Professional Summary

ServiceNow ITSM professional with almost 5 years of hands-on experience in Platform Support, Administration, and Development. Skilled in configuring and customizing ITSM modules, building Service Catalog workflows, developing automation using Flow Designer and scripting, and supporting platform operations.

Core Competencies

Platform Administration:

Users, Groups, Roles, ACLs, Update Sets, CMDB, Notifications

ITSM Expertise:

Incident, Problem, Change, Knowledge, Service Catalog, flow Designer

Development Skills:

JavaScript, Business Rules, Client Scripts, UI Policies, Flow Designer, Integrations (Rest/Soap), PowerShell Script

Support Skills:

L1-L3 Support, RCA, Troubleshooting, Documentation

Professional Experience: HCL Tech (Nov 2021 – July 2026)

ServiceNow Support Engineer / Admin / Developer

Project: RBI (4.8 years)

- Provided **end-to-end administration and support** for core ITSM processes including Incident, Problem, Change, CMDB, and Service Catalog.
- Performed **root cause analysis (RCA)** for recurring issues and coordinated with technical teams to implement permanent fixes.
- Created and optimized **Service Catalog items**, variables, and variable sets, integrating them with **Workflows, Flow Designer**, and **integration spokes**.
- Designed and implemented **Business Rules, Client Scripts, Script Includes, Access Controls (ACLs)**, and UI customizations to enhance platform functionality.

- Developed **custom UI Pages, UI Actions, and UI Policies** to streamline user interactions and automate processes.
- Managed **priority/severity-based ticket queues**, ensuring SLA compliance and timely resolution across L1–L3 tickets.
- Maintained **CMDB accuracy** through discovery validation, reconciliation, CI class updates, and dependency mapping
- Implemented **role-based access control (RBAC)** ensuring secure and compliant user/role configurations.
- Built and maintained **data import sets, transform maps**, and scheduled jobs to automate data loads into the platform.
- Performed **ServiceNow version upgrades**, including impact analysis, UAT, and post-upgrade remediation.
- Documented **technical specifications, knowledge articles, and SOPs**, improving support efficiency.
- Provided **user training and knowledge transfer sessions** to enhance end-user adoption and reduce operational load.
- Created **custom reports and dashboards**, giving leadership real-time visibility into operational KPIs.
- Partnered with process owners to continuously improve ITSM workflows and eliminate manual activities.
- Collaborated with cross-functional teams (Infra, Security, DevOps) for seamless integration and process alignment.
- Developed and maintained scripted REST APIs for custom integrations.
- Designed and implemented **REST API integrations** with external systems to automate workflows and data exchange.
- Configured and extended **CMDB** with discovery and service mapping to support ITOM.
- Configured and managed **ITSM** and **ITOM** modules including Incident, Change, Problem, and Discovery.

Technical Skills

Tools: ServiceNow, Power shell, Integrations, Jira, Active Directory, Okta, Collab

Education

Bachelor of Technology (B-Tech)

Certification

CSA (Certified System Administrator)

CAD (Certified Application Developer)

ServiceNow **Micro-Certified professional** with knowledge of specialized ServiceNow platform capabilities, configuration practices, and implementation best practices.

Applied ServiceNow **Micro-Certification knowledge** to enhance ITSM/ITOM workflows, automation, integrations, and platform administration activities.
