

Javed Khan
Senior Business Analyst – Liquidity | Treasury | LCR/NSFR | Regulatory Reporting
Email: Javedk00021@gmail.com
Mob- 9887600528

PROFESSIONAL SUMMARY

- 14 years of experience in IT, with extensive experience as a Senior Business Analyst / Project Manager across Banking, Risk, Treasury, Liquidity and Regulatory Reporting.
- Strong experience in Liquidity Risk and Treasury, covering LCR, NSFR, Intraday Liquidity, liquidity forecasting, cash-flow analysis, liquidity monitoring and regulatory reporting within banking environments.
- Experienced in analysing intraday cash positions, cash inflows/outflows, funding requirements and liquidity positions, supporting liquidity monitoring, forecasting and reporting processes.
- Hands-on experience in liquidity stress testing and scenario analysis, including assessment of liquidity positions, cash-flow impacts, funding requirements and potential shortfalls under different business scenarios.
- Experienced in translating requirements from Treasury, Risk, Finance and IT into BRDs, FSDs, functional specifications, process flows, data-mapping documents, user stories and test scenarios.
- Strong experience in source-to-target data mapping, data lineage, data validation, data reconciliation, data analysis and regulatory reporting, including supporting data/system migration and implementation initiatives.
- Experienced in coordinating SIT/UAT, migration testing, defect management, stakeholder sign-offs, implementation, training and post-implementation support across banking and regulatory platforms.

CORE COMPETENCIES

Liquidity & Treasury: Liquidity Risk | Liquidity Management | Intraday Liquidity | Liquidity Forecasting | Cash-Flow Analysis | Liquidity Monitoring | Stress Testing | Scenario Analysis | Treasury | ALM | LCR | NSFR

Regulatory & Banking: Basel III | Regulatory Reporting | PRA110 | HQLA | Funding & Liquidity | Banking Risk

Business Analysis: Requirements Gathering | BRD | FSD | Functional Specifications | User Stories | RTM | Process Flows | AS-IS / TO-BE | Gap Analysis | Impact Analysis

Data & Migration: SQL | Data Analysis | Data Migration | System Migration | Source-to-Target Mapping | Data Lineage | Data Validation | Data Reconciliation | Migration Testing | ETL

Testing & Implementation: SIT | UAT | Functional Testing | Test Scenarios | Test Cases | Defect Management | Implementation | Deployment Support

Stakeholder Management: Treasury | Risk | Finance | IT | Business Users | Vendor Coordination | Stakeholder Workshops

Tools & Methodologies: OFSAA | OneSumX | SQL Server | Oracle | DB2 | Teradata | Jira | Confluence | Power BI | Visio | Draw.io | Agile | Scrum | Kanban

Technical Skills:

SKILLS	TOOLS
Scrum	Agile methodologies (Scrum, Kanban) Agile project management tools (Jira) Team facilitation and coaching Backlog grooming and prioritization Conflict resolution and stakeholder communication
Software Skills	Quality Center (QC) HP 9.2, Ascential Datastage 7.5/8.1 and Toad for oracle. Teradata SQL Assistant, Jira,Java scripts
Technology	ETL, OFSAA, SQL Server,Onesumx (Wolters Kluwer)
Software Tools	Jira,Confluence Visio / Draw.io,SQL,Power BI,REST APIs BPM Workflow Platforms,CRM Systems AI Automation Solutions
DATABASE(S)	DB2,Oracle, IBM DB2, MS SQL Server

Professional Experience:

Nov 24 to August 26

Ajman Bank-(Dautam Consulting)**Credit Risk Business Analyst / Project Manager**

- Led end-to-end requirements across Credit Risk, ERM, Finance, Credit Administration and IT for **IFRS 9 and Basel III** initiatives.
- Defined credit lifecycle requirements covering **origination, approval, PD/LGD/EAD, limits, collateral, EWS and credit risk reporting**.
- Delivered **BRD, FSD, user stories, RTM, process flows and data mapping** aligned with IFRS 9 and Basel requirements.
- Supported **IFRS 9 implementation**, including Stage 1/2/3 classification, SICR, 12-month/Lifetime ECL and PD/LGD/EAD validation.
- Supported **Basel III credit-risk implementation**, including exposure classification, CRM, EAD, risk-weighting and RWA calculation requirements.
- Played a key functional role in **Moody's CreditLens onboarding and integration**, including source-to-target mapping, risk-rule configuration and output validation.
- Coordinated **SIT/UAT, data reconciliation, defect resolution and integration** across business, IT and vendor teams.
- Validated **PD, LGD, EAD, ECL and credit-risk reporting outputs** at account and portfolio levels.

