Summary

A Java Programmer with 3.4 years IT experience in JAVA application development in Banking Domain and Financial Domain.

- Java development skills using J2EE, Servlets, JSP, JDBC, Spring Core, Spring MVC, Spring Boot & Micro services, HTML 5, CSS3, JavaScript, Angular 14, REST Web Services, Maven, Gradle, Extended JavaScript
- Good understanding of object-oriented programming and MVC architecture.
- Excellent communication and interpersonal skills who can work independently under pressure.

Experience

Olive Crypto System pvt ltd | Hyderabad, Telangana

Java Developer SDE | 01/2022 - 01/2023

Key Achievements and Responsibilities:

- Developed and maintained Java-based applications, demonstrating proficiency in Java programming.
- Leveraged Spring Boot framework to build scalable and efficient software solutions.
- Designed and implemented robust, secure, and high-performance software systems.
- Participated in code reviews to ensure code quality and adherence to coding standards.
- Conducted unit testing and debugging to identify and resolve software defects.
- Contributed to the documentation of software designs, technical specifications, and user manuals.
- Worked on UPI-Wallet, Kotak UPI, Batch Processing, Event Ticketing module in Mobile Assist platform.

Project1

Olive Crypto System pvt ltd

Project Name : UPI-PPI WALLET

- Technologies: Spring Boot, MySQL, Core Java
- Clients: Dhani Finance Co. & Paul Merchant
- Description: UPI-PPI Wallet is a Preapproved transaction and there is no Core banking system. When the transaction is initiated then the amount will be debited and NPCI will give direct credit to the corresponding customer or merchant.

Project 2:

Project Name: Kotak UPI Project

- Technologies: Core Java, Spring boot, Hibernate, REST API, Oracle
- Description: Developed and implemented Kotak UPI banking financial project, a robust solution for Kotak Bank based on the Unified Payments Interface (UPI). Collaborated with cross-functional teams to gather requirements, design system architecture, and develop secure Java based applications. Implemented banking functionalities such as fund transfers, bill payments, and balance inquiries, ensuring compliance with banking regulations and security standards. Designed and integrated RESTful APIs for seamless interaction with third-party payment gateways and financial institutions. Utilized Java frameworks (Spring Boot, Hibernate) for efficient development and maintenance. Conducted rigorous testing, debugging, and code reviews for high-quality deliverables. Assisted in deployment, performance tuning, and optimization. Stayed updated with industry regulations and emerging technologies for continuous improvement.

Yagna Tech pvt ltd | Hyderabad, Telangana
Java Developer | 03/2023 – 11/2023

Key Achievements and Responsibilities:

- Developed and maintained Java-based applications, demonstrating proficiency in Java programming.
- Designed and implemented robust, secure, and high-performance software systems.
- Worked on Spring Security, Event Ticketing Module Batch Processing, Stripe payment gateway, e-wallet.

Project Name: Mobile Assist

Yagna Tech pvt ltd:

Module Name: Event Ticketing Module.

- Technologies: Core Java, Spring Boot, REST API, MongoDB, Extended JavaScript, React Js.
- Description: Event Ticketing is module of Mobile Assist platform in its Commercial customer can create events and end user see events can purchase tickets by using visa card, master card or Mobile Assist wallet token after purchase tickets QR generated with tickets details and end user can carry virtual ticket to event location.

Rigved Technologies pvt ltd | Mumbai, Maharashtra.
Java Developer | 02 Jan 2024 – 30 July 2024

Key Achievements and Responsibilities:

- Collaborated with cross-functional teams to integrate front-end and back-end functionalities, ensuring seamless user experience.
- Developed and maintained Java-based applications, demonstrating proficiency in Java programming. Designed and implemented robust, secure, and high-performance software systems.
- Worked on Spring Security, spring scheduler, Angular 14, TCP/IP, Html, CSS, TypeScript.
- Implemented farmer registration screen, payment report, android services, warehouse and go down for state level Agency screen with backend development in spring boot and angular.
- Conducted code reviews and contributed to continuous integration and deployment processes to maintain code quality and ensure timely delivery.
- Resolved technical issues and optimized performance to meet project requirements and deadlines.

