

GAJENDRA S. RATHORE

PMP®, PRINCE2®, CSM®, ITIL® | SAFe® 6.0 Agilist (Trained)

Technical Program & Digital Transformation Leader

Noida, India | +91-9650524888 | gajuji@gmail.com

PMP®, CSM®, PRINCE2®, ITIL® Certified | SAFe® 6.0 Agilist (Trained) | Technical Program & Digital Transformation Leader- Results-driven **Technical Program Manager** with 18+ years of experience delivering large-scale **IT, Data, AI/ML, Cloud, and enterprise application development programs** across global and public-sector environments. Strong foundation in application development and system integration, combined with extensive leadership in digital transformation, cloud modernization, and data platform initiatives.

Proven expertise in Agile, SAFe, and hybrid delivery models, leading complex multi-stream programs and cross-functional teams in fast-paced, regulated environments. Experienced in technical program governance, architecture reviews, stakeholder alignment, vendor-led deployments, and executing large-scale transitions and migration programs. Adept at bridging business strategy with scalable, secure technology solutions—driving innovation, operational efficiency, and measurable business outcomes through structured program execution and modern cloud-based architectures.

CORE COMPETENCIES

■ Program, Project & Portfolio Governance and Delivery Management:

- Oversee end-to-end program and project delivery, ensuring adherence to timelines, budgets, and scope
- Lead cross-functional IT programs aligned with organizational strategic goals
- Multi model engagement Managed services, Staff augmentation & Global competitive centers (GCC), ODC, Near shore Models
- Develop business cases, go-to-market strategies, and manage P&L and costs - Budget & P&L Ownership (\$5M annual programs)
- Regular reporting to the Executive Steering Committee for \$5M annual programs, covering budget oversight, risk mitigation, and transformation milestones.
- Driving the cost efficiency of the competency clusters (Delivery Units), and maximizing the Business Units throughput & productivity and focus on the inclusive culture of the organization
- Expert in Fixed Price, Cost Reimbursable, and Time and Material contract models
- Experience in managing programs with the team size and span of 30 to 50 associates

■ Product Strategy, Roadmap & Market Opportunities:

- Define product roadmaps by operationalizing defined strategy.
- Articulate product ideas to capture attention and compel action despite obstacles and competing priorities.
- Identify opportunities in the market landscape.
- Support product launches, maintenance, and retirement in collaboration with other cross-functional teams and stakeholders.
- Prioritize product features and enhancements based on customer needs, business goals, and technical feasibility.
- Develop and execute go-to-market strategies, including positioning, messaging, pricing, and promotional plans.

■ Generative AI Knowledge, AI/ML Model Development & Deployment:

- Utilize knowledge of Generative AI frameworks, models, and tools to drive program success and innovation.
- Utilize AI Companion - Microsoft Copilot to enhance productivity by providing contextual assistance, automation, and insights
- Design, develop, and deploy AI and ML models to solve complex business problems.
- Drive innovation by applying AI/ML techniques to develop new products and enhance existing solutions.
- Work closely with data engineers, software developers, and business analysts to integrate AI/ML models into production systems.
- Utilize strong programming skills in languages such as Python, R, and Java to develop and deploy models.
- Apply AI/ML frameworks and libraries such as TensorFlow, PyTorch, scikit-learn, and Keras.
- Leverage cloud platforms (e.g., AWS, Azure, Google Cloud) for model training, deployment, and scaling.

■ **Client Engagement, Delivery & Innovation Leadership:**

- Lead end-to-end client engagement from RFP/RFI response through program delivery and steady-state operations across enterprise and public-sector environments.
- Manage Fixed Price, T&M, and Managed Services engagements with structured SLA governance and continuous service improvement.
- Act as trusted advisor to stakeholders, aligning business objectives with technical execution and driving Agile/SAFe adoption where appropriate.
- Drive innovation initiatives across IoT, AI/ML, Data Analytics, and Cloud transformation programs.
- Manage escalations, executive communication, and stakeholder reporting to ensure high customer satisfaction and delivery excellence.

