---

**Star Lite InfoTech Ltd. / Business Analyst / Remote**

Mar'22 – Dec'24

**Project: ISO 20022 Migration**

Supported the migration of payment messaging from SWIFT MT to ISO20022 MX formats, aligning with SWIFT CBPR+ and regulatory mandates. Conducted requirement analysis, message mapping, and UAT coordination to enable seamless and accurate payment processing.

Responsibilities:

- Supported end-to-end ISO2022 migration initiative for cross-border and domestic payments, ensuring compliance with SWIFT and regulatory standards.
- Gathered and documented business and functional requirements for payment message transformation using BRD, FRD, User Stories and Process Flows.
- Performed message mapping and gap analysis between MT (MT103, MT202, MT195 etc.) and MX standards (pacs.008, pacs.009, camt.053 etc.) to ensure accurate data translation.
- Conducted As-Is and To-Be analysis for payments transformation workflows
- Defined business rules and functional requirements for MT-MX message conversion aligned with SWIFT CBPR+ standards
- Facilitated requirement workshops with business, compliance, operations and IT stakeholders
- Collaborated with QA and development teams to validate payment workflows and resolve defects during SIT/UAT phases
- Experienced in Agile Scrum, breaking down requirements into epics, features, and user stories
- Analyzed payment exceptions and reconciliation gaps to ensure seamless payment processing
- Created document for the new processes and systems, including user manuals and technical guides

**Tide / Business Analyst / Hyderabad**

June'21-Feb'22

**Project: Client Onboarding & Screening Management**

The project was about implementing a client life cycle management system to streamline client onboarding with KYC, AML, Sanctions & Due Diligence checks, ensuring compliance with global regulations and improving efficiency, data quality & client experience.

Responsibilities:

- Gathered and documented requirements for Client Onboarding, KYC, AML, and sanctions screening processes ensuring alignment with project scope, objectives and deliverable.

- Worked with compliance and operations teams to automate client onboarding workflows, reducing onboarding time by 40%
- Designed and validated screening rules for PEP and sanction list checks
- Identified key stakeholders, analyzed their power on the project, and strategically engaged them throughout the project
- Collaborated with compliance, operations, and technology teams to streamline onboarding workflows and improve operational efficiency
- Prepared user stories, acceptance criteria, and functional documentation for onboarding and screening modules
- Participated in scrum meetings (stand-ups, sprint planning, reviews, retrospectives) with Development Team, Product Owner
- Supported SIT/UAT activities and validated KYC, AML, and sanctions screening workflows.
- Analyzed onboarding bottlenecks and contributed to automation initiatives reducing manual intervention

**WNS Global Services Pvt Ltd. | Lead Associate | Gurugram**

May'20-Jan'21

**Project: SMSA (Swift Message Search Application)**

Worked on the development of a SWIFT Message Search Application enabling users to quickly access, validate, and track SWIFT MT/MX messages; improving reconciliation and compliance with SWIFT standards.

**Responsibilities:**

- Gathered & documented business requirements for searching and retrieving SWIFT MT & ISO20022 messages to support payments investigation and compliance team
- Designed functional and non-functional requirements including search filters (by date, sender/receiver, transaction ref., amount, payment status)
- Elicited & translated business requirements into User Stories and assigned them to Sprints in Agile Methodology
- Worked with development team to validate messages
- Conducted Impact Analysis on Business Process using techniques like Use Case Diagram
- Designed Requirement Traceability Matrix(RTM) to manage requirements
- Involved in creating wireframes and mockups for the system using MS VISIO
- Responsible for coordinating and scheduling meetings, workshops, and other project-related gatherings
- Provided ongoing support to users and stakeholders to address any issues, challenges related to SWIFT Messages
- Used JIRA for bug tracking and reporting, also followed up with the development team to verify bug fixes

**Saxo Group India Pvt Ltd | Sr. Associate | Gurugram**

Jul'17-Apr'19

**Profile: Cash & Payments Ops**

**Responsibilities:**

- Strong understanding of MT messages, cross-border payments, payment lifecycle, and clearing/settlement processes
- Knowledgeable in payment message standards (MT103, MT202, MT199, MT192, MT196, MT195) and clearing houses (BACS, CHAPS, EBA, Fedwire, SEPA, TARGET, RTGS, NEFT)
- Good understanding of Letter of credit (LC), Guarantees.
- Manager cross-border payment operations and ensured compliance with international payment standards and settlement process.
- Handled payment investigations, SWIFT message validation, and exception handling for global transactions
- Contributed to operational efficiency and STP improvement initiatives within payment processing workflows.

Responsibilities:

- Managed end-to-end payment processing operations across retail, corporate, and institutional banking channels while ensuring SLA and regulatory compliance.
- Investigated payment exceptions and SWIFT-related queries to ensure timely resolutions and minimize operational risk
- Supported payment reconciliation and manual payment validation processes for high-value transactions
- Contributed to STP improvement initiatives increasing automation efficiency from 40%-80%
- Tracking to ensure all the enquiries and manual payments are processed well within agreed timeline
