SUMMARY

Certified Professional with 8+ years of experience across Telecommunication and Enterprise environments, specializing in device migration, implementation, and network security.

EXPERIENCE

Network Engineer

Cisco system (LTI mindtree) | Bangalore | Jan 2025-Current

- Working as a Network Enterprise Engineer at Cisco, supporting the Morgan Stanley enterprise network infrastructure.
- Led network device refresh projects for Morgan Stanley, replacing legacy switches with new-generation Nexus, Catalyst, and Arista switches across enterprise and data center environments.
- Performed configuration analysis and migration from legacy platforms to new switches, ensuring feature parity, and compliance with enterprise standards.
- Hands-on experience with Cisco Nexus (9K/7K) and Catalyst (9K/3K) platforms for core, distribution, and access layers.
- Administer and manage Palo Alto Networks firewalls (PAN-OS) across enterprise environments, ensuring high availability and security compliance
- Deploy and support GlobalProtect VPN for secure remote access, including troubleshooting connectivity and implement and manage IPSec site-to-site VPNs and ensure secure communication between branch offices
- Configured and managed High Availability (HA) Active/Passive and Active/Active setups on Palo Alto firewalls to ensure zero/minimal downtime

Sr. Network Engineer

Tata communications | Chennai, India | May 2023-Dec 2024

- Planning and preparing the MOP, SOP, and performing the change management activities of the BNG internet gateway and MPLS core links.
- Configure and deploying designed network solutions at ISP Gateway level within IP Routing, MPLS/BGP environment. (Uplink and downlink)
- Configure and maintain the EBGp routing protocol in BNG to advertise broadband users' routes to the Internet gateway.
- Configuring and maintaining the DHCP, PPPoE, and IPoE protocols for establishing broadband subscriber sessions in BNG.
- Configuring and troubleshooting networking technologies, including MPLS, L2VPN, VRF, and BGP, OSPF protocols, working within an ISP/Telecoms service provider environment. (Multi-vendor scenario) Having good working experience in Cisco ASR9000, NCS540, ASR900, Juniper MX960, MX460, Nokia 7750, and IXRE device.

Executive in NOC IP Core Network

Bharti Airtel | Chennai, India | May 2019-Apr 2023

- Planning, Configuring, and testing the Broadband-related New Data and P2P services. Maintaining the Network Traffic Utilization Report and Optimizing the Traffic Utilization based on the Network Capacity.
- Performing the network switchover activities and ensuring redundancy in the core and aggregation links. Coordinating with multiple third-party network teams to implement the new NNI and aggregation links to the new location implementation.
- Providing excellent change management support and timely closing the activity on the given outage window.

Network Engineer

- Atria Convergence Technologies Private Limited | Chennai, India | Sep 2016-Nov 2017 Configuring and troubleshooting Wireless modems, Extenders and Y/iFi routers
- Planning and implementing the network connectivity using copper and fiber cables (4F and 12 and 24F) Detecting fiber cable network outages using OTDR and generating the fault reports
- Providing the support to the backend NOC technical team to resolve nodes hardware outages
- Maintaining the Area cluster rooms with Proper power backup sources and Temperature control with help of infrastructure maintenance Team

ACCOMPLISHMENTS

Have successfully managed large telecommunication network 5G integration projects under tight deadlines throughout project life cycle resulted in achieving target timely

EDUCATION

Computer Science

NCP MPL Higher secondary school | Dharapuram | Mar 2014

Diploma in Electronics & Communication Engineering

NachiMuthu Polytechnic College | Pollachi | Apr 2016

CERTIFICATIONS

Cisco Certified Network Associate (CCNA 200-125) Cisco ID - CSC013461014)
