
Professional Summary

- Seasoned Engineering Leader with more than **15 years** of experience in Software, Mobile and AI-driven application development across Banking, Telecom, Infotainment Industries.
- **2 years** in Generative AI, specializing in AI-driven application development, Agentic AI Solutions, LLM orchestration, and cloud-native architectures.
- Proven expertise in leading cross-functional teams to deliver scalable, secure, and innovative solutions.
- Adept at driving digital transformation initiatives, enhancing user satisfaction, and ensuring compliance with regulatory standards.
- Skilled in Agentic AI Solutions, Agentic Architecture, Technical Project management, Mobile architecture, and mentoring teams to achieve strategic objectives.

Achievements

- Developed AI Agentic and multi agent Orchestration solutions using CREW AI, Lang Graph.
- Developed RAG system using Lang Chain, FAISS.
- Increased Barclays Mobile App rating from **2.7 to 4.8**, significantly improving customer engagement and satisfaction.
- Boosted revenue by **35-40%** of Barclays Mobile Application.
- Played a key role in the organization's Mar Tech initiative.
- Successfully led onsite and offsite teams for Bell Canada.
- Spearheaded cloud-native application design, enhancing scalability and reliability.

Core Competencies

- AI/ML Integration and Innovation
- Generative AI & LLM Application Development
- Digital Transformation Strategies
- Mobile & Cloud Architecture
- Stakeholder Management and Strategic Planning
- Cross-Functional Team Leadership

Key Skills

- Programming Languages : Python,Kotlin,Java
- IDE: : Visual Studio Code,Cursor,Android Studio
- Agentic AI Frameworks : LangGraph,Crew AI,Agno, Google ADK
- Protocols : Model Context Protocol (MCP), Google A2A
- ML/DL Frameworks : TensorFlow,Pytorch
- LLMs : LlamaIndex,OpenAI,Deepseek
- Vector Databases : FAISS,Chroma DB
- LLM App Orchestration : LangChain
- AI Monitoring : LangFuse

- Generative AI : GANs, Transformers, RLHF
 - Cloud Platforms : Firebase, Google Cloud, Adobe
 - Functional Skills : Agile, Team leadership, Stakeholder Engagement
 - Project Mgt. Tools : JIRA, Confluence
 - Security : DexGuard, Arxan, Veracode
 - Version Control : Git
 - CI/CD Tools : Jenkins, Bit Bucket
-

Professional Experience

AI Consultant

Apr 2024 -Present

RAG-Based Offer Eligibility Assistant

Tech Stack: Python, Lang Chain, FAISS, Fast API, Internal APIs

- Developed a Retrieval-Augmented Generation (RAG) system to evaluate customer eligibility for Martech offers in a financial services environment.
- Fetched structured and semi-structured KYC data from internal systems via secure APIs and stored context as vector embeddings for efficient semantic search.
- Used Lang Chain to generate grounded, explainable eligibility decisions based on business logic and regulatory criteria.
- **Achieved a 40% reduction in manual KYC evaluations and improved offer targeting precision by 25%.**
- Integrated the system with internal marketing workflows and dashboards for real-time usage by business teams.

Assistant Vice President - Cards Platform

Barclays Bank

Oct 2020 –Mar 2024

This role at Barclays showcases my leadership in digital transformation, mobile app development, and collaboration across diverse teams to achieve strategic goals.

- **AI-Powered Conversational Chatbot:** Developed a chatbot using NLP and machine learning that can understand and respond to user queries related to Send cash and Balance Transfer.
- **AI-Driven Recommendation System:** Designed and implemented a recommendation system using Adobe Sensei that can suggest Various Offers to Credit Card customers based on their preferences and Customer Behaviors.
- Spearheaded the development of the USCB Cards Mobile Application, contributing to the digital transformation.
- Led architectural design and development, Platform Engineering Capability, enhancing scalability and user engagement
- Engineered Customer Offer, KYC and Balance Transfer features, achieving a 35-40% increase in revenue.
- Enhanced scalability and user engagement, improving app ratings from 2.7 to 4.8.
- Spearheaded cloud-native application design, ensuring high scalability and availability.

- Ensured strict compliance with regulatory standards by prioritizing data security

Technical Lead

Tech Mahindra

Sep 2016 - Jun 2020

- Led Onshore & offshore development teams for telecom clients, delivering high-quality software and mobile application solutions.
- MVM (My Virgin Mobile – Bell Canada): developed a self-serve Android app enabling Virgin Mobile customers to manage accounts efficiently.
Coordinated with product owners, Scrum Masters, and technical architects for deliverables. Network Fleet (Verizon LLC):
- Enhanced features like MapQuest Upgrade, 64-bit support, and rebranding for Network Fleet Manager and Driver Applications.

Senior Engineer - Product Development

Harman Connected Services (A SAMSUNG Company)

Apr 2014 - Jun 2016

- Designed connected car/infotainment applications for Automotive clients.
- Built the Contacts and Call Module for infotainment systems, synchronizing data for clients like Visteon and Harman International.
- Room Book Scheduler (Client - AMX): Developed an Android Application for meeting room bookings, integrating Google Calendar and Office 365.

Lead Engineer

Luxos Technologies

May 2012 -Mar 2014

- Delivered enterprise applications for pharmaceutical industries (GSK, Mankind).
- Built SMART Pitch, a sales mobile application, enhancing client engagement for pharmaceutical industries.

Senior Android Developer

BookBox Inc

Jan 2007 - Apr 2012

- Developed multilingual Ani Books applications, featuring video stories with synchronized subtitles.

Education

Bachelor of Technology in Computer Science (2004)

Master of Technology in Computer Science (2006)

Certifications/Courses

- Multi AI Agent Systems with CREW AI
- Introduction to Lang chain (<https://academy.langchain.com/certificates/xqjiuclsvu>)
- Introduction to AI and Machine Learning on Google Cloud
- Generative AI Fundamentals
- Introduction to On-Device AI
- AI Agentic Design Patterns With AutoGen