■ **Solution Design, Architecture and Delivery Excellence:**

- Experience in Application Development, System Integration, ERP deployments, and Cloud platforms
- Prepare Solution designs, High-Level Designs (HLD), and Low-Level Designs (LLD)
- Implement DevOps practices throughout the software engineering lifecycle
- Expertise in CI/CD process development using Git, Jenkins, Maven, Gradle

■ **Technical Leadership & Proficiency:**

- Strong technical background with cross-functional team experience.
- Certified Implementation Specialist, specializing in large-scale IT services deployment and integration.
- Proficient in project management tools (Microsoft Project, JIRA) and processes.
- Expertise in tools like Primavera, Confluence, Oracle ESA, PeopleSoft, and ERP/CRM applications.
- Extensive experience in Office Automation tools (MS-Excel, PowerPoint, Word and Email).

■ **Software Development Lifecycle (SDLC), Service Delivery and Managed Services (24x7) Support:**

- End-to-end experience in SDLC, including Requirement Understanding, Analysis, Design, Coding, Testing, Configuration Management, Release Management, Deployment, and Support.
- Aligning IT services with business needs, maintaining high service quality, and continuously improving service performance to drive business value and support organizational goals.

■ **Risk, Issue Management and Change Management:**

- Identify, assess, and manage risks and issues throughout the program lifecycle.
- Develop and implement mitigation strategies and contingency plans to address potential challenges.
- Anticipate, manage change requirements, develop and implement change management plans to ensure smooth transitions and stakeholder adoption.

■ **Operational Excellence (OpEx) Process Improvement, Quality Management & Metrics Implementation:**

- Prepare Quality Management Plan (QMP) to describe how quality will be managed throughout the lifecycle of the project and guide project team to execute quality management, quality assurance and quality control activities for the project or program
- Define and track key product, project metrics to measure success and drive continuous improvement.
- Application of industry best practices and engineering metrics for enhanced project quality.

■ **Transition and Domain Exposure:**

- 6+ Years (End-to-End Transition Management, Solution Design, and Global Process Migration)
- Domain Exposure: Banking, Healthcare, and Insurance — Handled multi-vertical transitions across BFSI, HealthTech, and Claims Operations.
- Domain Exposure: Banking, Healthcare, Insurance, Public Sector, Manufacturing (Industry 4.0), Smart Cities, and Energy & Utilities — with cross-functional exposure in Digital Transformation, AI/ML Integration, and Global Transition Programs.

CERTIFICATIONS, MEMBERSHIPS & TRAININGS

- **PMP Project Management Professional, Certification** (2019, valid till 2028, CertificateNo.2318159)
- **SAFe® 6.0 Agilist – Training Completed (Leading SAFe 6.0)**
- **Certified Scrum Master (CSM), Certification** - Scrum Alliance (2019)
- **Microsoft Azure AI Fundamentals (AI-900, 2024)**
- **Microsoft Azure Cloud Fundamentals (AZ-900)**
- **Prince2® Foundation & Practitioner, Certification** (2015)
- **ITIL Foundation Certificate in IT Service Management, Certification** (2013)
- **PMI Member and North India PMI Chapter Member** (Project Management Institute 2017)
- **Member ProjectManagement.com** (World largest Project Management Community 2017)

TECHNICAL SKILLS AND KNOWLEDGE

Product / Program & AI/ML Technology Stack	• Proficient in Project Management processes and tools like MS Project, Primavera, JIRA, Confluence, Office Automation: MS-Excel, PowerPoint, Word, Email • DevOps: GitHub, Jenkins, Sonar Qube, Maven, CI/CD pipeline building • AI/ML - Scikit-learn, TensorFlow, PyTorch - AI/ML lifecycle governance, model validation, deployment oversight, and production integration.
Engineering Practices:	• Agile Expertise: Led development using Scrum and Kanban methodologies • Automation: Implemented full in-sprint automation and ATDD practices • ITIL/ITSM: Proficient in Incident, Problem, and Change Management processes • Configuration Management: Skilled in version control and system configuration • Security: Adept at addressing and mitigating common security vulnerabilities, experienced with security scanning tools and methodologies • Design Thinking: Solve complex business problems with scalable, resilient technologies
Common Technical Skills:	• Database: Working experience of database (SQL or PL/SQL), good understanding of Big Data, NoSQL/Flat Database. • API /Web Services: experience in Web Services / API, REST Architecture etc. • Familiarity with open source technologies at all levels of application architecture. • Experience in Version Control Software (Clearcase / SVN / CVS / Git)
Cloud & Cyber Security	• Working experience in Multitenant Cloud application development / micro-services architecture and deployments • Good understanding of Cloud platforms and application migration to Cloud platforms ▪ Red Hat OpenShift / Kubernetes (not specific to any one cloud service provider) ▪ Amazon Web Services / Microsoft Azure /Google Cloud Platform • Cyber Security Best Practices - Network Security, Application Security, Information Security, Endpoint Security, Identity and Access Management (IAM), Cloud Security, Vulnerability Assessment, Penetration Testing
Future Fit Skills:	• Agile Delivery, Artificial Intelligence & Machine Learning, Generative & Human Centric AI, IoT/IIoT, Smart Cities, Safe Cities, Digital Twin, Business Analytics, Collaboration, Data Analytics, Design Thinking, Cloud Computing, Digital Awareness, LEAN Techniques & Microsoft Power BI

