14+ Yrs

Investment Banking Domain

CORE COMPETENCIES

Product & Delivery

Product Vision & Roadmap Ownership . Agile / Scrum . Backlog Management & Prioritisation . User Stories & Acceptance Criteria . Sprint Planning & Retrospectives . Definition of Done (DoD) & Definition of Ready (DoR) . UAT & Release Management . Go-to-Market Planning . Product Discovery . OKRs & KPI Tracking

Domain & Compliance

KYC / AML . FINRA Compliance . AIFMD . Regulatory Compliance . Digital Onboarding . Investment Banking Operations . Fund Accounting & NAV . Risk & Controls . Process Re-engineering

Tools & Technology

JIRA . Confluence . Azure DevOps . SQL . Power BI . Miro . SharePoint . Microsoft Excel (Advanced) . MS Teams . API Integration . User Journey Mapping

Leadership & Soft Skills

Stakeholder Management . Cross-Functional Collaboration . Voice of Customer (VoC) . MoSCoW Prioritisation . WSJF Framework . Executive Reporting . Conflict Resolution . Team Leadership

PROFESSIONAL EXPERIENCE

Product Owner (Senior Business Execution Consultant)

Jun 2020 – Present

Wells Fargo EGS India Pvt. Ltd. | Bengaluru

Product Highlights

- \$4M revenue-generating product initiative (FY2025):** Owned the full product lifecycle from vision and roadmap through backlog definition, sprint execution, API integration sign-off, and go-live — delivering measurable business value within a regulated BFSI environment.
- Digital transformation leadership:** Drove end-to-end product strategy for a workflow digitisation initiative; defined epics, user stories, and acceptance criteria in JIRA, aligned roadmap to OKRs, and facilitated cross-functional discovery workshops using VoC inputs and stakeholder co-creation sessions.

- **Compliance-by-design:** Embedded KYC/AML, FINRA, and regulatory data-flow requirements directly into the product backlog, ensuring zero compliance rework at UAT and release stage — a critical capability for BFSI product delivery.

Core Responsibilities

- Led all **Agile / Scrum ceremonies** — sprint planning, daily standups, backlog refinement, sprint reviews, and retrospectives — maintaining cadence, velocity tracking, and **Definition of Done (DoD) and Definition of Ready (DoR)** standards across multiple concurrent workstreams.
- Managed a prioritised product backlog of **100+ user stories** applying **MoSCoW and WSJF** frameworks to maximise business value per sprint; maintained full traceability from epic to story to acceptance criteria.
- Acted as single point of accountability for **product quality and UAT**: planned test scenarios, coordinated UAT cycles, tracked defects in JIRA, and signed off releases against defined KPIs — reducing post-release defect rate significantly.
- Partnered with business, technology, UX, and compliance stakeholders to align on product priorities, resolve cross-team dependencies, and maintain delivery velocity without compromising **regulatory standards**.
- Defined and reported **product OKRs, KPIs, and sprint metrics** to senior stakeholders; used **Power BI dashboards** and data analysis to make **data-informed backlog prioritisation decisions** and feed post-release performance insights back into future roadmap planning.
- Facilitated **product discovery** workshops with business, UX, and VoC inputs — mapping customer journeys, validating assumptions, and shaping go-to-market readiness for each release increment.
- Collaborated with engineering on **API integration** user stories and data-flow specifications, applying technical product knowledge to write precise acceptance criteria that eliminated ambiguity during development.

Associate Manager — Digital Onboarding & Fund Operations

Jun 2015 – Jun 2020

State Street HCL Services | Bengaluru

Product & Process Leadership

- Shaped the **end-to-end client onboarding product lifecycle**: led KYC/AML journey design, defined SLAs and process requirements, and drove process re-engineering initiatives that measurably improved SLA adherence for institutional clients.
- Designed and delivered **KPI dashboards and management reporting** (Power BI / Excel) to give leadership real-time visibility into onboarding pipeline health, compliance status, and throughput — a direct precursor to product analytics ownership.
- Led a **cross-functional team of 6+** spanning operations, compliance, and technology; coordinated stakeholder requirements, managed escalations, and delivered onboarding outcomes within regulated **AIFMD** fund environments.
- Authored detailed **process documentation and system enhancement specifications** to support technology teams in implementing onboarding workflow improvements with precision and minimal ambiguity.
- Conducted **exception analysis** and root-cause investigation on onboarding breaks; implemented systemic process fixes to drive continuous improvement across the onboarding funnel.
- Managed fund accounting operations including **NAV calculation, FX validation, and Mark-to-Market valuations** for AIFMD-regulated funds, building the regulatory compliance and investment operations expertise that underpins product decision-making at Wells Fargo today.

Operations Analyst — Reconciliation & Reporting

Aug 2011 – Jun 2015

JP Morgan Services India Pvt. Ltd. | Bengaluru

- Built foundational **investment banking expertise** across cash and position reconciliation for Pension and Mutual Funds using TLM, Cosmic, Titan, Bloomberg, and Citrix — resolving daily breaks within strict SLA timelines.
- Contributed to a **reconciliation process improvement initiative** that identified systemic breaks across the trade lifecycle, implemented targeted fixes, and measurably reduced exception volumes — an early demonstration of a product and problem-solving mindset.
- Managed **regulatory reporting and internal audit queries** for global investment banking clients, collaborating with onshore and offshore counterparts to ensure accuracy and compliance within SLA timelines.