Abu Dhabi Islamic Bank(Maveric systems)

Risk & Treasury Business Analyst

July 2024 – October 2024

- Led business analysis and functional implementation activities for **Liquidity Risk and Treasury solutions covering LCR and NSFR under Basel III**.
- Gathered and translated requirements from **Treasury, Risk, Finance and IT** into BRDs, functional specifications, process flows, data-mapping documents and test scenarios.
- Supported **intraday liquidity management and monitoring**, analysing cash positions, cash inflows/outflows, funding requirements and liquidity movements across relevant banking data sources.
- Supported **liquidity forecasting and cash-flow projections**, analysing expected inflows, outflows, funding requirements and liquidity positions to support Treasury decision-making and reporting.
- Performed **liquidity stress testing and scenario analysis**, assessing the impact of different cash-flow, funding and liquidity scenarios on overall liquidity positions and identifying potential shortfalls.
- Supported **LCR regulatory reporting**, including HQLA classification, cash-flow categorisation, inflows/outflows, run-off assumptions and LCR calculation logic.
- Performed **source-to-target data mapping and validation** for deposits, funding, securities, cash positions and contractual cash-flow data supporting downstream liquidity calculations and reporting.
- Analysed and reconciled liquidity data across source systems, transformed datasets, liquidity calculations and regulatory reporting outputs, investigating discrepancies and supporting data-quality remediation.
- Supported **NSFR implementation and reporting**, including Available Stable Funding (ASF), Required Stable Funding (RSF), funding classifications and maturity calculations.
- Supported **liquidity data/system migration and integration activities**, validating source-to-target mappings, migrated data, calculations and downstream reporting outputs.
- Coordinated **migration testing, SIT and UAT**, including test-case preparation, defect tracking, business validation and stakeholder sign-offs.
- Worked closely with **Treasury, Risk, Finance, IT and vendor teams** throughout requirements, data validation, testing and implementation activities.

Maveric Systems – Product Manager | Wolters Kluwer – Credit Risk / Regulatory Reporting **March 2024 – January 2025**

- Worked on Wolters Kluwer OneSumX Regulatory Reporting solutions, supporting COREP regulatory reporting requirements for banking clients.
- Gathered and analyzed requirements from Risk, Finance, Regulatory Reporting, IT and client SMEs, translating regulatory requirements into functional specifications.
- Supported COREP report implementation and enhancement, including regulatory rules, data requirements, validations and reporting logic.
- Worked on source-to-target data mapping from banking/risk systems into OneSumX regulatory reporting structures.
- Analyzed data lineage and dependencies across source systems, OneSumX Data Foundation and Regulatory Engine, supporting accurate COREP reporting.
- Supported configuration and validation of COREP templates, data elements, business rules and regulatory validations.
- Conducted functional testing, SIT and UAT, including test scenarios, test execution, defect analysis and resolution with development and QA teams.
- Performed data reconciliation and report validation between source data, OneSumX calculations and generated COREP outputs.
- Coordinated with Wolters Kluwer product teams, client stakeholders, SMEs and development teams to resolve functional issues and deliver regulatory-reporting enhancements.
- Prepared BRD/FSD, mapping documents, process flows, test plans and implementation documentation

- supporting COREP releases.
- Supported client implementation, production issues, regulatory-reporting enhancements and user training for OneSumX COREP reporting.

Wipro Limited-March 22 to July 23-Senior consultant /Business Analyst:

- Responsible for documenting and getting user concurrence on Functional Requirements Specification, Operations Process Design of Business user requirements through conducting requirements elicitation, analysis, discussions, and sign offs
- Worked on PRA110 rules and RWA calculation for Cynergy risk transformation program.
- Production of Quarterly/monthly Basel III credit risk capital adequacy calculations
- Production of ECL reports for IFRS9/INDAS Monthly/Quarterly
- Capital impact analysis
- Understanding of data/methodology issues
- Worked on Basel standardized batches for RCA 3 report generation.
- Participation in ongoing compliance of regulation
- Ad hoc analysis and regulatory data requests
- UAT Assistance
- Worked on OFSAA Tool for Credit risk modelling and reporting.
- Participation in project work and assistance with project management for major deliverables
- Become comfortable with analyzing and reconciling large amounts of risk data
- Regular contact with external Clients and Financial Institutions to respond to queries, obtain and provide information.

HDFC Basel /IFRS Project-Sep21 to March-22

Project Manager

- Communicate, and Track Project lifecycle activities from concept, product delivery, UAT
- Implementation activities to meet business deadlines and comply with IT governance policies and processes.
- objective is to create visibility of BSG projects to project stakeholders and complete activities within mutually agreeable timelines through handoffs, signoffs, updates, and follow-up
- Responsible for documenting and getting user concurrence on Functional Requirements Specification, Operations Process Design of Business user requirements through conducting requirements elicitation, analysis, discussions, and sign offs
- Ensure that Requirements are captured “First Time Right” from the user and documented into cost effective, efficient TO-BE processes by reducing process redundancies and deficiencies.
- Communicate to stakeholders through efficient documentation in-order to get agreement on solutions meeting the requirements
- Observe, Interact with Users, System owners and Document AS-IS business processes in a domain and identify process improvements and pain areas. Discussion on Pain Areas with Process Owner
- Follow up with Process Manager and BSG Team for implementation of Pain Areas, Implementation of each Pain Areas in the process identified, Update progress of each Pain Area for solution /enhancement implemented, ensure proper flow of Process post implementation, Document any change / up-gradation of process

Agile BA /IFRS 9/Cecl-Credit Risk Modeling UBS INDIA from June 2018 till 2021-June

- Collaborated with all stakeholders in every project.
- Completed quality assurance testing of developed applications and identified code areas that needed improvements.
- Wrote user requirements specification (URS) and Functional requirements specification (FRS) documents as per the business requirements and process flow.