WORK HISTORY

Company	Designation / Role	Date From	Date To
NEC Corporation India	Associate General Manager (Sr. Technical Program Manager)	Dec' 2021	Till date
- Lead enterprise-scale Data, AI, and Digital Transformation programs across public-sector and regulated environments. - Govern Open Source FIWARE and Azure-based Data Platform Modernization and AI/ML initiatives including architecture validation, roadmap alignment, and operational readiness. - Manage cross-functional delivery teams (80–100 members) across engineering, data, cloud, and business units. - Drive vendor-led deployments, multi-partner coordination, and hybrid delivery execution. - Deliver structured program governance including risk management, executive reporting, SLA/KPI tracking, and compliance alignment. - Generated \$1.5M+ in approved business value through strategic proposals and transformation initiatives. - Managed enterprise programs with annual budget ownership of up to \$5M across multi-vendor, cross-functional delivery environments.			
Larsen & Toubro (L&T) InfoTech Ltd.	Associate Director	Nov' 2015	Dec' 2021
- Directed large-scale digital modernization and enterprise application programs across Enterprise, BFSI, Public Sector and global clients. - Led transition and migration programs including cloud adoption and system integration initiatives. - Managed multi-geography delivery teams and fixed-price, T&M, and managed services engagements. - Achieved 12% cost savings on \$6M procurement through strategic negotiation and delivery optimization. - Improved delivery efficiency by 35% through process re-engineering and automation initiatives.			
3i Infotech Ltd.	Senior Manager / Program Manager	June' 2012	Oct' 2015
- Delivered enterprise IT and application transformation programs for Global clients. - Managed end-to-end SDLC execution including planning, integration, risk mitigation, and stakeholder governance. - Strengthened service delivery frameworks and SLA adherence across managed service portfolios.			
Tata Consultancy Services (TCS) Ltd.	Assistant Consultant / Project Manager	Aug' 2011	June' 2012
3i Infotech Ltd.	Associate Manager / Project Manager	Dec' 2007	Aug' 2011
JIET Group	System Administrator	May' 2003	Nov' 2007

ACADEMICS

- Master of Computer Applications (MCA), MakhanLal Chaturvedi National University, Bhopal
- Post Graduate Diploma in Computer Applications (PGDCA), MakhanLal Chaturvedi National University, Bhopal
- DOEACC A Level Diploma, NIELIT, New Delhi
- Bachelor of Science (BS) in Electronics, Jai Narain Vyas University, Jodhpur

ACHIEVEMENTS

- Business Value Addition: **Secured approval for multiple proposals, generating over \$1.5 million in value this fiscal year.**
- Procurement Negotiations: **Led negotiations totaling \$6 million+, yielding 12% cost savings.**
- Quality Compliance: **Maintained 100% adherence to QMS standards, including perfect PCI compliance.**
- Employee Engagement: **Achieved 100% engagement score; developed and implemented action plans to further improve team morale.**
- Resource Optimization: **Increased efficiency by 35%, resulting in Customer Satisfaction Score of $\geq 4.5/5$.**
- **Automation Implementation:** Initiated automation projects, leading to 7% resource optimization with ongoing benefits.
- **Outcome-Based Benefits:** Delivered tangible business benefits to customers, enhancing delivery excellence.
- **Talent Development & Personnel development:** Mentored team members and implemented rotation plans to nurture diverse skills and capabilities.
- **Operational Excellence:** Planned and executed service and process improvements, boosting operational efficiency.
- **Successful organizational design:** strategic hiring, performance and compensation management, training & developing team capabilities and growing practice skillsets.
