Profile

Java Backend Developer with 5 years of experience in backend development, microservices architecture, and scalable web applications. Strong expertise in Java, Spring Boot, RESTful APIs, Oracle, and MySQL. Hands-on experience with JWT authentication, Spring Security, CI/CD pipelines, and backend performance optimization. Skilled in Agile/Scrum methodologies, system design, and cross-functional team collaboration to deliver reliable, high-performance software solutions.

Skills

Languages/Framework: Java 8, Spring Boot, JPA, Microservices, Spring, Java Collection, json, Oracle ADF

Database: Oracle, MySQL

Application/Web Servers: Nginx, Weblogic, Apache Tomcat

Tools & Technologies: IntelliJ, Eclipse, Visual Studio Code, Oracle SQL Developer, Git, SourceTree, Maven, Jira, Postman

Other Skills: RESTful APIs, Jenkins, CI CD, Mockito/Junit, jsp servlets, Data Structure, Spring Security, JWT

Experience

Capgemini

June 2025 – Current

Consultant

Pune, Maharashtra

- Working on enterprise-grade microservices development using Java, Spring Boot, and REST APIs.
- Contributing to CI/CD pipeline enhancements and automated deployment using Jenkins.
- Actively involved in production support, issue resolution, and optimization of backend systems.

Nile Technologies

March 2021 – May 2025

Software Developer

Noida, Uttar Pradesh

- Led the development of high-performance backend services using Java, Spring Boot, and Microservices, contributing to a 20% improvement in invoice processing speed and system reliability.
- Implemented RESTful APIs to facilitate seamless communication between various modules of the application.
- Automated invoice validation workflows, eliminating the need for physical submissions and accelerating processing timelines.
- Resolved complex technical issues and bugs, ensuring timely delivery of high-quality software products.
- Contributed to the entire software development life cycle, from conceptualization to deployment and maintenance.

Projects

Invoice Digitization | Core Java, Spring Boot, JPA, React, JavaScript, Oracle

Client – Bharti Airtel Ltd.

Url – <https://partners.airtel.in/partner/ui/login>

- Spearheaded the development of scalable backend services using Java, Spring Boot, and Microservices architecture to digitize invoice processing for Airtel's finance operations.
- Deployed microservices to cloud environments, ensuring scalability, availability, and streamlined CI/CD workflows.
- Optimized Oracle SQL queries and schema design for efficient data storage and fast retrieval.
- Wrote comprehensive unit and integration test cases using JUnit and Mockito to ensure code quality and reliability.

ProH2r | Core Java, Spring Boot, Hibernate, Angular, JavaScript, Oracle sql

- Worked on User Authentication (Multi factor Authentication and Password complexity rules) for a high priority project using Spring boot.
- Worked on fixes for high priority production level bugs.

Education

JP Institute of Engineering and Technology

2016 – 2020

B.Tech in Computer Science Engineering

UP, India
