

## Guru Swamy

Network Engineer

9632173598, guruswamy3344@gmail.com

Current Location: Bangalore Karnataka, India

Total 7 Years 8 months of experience in network monitoring, planning, implementation, and maintenance of medium and large-scale networks in Telecom Sector Technical Skills

Switching Cisco 2960,9200,9300, XR540 XR 5k, Huawei NE40, ME60, 1800,2600,2800,3800, Dell switch 5420.

Routing: EIGRP, OSPF, BGP, Redistribution, Summarization, Static routing.

Firewall and Load balancers: FortiGate, Wireless (Huawei and Aruba 3K)

IPSEC, Palo Alto,HTTP, F5 Big-ip ASM, LTM,.

Protocols: IP, TCP, UDP, ICMP, NAT, DHCP, SNMP, IPSEC, SSL, HTTP, SSH, DNS, NAT.

AAA Architecture: TACACS, RADIUS

Network Monitoring and Management Tools: Wireshark, Solar, Cacti, ITSM ,SFDC and ServiceNow.

## Work History

2025-12 to Till

### Network Engineer – HPE / Mellanox Switches

- Designed, configured, and supported HPE Mellanox Ethernet switches (SN series) for high-performance data center and backend networks.
- Hands-on experience with Mellanox Onyx & Cumulus Linux OS, including switch provisioning, firmware upgrades, and configuration management.
- Implemented and maintained L2 networking: VLANs, LACP, MLAG, STP, VRF.
- Configured high-throughput, low-latency networks supporting HPC, AI/ML, and storage fabrics.
- Performed network troubleshooting and root cause analysis using CLI, logs, port counters, and telemetry tools.
- Managed switch monitoring and performance optimization, including ECN, buffer tuning, and QoS policies.
- Integrated Mellanox switches with servers, NICs, InfiniBand/Ethernet fabrics, and storage solutions.
- Supported firmware lifecycle management, patching, and compliance across production environments.
- Collaborated with data center, server, and storage teams to ensure high availability and redundancy.
- Worked on break/fix support, incident management, and preventive maintenance for critical network infrastructure.
- Documented network designs, configurations, and operational procedures to improve support efficiency.

- Configured Load Balancing methods such as Round Robin, Least Connections, Ratio, etc.
- Implemented SSL offloading and SSL termination to improve application performance
- Worked on Health Monitors (HTTP, HTTPS, TCP, ICMP) for server availability
- Troubleshooting issues using tcpdump, logs, and F5 diagnostic tools
- Analyzed traffic flow and resolved issues related to connectivity, latency, and failover
- Health monitored system using F5 GUI, CLI, and SNMP tools
- Configured and maintained Active-Standby HA setup
- Performed failover testing and synchronization between devices
- Managed device trust, sync groups, and failover configuration
- Experience in firmware upgrades and patch management
- Backup and restore of UCS and configuration files

2023-07 to 2025-12

## Senior Network Engineer

- **Larsen & Toubro Limited, Bengaluru, India.**
- **F5 Load Balancer** ▪ Performing upgrades on LTM.
  - Virtual IP configuration in BIG IP F5 LTM (configuring pools, virtual IPs, SSL profiles, health monitors, Persistence & SNAT).and SSL certificate renewal.
- ▪ Migration of hardware on same and different platforms.
  - Providing technical assistance to the team in configuring F5 in LTMs by creating profiles, defining Load balancing algorithms, SSL bridging, implementing SNAT and troubleshooting with the help of TCP dumps. ▪ Joining bridges and troubleshooting latency networks by capturing packets using TCP dumps.
  - Fine tuning TCP and http profile based on application requirement.
  - Implementing the WAF policies as per the app team request.
  - Monitor the traffic learning setting and check the event logs and score to finetune WAF policy.
- L2/L3 senior Telcom network support engineer for Radisys E2E R&D Lab.
- Switch network L2 and L3 bring up from the scratch. IOS upgrade, Vlan configuration and making the switch enable for Telcom data communication.
- GnodeB-CU, DU, 5G core, EMS, server deployment and integrating through the configured network switches. Enabling Front-Haul, Back-Haul and MidHaul.
- Deploying the Realtime 5G RUs and integrating with GnodeB' s.
- Network switches and protocol handled.
- Cisco-9300, Dell 5842 10/25G L3, Edgecore 10/25. Dynamic, default routing, BGP, OSPF, EIGRP.
- Upgrades: Continuous upgrading the network switches and systems and keeping them up to date.
- IOS upgrade for all the Linux based GnodeB as per the user requirements. ▪ Implementing Tls for LLS-C1 Profile and LLS-C3 profiles based on the user Requirements.
- Port mirroring & TCP, UDP dump for trouble shooting and network analysis.

- Using Cisco 9200 ,9300 Edge core 5835, Dell 5420 L3 switch,
- Configuring and enabling the Fibro LAN switch for the PTP clock sync.
- GnodeB-CU and DU integration for Mplane, Cplane, Splane provisioning according to the customer requirements.
- Providing the PPT presentation to the management on monthly basis
- about the number of Jira tickets, closed, open status.

2021-04 2023-07

## Network Engineer

**Cisco Systems, Inc.payroll Glow Network Pvt Lmt., Bengaluru, India**

- Bring up of CSR router NCS540.NCS5500 from the scratch.
- Technical issue and analysis post bring up of routers.
- Working with Cisco Global Dish Wireless Network for Provisioning of CSR in Mass Scale Team.
- Creating and updating the MoP's for the deployment of NCS540.NCS5500.
- FAQs for troubleshooting the known types and unknown types of ZTP Failures.
- Hands on experience on Cisco IOS-XR.
- BGP peer group and creating router policy and applying under BGP Re-originate attribute using Re direct path.
- Using the automated tool to push the configuration to each stipulated site ID
- and analyse the performance of the pushed configuration. BPA & TAF tool.
- **Configuration & Deployment, Wireless Network Management, Security & Compliance, Troubleshooting & Support, Performance & Impact**

2018-07 - 2021-04

## Network Engineer

**Huawei Technologies Ind Pvt Lmt., Bengaluru, India**

- Configuration IP routing, static and dynamic routing with various routing protocols RIP, EIGRP, OSPF and BGP.
- Planning, designing and implementation of network projects.
- Managing coordination with ISP for network related issues & raising the tickets according to the issue.
- Configuring/installing/troubleshooting of various Cisco routers. ▪ Managing and troubleshooting and Maintain VoIP U1981 all over India.
- IBGP we are troubleshooting like ODC Delhi and Bangalore.
- Configuration and troubleshooting VLANs.
- Responsible for maintaining and monitoring network connectivity ▪ CACTI.
- Coordination with ISP for Wan link issue airtel, Tata, Vodafone and MPLS.
- Responsible for all IT network related change plan and incidents.
- Responsible for closure of incident log region within SLA.
- Providing the network establishment for could base datacentre.
- Routing protocol like RIP, EIGRP, BGP and static routing.
- Good knowledge on spanning-tree security future BPDU filter, BPDU filter and port fast.
- Backup and Upgradation of iOS on Cisco router and catalyst switches.
- Improvement meaning Distribution and access layer switches.
- Migration activity green zone to blue zone network both data, Wi-Fi and Voip analog phones.

- VoIP: Handling overall IDD, DDD, IST calls from internet calls to GSM mobile calls.

## Education

2014-05 - 2017-07

**B.E: Electronics and Communications Engineering (ECE).**

*Bangalore Institute of Technology - Bengaluru, India*
