

JUSI KUMAR GUPTA

JAVA FULLSTACK DEVELOPER

Bangalore, India | +91 9019081292 | jusigupta001@gmail.com

PROFILE SUMMARY

Full Stack Java Developer with **3.5+ years of experience** in building **scalable and secure web applications** using **Java, Spring Boot, Microservices, and Angular**. Strong hands-on experience with **Angular, REST API integration** and **Docker**. Proficient in **RESTful services, JWT authentication, MySQL, AWS cloud services, payment integration, and PDF generation**. Skilled in **debugging, performance optimization**, and delivering **production-ready solutions** in **Agile/Scrum environments**.

PROFICIENCIES

- **Languages:** Core Java, Java 8, java 17, OOP Concepts, Angular.
- **Frameworks/Technologies:** Spring Boot, Spring MVC, Spring Security, Hibernate ORM, JUnit, Microservices, REST API, Spring JDBC/Data JPA, JWT Tokens, Angular Routing, Http Interceptors, Lazy Loading, Angular RxJS, Kafka, Swagger, Design Patterns.
- **Databases & ORM:** MySQL, SQL, NoSQL, ER Diagram Design, Hibernate/JPA, Redis.
- **DevOps & Cloud:** AWS (S3, EC2 & IAM), Jenkins, Git/GitHub, GitHub Actions, Docker.
- **Testing & Logging:** Junit5, Mockito, API Documentation, Logback, SLF4J.
- **Monitoring & Debugging:** Zipkin, Spring Boot Actuator, ELK stack.
- **Version Control & Collaboration:** Git, Maven, Agile, Scrum.
- **Other Skills:** Debugging, Performance Optimization, DSA algorithm.

EXPERIENCE: 3.5+ YEARS

KogniVera | Feb 2025 -JAN 2026

Project: Hotel Booking Service

Developed a **Full-Stack Hotel Booking and Property Management Platform** with a responsive **Angular frontend** and a scalable **Spring Boot microservices backend**. Built **Angular standalone components** for hotel search, filters, room availability, and booking flow, integrating backend services using **REST APIs, RxJS, and HTTPClient**. Implemented **JWT-based authentication, secure payment gateway integration, notifications, PDF invoice generation**. Used **Hibernate/JPA** for ORM, **MySQL** for database design, **AWS S3** for image and document storage. Followed **Agile methodology**, used **Git** for version control and **Postman** for API testing.

BPO Convergence Pvt Ltd. | June 2024 -Jan2025

Project: Payroll Management System

Developed a Spring Boot—based **Payroll Management System** to automate salary Processing, employee compensation, and payroll reporting for an IT organization. The system features **JWT**, role-based access **control** and secure **data** handling for HR, Admin, and Employee users. Focused on improving **efficiency, transparency** and data integrity through modular architecture and **optimized** backend design.

Silverlink Technologies | July 2022 - June 2024

Project: Online Travel Agency

Developed an Online Travel Agency System, a Spring Boot—based **web application** that enables users to search, book and manage bus travel services with **secure authentication** and real-time booking updates. Integrated OTP and **JWT-based authentication**, payment gateway processing for seamless and secure user experience. Built a robust backend using **Java 8, Spring Boot, Hibernate, JPA, and MySQL**, ensuring optimized performance and reliable data management through well-structured **entity relationships** and **efficient queries**.

Key Projects:

Roles and Responsibilities:

- Developed RESTful services using Spring Boot, entity creation, service layers and controllers.
- Managed MySQL database interactions using Hibernate and JPA, ensuring optimized Queries and Performance.
- Implemented Spring Security, JWT for secure user authentication and RBAC.
- Designed Queue-based async processing for booking confirmation emails and notifications.
- Configured and registered Microservices with Eureka Server for service discovery and used Feign Clients for interservice communication.
- Developed API Gateway for centralized routing and request management across services.
- Implemented real-time notification services, including SMS, email, and push notifications, to keep users updated on order statuses and delivery timelines.
- Optimized database design and queries with ER diagrams and NoSQL.
- Integrated Git with CI/CD tools like Jenkins/GitHub Actions for automated pipeline triggers.
- Implemented unit testing using JUnit and Mockito to verify service reliability and reduce Regression issues.
- Designed and optimized payload classes and applied database normalization techniques to enhance performance, scalability, and data integrity.
- Production issues, analyzing logs, and identifying root causes. Known for delivering clean, modular, and reusable code, adhering to SOLID principles, design patterns, and best practices in software engineering.
- JWT Authentication using Angular Interceptors and Guards, Lazy Loading for Booking, Payment modules.
- Secure Routing with role-based access, Global HTTP Interceptors for token and error handling.

SOFT SKILLS:

Problem-Solving | Ownership | Analytical Thinking | Communication | Team Management | Adaptability | Quick Learning.

EDUCATION: Chandigarh Engineering College (B.Tech)
