TECHNICAL EXPOSURE

Project #2

Project Name: Synterein

Duration: June 2024 to Till date

Role: Team Member / Power Apps Developer

Environment: Power Apps, Power Automate, SQL Server 2012, Power BI

Description:

Synterein application is an inventory database and HSE request system in a Basic Steel Company. It enables SABIC employees to raise and track protection equipment requests. The system includes workflows for approvals from department heads and Safety teams, along with reminders for pending requests.

Responsibilities:

- Involved in complete application development life cycle including requirements gathering, analysis, design, development, testing, and deployment
- Built Canvas Apps for request submissions, approvals, and tracking at department level
- Automated approval workflows using Power Automate
- Connected CRM data with Power Apps for real-time updates
- Designed and developed custom workflows and visual web parts
- Created role-based security (RLS) to control access to reports and datasets
- Developed Event Receivers and Timer Jobs
