve technical challenges and enhance application performance.

IT Analyst | Tata Consultancy Services

May 2019 - April 2020

Client - SuperValu

- Responsible for maintaining applications developed using ASP.NET MVC and SQL Server.
- Managed database and application code changes, including enhancement requests and maintenance activities.

- Analysed and resolved application incidents and service requests within defined SLA timelines.
- Coordinated with cross-functional teams to troubleshoot and resolve production issues effectively.
- Managed team activities, tracked issue resolution progress, and ensured timely delivery of support services.
- Performed Major Incident (MI) management by collaborating with relevant teams to identify root causes and implement effective solutions.

Senior Project Engineer | Wipro Technologies Ltd

August 2018 - May 2019

Client - StateStreet

- Developed and maintained PDF reporting solutions for applications built using VB.NET and SQL Server.
- Implemented application enhancements and modifications based on change requests.
- Analysed and resolved application issues and service requests within defined SLA timelines.
- Supported application maintenance activities to ensure smooth operation and timely delivery of reporting solutions.

Senior Project Engineer | Wipro Technologies Ltd

September 2015 - July 2018

Client - Ecube

- Enhanced and maintained a project management application developed using Classic ASP, ASP.NET, C#, and SQL Server.
- Performed SQL Server database activities, including developing stored procedures, triggers, database backup and restoration, SQL Agent job creation, and troubleshooting job failures.
- Supported application server migration activities to ensure smooth transition and minimal service disruption.
- Integrated Active Directory Federation Services (ADFS) authentication with the application to enhance security and user access management.
- Involved in the complete application development lifecycle, including requirement analysis, design, coding, implementation, testing, and deployment.
- Prepared and shared Weekly Status Reports (WSR) with management, highlighting project progress, issues, and deliverables.

Project Engineer | Wipro Technologies Ltd

January 2013 - August 2015

Client - National Grid

- Responsible for maintaining and supporting web applications developed using ASP.NET and SQL Server.
- Performed daily application health checks to ensure system availability, stability, and smooth operations.
- Developed and configured Afaria channels with predefined events to automate file transfer between server and client machines using VBScript and batch scripts.
- Performed SQL Server database changes, including updates and maintenance activities to support application requirements.

Project Engineer | Wipro Technologies Ltd

August 2011- December 2012

Client - BP

- Responsible for daily application monitoring, health checks, and operational support activities.
- Analysed and resolved application incidents and user requests within agreed SLA timelines.
