

ISHAAN VOHRA

Senior Software Engineer

+91 7498264367

devanshvohra95@gmail.com

linkedin.com/in/ishaan-vohra-29dec1995

JOB OBJECTIVE

To excel professionally by leveraging expertise in software development, IT, and project management within esteemed organizations, preferably in Pune.

EDUCATION

Bachelors of Technology in Electronics and Communication, 2017

CORE COMPETENCIES

Software Development Lifecycle
Agile Methodologies
Project Management
Requirement Analysis
Integration Strategies
Business Process Enhancement
Quality Assurance Practices
System Architecture Design
Data Security Measures
Client Relationship Management

TECHNICAL SKILLS

Backend Stack: Java, Spring Boot, Microservices, Kafka, REST, Multithreading Basics, Python Basics
Database: PostgreSQL, Oracle, MySQL, MS SQL, Couchbase
Cloud (Basics): Microsoft Azure Fundamentals, AWS Cloud Practitioner Essentials
Frameworks and Libraries: Reactive WebFlux, ProtoBuf, ActiveMQ, Karate Tests
IDE/Tools: IntelliJ, Eclipse, Postman, Maven, JIRA, Tomcat, SonarQube, Openshift Cloud Platform, Conduktor, Kafka Offset Explorer
Devops: Jenkins, Dockers Basic
Version Control: GIT

PROFILE SUMMARY

- Accomplished **Senior Software Engineer** with over **8 years of experience** in **software development**, specializing in **Java, Spring Boot, Microservices**, and **cloud-native architectures**.
- Proficient in designing and building **scalable RESTful APIs**, implementing **Kafka-based messaging systems**, and optimizing performance using **SQL/NoSQL databases**.
- Proven success in **leading cross-functional teams**, conducting **code reviews**, and **mentoring junior developers** to maintain high engineering standards.
- Strong command of **cloud platforms (Azure, AWS)** and **containerization technologies** like **Docker** and **OpenShift**, ensuring **secure and efficient deployments**.
- Consistently recognized for **driving innovation**, delivering high-impact solutions like the **Gov-Certification** and **API Migration** projects, and improving **system efficiency** by measurable margins.

WORK EXPERIENCE

Duration	Designation	Company	Location
Jul'2023 to Present	Senior Software Engineer	SailPoint Technologies	Pune
Mar'2021 to Jun' 2023	Software Engineer - Advanced	Amdocs Development Centre India LLP	Pune
June 2017 – March 2021	Senior Software Engineer	Confluxsys Pvt. Ltd.	Pune

PROJECTS UNDERTAKEN

SailPoint Technologies
Senior Software Engineer <i>July 2023 – Present</i>
Domain: Identity Security Architecture: Microservices

Project: Gov-Certification (Certs 2.0) | *Jul 2023 – Present*

Tech: Java 8, Spring Boot, PostgreSQL, Snowflake, Redis, Kafka, Karate Tests, MapStruct, Lombok, AWS, Outbox Pattern

- Contributed to backend development for a next-gen access review system, replacing legacy CMS.
- Developed scalable APIs with Redis/Kafka-based asynchronous flows.
- Implemented business logic improvements and database interactions via PostgreSQL and Snowflake.
- Utilized Karate tests framework for API test automation.
- Resolved QA-raised defects through iterative hotfixes.

Project: Certifications GxP | *Mar 2024 – May 2024*

Tech: Java 8, Spring Boot, MapStruct, Snowflake, GoLang (exposure)

- Led development of GxP-compliant approval workflows with e-signature enforcement.
- Built backend services, integrated Snowflake DB, and handled feature releases.
- Collaborated with product owner, cross functional teams, prepared HLD and LLD.

Project: Machine Account Certification | *Feb 2024 – Mar 2024*

Tech: Java 8, Spring Boot, MySQL

- Delivered core functionality for certifying machine (non-human) identities.
- Implemented identity checks and data persistence via MySQL.

Project: API Migration (Beta to V3) | *Dec 2023 – Feb 2024*

Tech: Java 8, Spring Boot, MySQL, LaunchDarkly, Karate Tests

- Managed complete migration of APIs using feature flags for version rollout.
- Updated documentation, test cases, and API gateway configurations.
- Ensured backward compatibility and stakeholder alignment.

AWARDS & HIGHLIGHTS

- Received **Outstanding Project Management** recognition at SailPoint Technologies.
- Honored with **Excellence Award** for innovative ServiceNow integration at Confluxsys.
- Led SailPoint–Decision Support Platform integration, enhancing **access validation**.
- Deployed **Continuous Access Governance**, reducing spurious accounts and strengthening security.
- Implemented **Risk-Based Approval workflows** to ensure compliance and boost data protection.

CERTIFICATIONS

- Microsoft Certified Azure Fundamentals
- Udemy-Entry Level Python Programmer

PERSONAL DETAILS

DOB: 29th December 1995

Languages Known: English and Hindi

Address: Pune, 411045

Amdocs Development Centre India LLP
Software Engineer – Advanced <i>March 2021 – June 2023</i>
Domain: Telecom Architecture: Microservices

Project: Proposal and Agreement | *Oct 2022 – Jun 2023*

Tech: Java 8, Spring Boot, Kafka, Couchbase, MapStruct, CompletableFuture

- Developed microservices to digitize B2B sales workflows from proposal to agreement.
- Utilized CompletableFuture for parallel processing and Kafka for event-driven flow.

Project: Order Handling | *Mar 2021 – Jul 2022*

Tech: Java 8, Spring Boot, Kafka, OpenShift, Couchbase, Reactive Pattern

- Built reactive REST APIs and asynchronous services to manage customer orders.
- Diagnosed FIT issues and collaborated on root cause resolutions.

Project: Data ETL Tool | *Aug 2022 – Oct 2022*

Tech: Java 8, Spring Boot, Couchbase, OpenShift

- Created ETL tool to transfer configuration datasets across environments.
- Enabled traceability and debugging via RESTful endpoints and NoSQL storage.

Confluxsys
Senior Software Engineer <i>June 2017 – March 2021</i>
Domain: Identity & Access Management (IAM) Architecture: Microservices

Project: Decision Support Platform – SailPoint Integration | *Nov 2018 – Mar 2021*

Tech: SailPoint, Java 7/8, Spring, Hibernate, REST, Docker, ActiveMQ

- Built a user access revalidation engine integrating with SailPoint.
- Developed custom SailPoint plugins/tasks and led feature release planning.
- Managed production support and client-reported issues.

Project: Continuous Access Governance | *Apr 2018 – Oct 2018*

Tech: Java 7, Spring, JavaScript, REST APIs, ServiceNow

- Developed out-of-band access attestation platform.
- Built ServiceNow workflows, SLAs, and Java-based integration libraries.

Project: Risk-Based Approval Workflow | *Dec 2017 – Mar 2018*

Tech: Java 7, Spring, REST APIs, JavaScript, ServiceNow

- Created approval engine for high-risk access changes with ServiceNow integration.

Project: Manual Fulfillment & Access Revocation | *Aug 2017 – Nov 2017*

Tech: Java 7, Spring, REST APIs, JavaScript, ServiceNow

- Implemented modules to track access revocations and automate ServiceNow ticketing.
- Maintained reusable Java libraries for streamlined request processing.
