Summary

Backend Java Developer & Full Stack Engineer with 5 years of experience designing and building **scalable, cloud-native applications**. Specialized in **Java, Spring Boot, REST APIs (RESTful Web Services), and microservices architecture**. Expert in **event-driven systems, CI/CD pipelines, and cloud platforms (AWS, Azure, Docker, Kubernetes)**. Proven track record in **high-throughput systems (10,000+ TPS)** across **fintech, healthcare, and retail** domains. Frontend skills in **React.js and Angular**. Strong **collaboration, leadership, and problem-solving abilities** in **Agile/Scrum environments**.

Education

Indian Institute of Technology, Kharagpur, WB, India

- Master of Technology, Mechanical Engineering, 2019 – 2020
 - Bachelor of Technology, Mechanical Engineering, 2015 – 2019
-

Work Experience

Publicis Sapient | Senior Associate Engineer (Java Backend Developer) | 05/2025 – Present

- Built and deployed **Java-based microservices** on Azure Cloud using **Docker and Kubernetes**.
- Created **REST APIs** for prescription-generation features supporting **50M+ users** at UnitedHealthcare's Optum Rx.
- Managed **CI/CD pipelines** and automated testing for continuous API delivery.
- Developed **event-driven systems** leveraging **Spring Boot, PostgreSQL, and Azure Synapse**.

Rootstock | Senior Software Engineer (Full Stack Developer) | 09/2024 – 04/2025

- Built **Materials Requirement Planning (MRP) services** using **Java, Spring Web Flux, Kafka** in a **microservices architecture** (2000 TPS).
- Improved sales workflows by **20%** using **React, LWC, and TypeScript**, integrated with backend APIs.
- Deployed ERP apps across **USA, Canada, and Japan** with **Docker/Kubernetes** ensuring high availability.

Horizontal (Target) | Software Development Engineer 2 (Backend Developer) |

05/2024 – 09/2024

- Designed **low-latency event-driven systems** with **Java, Kotlin, Spring Web Flux**.

- Implemented **data pipelines and APIs** with **Kafka, PostgreSQL, MongoDB, Neo4j** on **AWS EKS**.
- Modelled **retail logistics data** with **Neo4j**, scaling to **5000 TPS**.

Paytm | Software Engineer (Java Backend Developer) | 04/2023 – 05/2024

- Developed **Settlement Summary Report APIs** processing **100M+ daily transactions** using **Java concurrency and multithreading**.
- Designed **microservices and CI/CD pipelines** handling **10,000+ TPS** with **Java, Aerospike, SQL, Kafka, NPCI APIs**.
- Built **event-driven architecture** for asynchronous fund transfers using **Kafka queues**.
- Created reconciliation and MDR calculators with **Hive + Amazon S3** integration.

Reliance Jio Infocom | Software Development Engineer (Java Backend & Full Stack)

| 08/2020 – 04/2023

- Developed **Flash Sale feature** for JioMart handling **1M+ merchants** using **Redis, Kafka, and event-driven systems**.
- Built **REST APIs & microservices** for recommendation and discount logic using **Java, Tibco queue, Redis, SQL**.
- Maintained **Docker/Kubernetes deployments** for distributed billing systems.
- Developed **front-end UIs** with **React, Angular, and TypeScript**, integrated with backend APIs.

Technical Skills

- **Languages:** Java, Kotlin, C++, C, Python, JavaScript, TypeScript
- **Frameworks:** Spring Boot, Micronaut, React, Angular, TensorFlow
- **Databases:** PostgreSQL, MySQL, DB2, MongoDB, Redis, Aerospike
- **Cloud & Tools:** AWS, Azure, Salesforce, Docker, Kubernetes, CI/CD pipelines, Kafka
- **Methodologies:** Agile, Scrum, Test-Driven Development (TDD), DevOps
- **Expertise:** REST APIs, RESTful Web Services, Microservices Architecture, Eventdriven Systems, Cloud-native Applications, Backend & Full Stack Development

Scholastic Achievements

- Qualified **KVPY (Kishore Vaigyanik Protsahan Yojana)** fellowship exam • Secured **Top-100 rank in SCRA Exam**, UPSC, Govt. of India.
