EDUCATION

Master of Computer Application (2021)

Rajagiri College, Kochi

Bachelor of Computer Application (2018)

National College Trivandrum

SKILLS

- C#, Python
- AWS, Azure, GCP
- Sql, NoSql, Neo4j
- Power Platform
- Copilot Studio
- Power BI
- Power Automate
- Power Apps
- Dataverse
- Graph API

WORK EXPERIENCES

Developer II Software Engineer

UST | Oct 2022 - Oct 2025

- Developed and deployed scalable enterprise solutions for T-Mobile using Microsoft Power Platform (Power Apps, Power Automate, SQL Server) with strong governance/performance optimization and Stored Procedures/Views/Triggers implementation at SQL Server. Calling external API and API integration. Implemented logging for all system modifications and store the records in SQL Server.
- Built a prompt engineering application for Copilot Studio using Power Platform and Azure. Document Intelligence extract key information from Sharepoint, OneDrive files and sending response to topics related for user guide uploaded. Azure OpenAI integration with Copilot Studio for advanced agents development.
- Designed and developed an REO application using Power Platform, Power BI and leading database migration from Azure SQL Server to Dataverse and managing backup/restore operations.

JEWEL BIJOY

SOFTWARE DEVELOPER

ACHIEVEMENTS

- Generative AI Awareness Program
- Euphoria IT fest

CERTIFICATION

Compute Technical Curriculum
NVIDIA

NEO4J
NEO4J Graph Academy

Building an End-to-end SPA ASP.NETCore Web API and React
LinkedIn Learning

C# 9 Language-Integrated Query (LINQ)
Pluralsight

Pandas Essential Training
LinkedIn Learning

Introduction to MongoDB
Pluralsight

Learning NGINX
LinkedIn Learning

WORK EXPERIENCES

Developer I Software Engineer

UST | May 2022 - Sep 2022

- Automated REGDATA portfolio management and built a centralized data hub using Python and GCP BigQuery to enhance analytics, workflow efficiency, and data accessibility.
- Participated in a Hackathon to scrape company data using Python and Selenium from LinkedIn and other sources.
- Developed an ESG data collection tool to retrieve financial scores from Yahoo Finance for Asset Management.

Associate Software Engineer

UST | Aug 2021 - April 2022

- Developed Knowledge Graphs for multiple projects using Neo4j, with interactive data visualizations built in D3.js deployed on AWS.
- Completed training in ETL development using Informatica, gaining foundational skills in data integration and transformation.