Project Name: E-Samridhi

- Technologies: Core Java, Spring Boot & Microservices, REST API, JDBC, PostgreSQL.
- Description: e-Samridhi stands as the cornerstone of NAFED's mission towards India's self-sufficiency in oilseeds and pulses, epitomizing progress, and efficiency. This Aadhaar-based verification platform guarantees seamless operations, facilitating everything from registration to direct payments. By promoting transparency and traceability for farmers, it enhances their experience and ensures a more efficient procurement process.

Onnet System India pvt. Ltd. | Bengaluru, Karnataka.
Client Name: IPTV Skypro
Full Stack Java Developer | Aug 2024 – December 2024

Key Achievements and Responsibilities:

- Collaborated with cross-functional teams to integrate front-end and back-end functionalities, ensuring seamless user experience.
- Developed and maintained Java-based applications, demonstrating proficiency in Java programming. Designed and implemented robust, secure, and high-performance software systems.
- Worked on Spring Security, spring scheduler, Angular 14, TCP/IP, Html, CSS, TypeScript.
- Implemented farmer registration screen, payment report, android services, warehouse and go down for state level Agency screen with backend development in spring boot and angular.
- Conducted code reviews and contributed to continuous integration and deployment processes to maintain code quality and ensure timely delivery.
- Resolved technical issues and optimized performance to meet project requirements and deadlines.

Project Name: Skypro IPTV**Technologies: core Java, Spring boot, Microservice, Angular 14, PostgreSQL, RESTful Web Services****Description:** Skypro TV is an IPTV application offering live streaming of multilingual channels, enhancing the entertainment experience. The service operates seamlessly with the Skypro Network. Key contributions include:

- **Set-Top Box (STB) Management:** APIs for creating, updating STBs, and managing channel subscriptions.
- **Payment Integration:** Integrated Easy Buzz for secure and efficient payment processing.
- **Customer Service Chatbot:** Developed an end-user chatbot enabling direct channel subscriptions and payments, enhancing user convenience. This project focuses on delivering a streamlined live TV and customer service experience.

Protean e-Governance Technologies pvt ltd. | New Delhi

Full Stack Java Developer | Apr-2025 – Present.

Key Achievements and Responsibilities:

- Collaborated with cross-functional teams to integrate front-end and back-end functionalities for a seamless user experience.
- Developed and maintained Java applications, implementing secure, high-performance software using Spring Boot and Angular 14.
- Worked with Spring Security, Spring Scheduler, TCP/IP, HTML, CSS, and TypeScript.
- Delivered key features including farmer registration, payment reports, Android services, and state-level agency screens.
- Conducted code reviews and supported CI/CD pipelines to ensure code quality and timely delivery.
- Troubleshoot technical issues and optimized application performance to meet project goals.

Project Name: Agristack Project**Technologies: Core Java, Spring Boot, Microservices, Angular, PostgreSQL, AWS.****Description:** Worked on the AgriStack platform, focusing on supporting registry management and network administration functionalities. Developed backend microservices using Spring Boot to deliver scalable, secure APIs and collaborated with the front-end team to implement user-friendly interfaces using Angular. Ensured seamless integration and efficient management of agricultural data systems.

- Developed and supported AgriStack, focusing on registry management and network administration.
- Built and maintained backend microservices using Spring Boot, ensuring scalable and secure APIs.
- Collaborated on front-end development with Angular to provide a user-friendly interface for registry and network management functions.

Technical Skills:

Core Java, Spring Framework 5.3, Spring Boot, Microservices, HTML5, CSS3, JavaScript, Angular14, React.Js MySQL, PostgreSQL, MongoDB, Maven, Gradle, Apache Tomcat 9, Hibernate, JPA, RESTful Services, SOAP Services, Jenkins, Eclipse-IDE, VS-Code, JDBC, Servlet, JSP, jQuery, Extended JavaScript.

Education

S.B.City College Nagpur From RTMNU University | Nagpur, Maharashtra
Bachelor of Commerce & Computer Application | 05/2019

VMV Science College Nagpur | Nagpur, Maharashtra
12th Science | 05/2014