- Work with the quantitative research group to improve risk calculations
- Apply project management practices across all phases of software development life cycle (SDLC)
- Develop and manage detailed project plans and project updates for stakeholders
- Opportunities to manage key strategic projects or components of work
- Work with development team to analyze and resolve defects
- Perform System Functional testing
- Streamlined projects to make them meet changing needs.
- Was highly responsive to the team and clients.
- Utilizing Tosca Automation Tool for atomising the Application testing.
- Attending scrum calls and Meetings
- Attending Agile ceremonies.
- Following Sprints deliverables.
- Current Expected Credit Losses (CECL) is a new credit loss accounting standard (model) that was issued by the Financial Accounting Standards Board (FASB) on June 16, 2016. CECL replaces the current Allowance for Loan and Lease Losses (ALLL) accounting standard. The CECL standard focuses on estimation of expected losses over the life of the loans, while the current standard relies on incurred losses.

XL CATLIN: Agile BA 2016 till June 2018

- This application provides Underwriters with the ability to define and manage modeled and un-modeled Catastrophe exposure data based on Layer. It also provides the user the ability to consolidate independently created modeled and un-modeled exposure perspectives
- Conducted Joint Application Development (JAD) sessions to develop and agree upon a system that focuses on the business requirements
- Participated regularly in Walkthroughs and Review meetings with Project Manager, QA Engineers and Development team
- Used PVCS Dimensions Process Modeler for adding users and roles into Oracle database
- Regularly interacted with offshore and onshore development teams
- Handled regular deployment issues across Dev, Prod and Test environments
- Implemented and support software installation packaging and distribution using Web Based Software Deployment (WBSD)
- Scheduled production deployments using WBSD on Tivoli server end-points
- Troubleshoot development and production failed packages and communicate offline end-points to appropriate support teams and developers
- Ensured that the clients adhere to the Change Management Notification (CMN) process for any WBSD requests and ensure that any application to be deployed in stage/production has been relatively error free
- Involved in Creation of Test Cases, Test Plan, Test Strategy and Traceability Matrix based on design requirements
- Coordinate with Development and Onshore QA and managers for the better understanding of requirements and test cases
- Worked on Sql server for data validation of Reinsurance Requests and portfolio
- Validated the reinsurance data in Database Tables using database testing
- Worked on Project master plan and requirement traceability Matrix

(Cards and payments (AMEX) Nov-2014 to 2016

- Generated a streamline process to understand the various steps in the Cards AND payments lifecycle and desired functionality of the new system by interacting with users, management, SME (Subject Matter Expert), stakeholders, lenders, underwriters
- Interviewed business users to gather requirements and analyzed the feasibility of their needs by coordinating with the project manager and technical lead
- Identified, researched, investigated, analyzed, defined opportunities for business process improvement, documented business processes and initiated efforts to make improvements.
- Contributed to the definition of scope, performed extensive requirement analysis and defined functional specifications
- Prepared Business Requirement Documents (BRD) and used Requisite Pro to manage, analyze, and convert business requirements into functional specifications
- Giving assistance in creating MTP and Test strategy (Master Test Plan)
- Involved in defining test objectives for the applications and performed Manual Testing
- Development of Test Cases, Test Plan, Test Strategy and Traceability Matrix based on design requirements

- Extensively worked on backend testing of Payment based mainframe applications
- Worked on Test Planning, Test Strategy, Test management, Test Results
- Validated the Data on Mainframes using batch testing
- Worked on Cobol/DB2 Payment based mainframe JCL and files
- Coordinated Web and Mainframe projects for schedules, requirements gatherings, timelines
- Extensively worked on SQL for back end testing on DB2
- Worked on xml and different web services of the project
- Initiated process Improvement Trackers and Requirement Traceability Matrix

Environment: Application life cycle Management QC tool 11, DB2, Cobol, QMF, JCL, File aid, SQL,TSO,ISPF, MS excel, MS Word, MS PowerPoint,Spufi, FTP, MS Office,SQL

Education Qualification:

NAME	DATES ATTENDED MO/YR TO MO/YR	DEGREE RECEIVED
BOARD OF SECONDARY EDUCATION, RAJASTHAN	JULY-2000 TO MAY-2001	SECONDARY SCHOOL EXAMINATION-2001
BOARD OF SECONDARY EDUCATION, RAJASTHAN	JULY 2002 TO MAY2003	SENIOR SECONDARY EXAMINATION-2003
UNIVERSITY OF RAJASTHAN, JAIPUR	AUG 2004 TO AUGUST 2008	BACHELOR OF ENGINEERING IN ELECTRONICS AND COMMUNICATION
