Address:
18, 1st Block, Rajaji Nagar,
Bangalore - 560010

SKILLS

- Programming & Machine Learning :**
Python, Scikit-learn, Pandas, PyTorch, PyOD
- Azure ML Studio :**
Pipelines, Endpoints, AutoML, Notebooks, Dataset & Model Versioning
- Data Engineering & Processing :**
Handling structured (CSV, SQL) and unstructured (Logs, JSON, Text)
- Model Deployment & MLOp s:**
Azure ML Inference Endpoints, FastAPI, REST APIs, CI/CD Integration (GitHub Actions)
- Cyber security :**
Cloud Security, DevSecOps, Vulnerability Management

HOBBIES

- Reading Books
- Learn/Upgrade New Skills
- Play Cricket

POLISETTY JANARDHAN

SENIOR AI/ML ENGINEER

Experienced IT professional with 9 years of expertise in AI/ML and cybersecurity, proven ability to develop and deploy anomaly detection models using Python and Azure ML Studio. Skilled in working with structured and unstructured data, performing data pre-processing, model evaluation, and full ML lifecycle deployment. Strong Cyber security background with hands-on experience in vulnerability management, DevSecOps.

WORK EXPERIENCE

Sr AI/ML Engineer

CGI, Bangalore
Jan 2024 – Jun 2025

Roles & Responsibilities:

- Designed and deployed a real-time fraud detection engine using **Python, Scikit-learn, Apache Spark**, improving detection precision by **25%** and reducing manual investigations by **40%**
- Improved fraud detection accuracy by **20%** through **ensemble ML models (XGBoost, Neural Networks)**; modernized deployment with **Docker, Kubernetes, GitOps**, reducing fraud losses and accelerating releases
- Built a **BERT-based NLP model** integrated into CGI's PULSE platform to classify 165K+ complaints, reducing routing time by **70%** and enabling voice-to-text complaint handling.
- Built a GPT-powered assistant using **RAG architecture**, combining vector search (**Azure AI Search**) with GPT to deliver accurate, context-driven answers from enterprise knowledge bases, reducing document search time

Sr AI/ML Engineer

TRIANZ, Bangalore
May 2023 – Nov 2023

Roles & Responsibilities:

- Created ML-OCR pipeline (**Tesseract, LayoutLM, Azure Cognitive Services**) with UiPath RPA, achieving **85% automation** in invoice extraction and reducing manual entry by **60%**.
- Built front end application using **Streamlit/Flask** for Generative AI input and output visualization.
- Developed and fine-tuned Generative AI models such as GPT for various applications.

Senior Engineer

TATA ELXSI, Bangalore
Oct 2021 – Feb 2023

Roles & Responsibilities:

- Developed robust tracking algorithm using **ToF sensor data** (Object Tracking Algorithm), achieved 15-20% improvement in Intervention Detection

CERTIFICATIONS

- CCSA (CheckPoint)
- [Microsoft Certified: Azure AI Engineer Associate](#)
- [ISO 27001 LA \(GSDC\)](#)
- [Microsoft Certified: Azure Data Scientist Associate](#)

EDUCATION

- MCA, CR Engg College, Tirupati - 2013
- BSc Computers, SSGS Degree College, Guntakal - 2010

[Cloud SIEM Assistant](#)

LANGUAGES

- English
- Telugu
- Hindi
- Kannada
- Sanskrit

- Modernized document management system with AI services, implementing self-serve EDP pipeline that enhanced scalability and compliance using Azure AI Search and Cosmos DB
- Automated IT-ticket management with ML classification, achieving 87% accuracy and reducing manual routing for 100,000+ annual tickets using scikit-learn and NLTK

Administrator (Cyber Security)

WIPRO, Bangalore

Feb 2017 – Feb 2020

Roles & Responsibilities:

- Worked on Vulnerability Management of On-prem and cloud instances using Qualys,
- Identify and resolve any false positive findings in assessment Results
- Managing policies, Administering and troubleshooting of Firewalls and VPN (CheckPoint)
- Implementing Content Filtering and web security using Bluecoat

Associate Engineer

i4 Global, Bangalore

Feb 2015 – Jul 2016

Roles & Responsibilities:

- Handling Service and incident Tickets using BMC REMEDY Tool
- Configuring, managing and troubleshooting of Network Devices
- Imaging laptops & configuring them with necessary softwares and permissions using AD

Technical Support Engineer

NEXSUS, Bangalore

Mar 2014 – Feb 2015

Roles & Responsibilities:

- Install and configure voice recorder applications (CALL CONFINE and MAXDIAL)
- Visit client locations across Southern part of India for troubleshooting firmware issues
- Taking back up of recorded files and transferring them to Head office for monitoring the logs
