

Transformation-focused Process Improvement Leader with decade of experience orchestrating large-scale digital transformation programs in global retail and commercial banking. Proven track record managing end-to-end delivery of customer onboarding, digital platform migration, and online banking initiatives across EMEA and US markets. Expert at translating complex regulatory requirements into scalable implementation roadmaps, embedding control frameworks, and driving cross-functional alignment between Compliance, Operations, Technology, and Business stakeholders. Advanced proficiency in Agile delivery methodologies, Jira/Confluence project management, and governance frameworks. Demonstrated track record managing complex, regulated environments while maintaining audit readiness and internal control standards.

Education

Master’s in Management,
Specialization – Strategic and
Innovation Management from
Akademia Leona Koźmińskiego

Bachelor of Engineering,
Specialization – Mechanical from
Mumbai University

Core Competencies

- Strategic Project Management
- Customer Experience & Digital Channels
- Business & digital transformation
- Process improvement & re-engineering
- Agile & Scrum frameworks
- BRD, PRD, & FRD generation & Feasibility Studies
- Data Analytics & Automation

- Cross-functional program and people leadership
- Change management & stakeholder influence
- Business Transformation & Change Management
- Performance Metrics & KPI Optimization
- API integrations - data exchange & verification

Technical & Analytics Skills

- Analytics & BI:** Tableau, Power BI, Alteryx (Core + Server Certified), Excel (advanced - VBA, pivots, automation), SQL
- Automation & Programming:** Python, UiPath (RPA), Figma, Informatica, Power Apps & Automate
- AI & Emerging Tech:** Experience applying RPA and exploring AI/LLM and NLP tools for process discovery, documentation, and insight generation
 - Platforms & ERP:** Investran, Yardi, Deep Pool, eFront, Geneva, SAP, Oracle

- Project Management & Governance (ADVANCED):** JIRA (project setup, sprint planning, tracking, reporting, dashboards), Confluence(Project documentation and process flows), MS Project, Visio, SharePoint, Lists
- Methods:** Agile, Scrum, process mapping & documentation, time & motion analysis, Design Thinking, Six Sigma for waste management

Profile Summary

- Strategic communicator skilled at converting complex process and risk insights into simple, compelling narratives that influence senior decision-makers and drive adoption of change.
- Data-driven strategist with hands-on experience designing dashboards, KPIs, and analytical models to identify inefficiencies, quantify impact, and prioritize transformation initiatives.
- Innovation-focused leader with experience evaluating and implementing automation, RPA, and emerging AI-enabled solutions to optimize processes and reduce operational risk.
- Proven expertise in end-to-end transaction lifecycle management, due diligence oversight, and multistakeholder coordination encompassing Compliance, Legal, Credit, and Risk domains.
- Accomplished in leading large cross-functional teams, instituting governance frameworks, and embedding data-driven control mechanisms to ensure transparency, quality, and audit readiness.
- Proficient at designing and executing process re-engineering initiatives leveraging automation tools such as Alteryx, Python, and UiPath, resulting in measurable efficiency gains and scalability.
- Experienced in managing strategic programs aligned with business transformation, operational resilience, and digital innovation goals using Agile and Scrum methodologies.**
- Showcased strong organizational leadership and influence as Employee Representative and ACE Impact Chair at BNY Mellon Poland, driving inclusion, engagement, and culture-building initiatives.
- Recognized for fostering high-performing, inclusive teams through structured capability development, continuous coaching, and performance enablement aligned with organizational vision.

Experience

Bank of New York Mellon, Poland | July 2021 – October 2025

As Project Manager – Client Processing / Onboarding (Transformation & Automation Lead) | January 2022 – October 2025

- Led strategic operations across multi-tier teams of Analysts, Associates, and Team Leaders, ensuring consistent delivery excellence through robust governance, structured review mechanisms, and proactive performance management.
- Led end-to-end delivery of customer onboarding platform redesign with embedded KYC and CDD controls, reducing turnaround time by 40% and improving regulatory compliance alignment and adoption across retail business lines.
- Championed people development through tailored coaching frameworks, capability-building programs, and continuous feedback cycles cultivating a culture of accountability, innovation, and operational ownership.
- Translated complex compliance, operational, and regulatory risks into clear, data-driven narratives and governance materials (status reports, dashboards, steering committee packs, risk escalations) that enabled informed decision-making by senior stakeholders and regulatory bodies on technology investments and process redesign.
- Acted as principal liaison between regional business units, front-office, finance, and operations, building trust-based advisory relationships and driving alignment on transformation priorities and roadmap.
- Led end-to-end transformation of customer onboarding from manual-heavy processes to digital-first platform, delivering across discovery, design, technology implementation, and organizational change management.

- Designed and monitored performance dashboards and KPIs to evaluate productivity and service quality; used trend analysis to surface root causes and implement targeted corrective actions, improving turnaround time and reducing rework.
- Monitored end-to-end reporting and governance cycles, ensuring timeliness, accuracy, and consistency of data presented to internal leadership and regulatory authorities.
- Established structured communication and governance routines daily stand-ups, team huddles, and strategic syncs to promote alignment, transparency, and outcome-focused collaboration.
- Upheld corporate values of ethics, inclusion, and integrity, embedding these principles into team **Certifications** practices, leadership behaviors, and recognition frameworks.
- Embedded a strong compliance culture by reinforcing internal control frameworks, elevating risk awareness, and ensuring audit readiness in all operational activities.
- Led multi-phase process improvement initiatives across client onboarding and transaction lifecycle, using Alteryx/Tableau-based analytics to identify bottlenecks, quantify efficiency gaps, and prioritize re-engineering opportunities.
- Conducted time-and-motion and workload studies across cross-regional teams, designing regulatory delivery roadmaps resulting in 40% productivity uplift and 60% reduction in manual touchpoints through control-aware process redesign and automation, while maintaining compliance standards.
- Drove cross-regional transformation projects that enhanced operational integrity, improved onboarding turnaround, and elevated client experience across business lines.
- Supervised the implementation and adoption of new tools, systems, and workflows, leading stakeholder enablement, training, and post-implementation optimization.

SPECIAL PROJECT/RECOGNITIONS:

Investor Portal Migration: Led the end-to-end migration of the Investor Portal from a third-party vendor to an in-house platform, mapping and redesigning workflows with technology and operations

Certified Alteryx stakeholders to enhance customization, user experience, and reporting while reducing vendor **Designer Core** dependency and long-term costs.

- Data Loader Implementation:** Designed and implemented an automated data loader for the Investran platform to replace manual custodian data entry, improving data timeliness and accuracy, strengthening auditability, and reducing operational effort and break rates across downstream

Certified Alteryx Server reporting.

- Bulk Wire RPA Project (Transfer Agency):** Led end-to-end robotic process automation initiative from diagnostic assessment to solution design and rollout. Mapped current-state process, identified automation candidates, partnered with technology to design RPA workflows, and managed change

Certified Scrum Product adoption—achieving ~82% reduction in processing time and freeing capacity for higher-value work.

- Owner (CSPO)** • **Transfer Agency Policy Platform:** Drove the implementation of a centralized digital platform for Transfer Agency policies and SOPs, consolidating fragmented documentation into a single source of truth that improved accessibility, version control, compliance oversight, and consistent policy adoption across global teams.

Achievements • **Global Digital Tools Champion Program:** Designed and scaled a community-driven automation and analytics adoption program from Poland to global operations, coaching “champions” to drive local use-cases in Alteryx, Python, and other tools. Increased digital tool adoption and helped create a
