PROFESSIONAL EXPERIENCE

Accenture, Bangalore

Associate Manager (Senior Business Analyst) - Reconciliation

Dec 2025 – Jul 2026

- Led business analysis for a high-volume **Cash, Trade and general ledger reconciliation** transformation project, aligning stakeholders across finance, compliance, and engineering
- Supervised a 25-member team through mobilization and requirement-gathering workshops and stakeholder interviews (interviews, questionnaires, interface/document analysis, brainstorming, focus groups) to ensure full coverage of business needs.
- Configured and tested auto-matching and auto-allocation rules, improving daily matching efficiency to **95% to 100%** on-time transaction matching, trade matching, and settlement through rigorous reconciliation of internal and external data and strengthened reference/static data governance.
- Facilitated requirement workshops with operational users to translate complex manual adjustment practices into structured system rules.
- Facilitated daily stand-up governance forums on Jira to track milestones, align cross-functional teams, escalate blockers, and assess readiness for automating manual activities.

State Street India Pvt Ltd

Manager – (Senior Business Analyst) Settlements & Operations

Sep 2021 – May 2025

- Led a greenfield Claims Monitoring process implementation across financial services, managing the end-to-end implementation plan and delivery schedule in alignment with enterprise architecture and business strategy for global banking clients.
- Supervised 14-member team through requirements elicitation and workshops; managed client dependencies across data and business teams.
- Strengthened governance and controls by establishing clear data ownership, embedding traceability frameworks (RAID log of risks, assumptions, issues, dependencies), and improving reference data accuracy, reliability, and regulatory compliance.
- Designed and published KPI dashboards in Power BI, enabling dashboard-based, real-time visibility of sprint and milestone progress for transparent reporting and informed decision-making.
- Facilitated Agile governance through weekly Scrum ceremonies, working-group sessions, backlog refinement, and continuous team coaching.
- Ran status meetings and feedback forums with client sponsors and technical teams, aligning deliverables with business expectations and preparing status updates for leadership.
- Introduced process improvements, including an internal contact management tool, reducing reliance on external data sources and streamlining stakeholder communication.
- Documented user stories with acceptance criteria and traceability from requirements through testing and delivery, ensuring completeness of project artifacts and sign-offs.
- Performed gap, scope, and impact analyses (UML, BPMN, Visio, Lucidchart) to define AS-IS/TO-BE processes and identify optimization opportunities.
- Partnered with cross-functional teams across development, integration, and UAT, ensuring quality delivery and seamless transition into BAU.

Broadridge Financial Services

Associate Project Manager (Senior Business Analyst) – Settlements

May 2017 – Aug 2021

- Executed implementation of the IMPACT settlement system to extract and monitor real-time settlement status via IMAD references, improving operational visibility and accuracy.
- Led AS-IS vs. TO-BE analysis, supervised an 8-member team through requirement-gathering workshops, and translated business requirements into actionable solution designs.
- Partnered with Front/Middle/Back-office stakeholders to diagnose and resolve recurring trade matching and settlement fails.
- Delivered a major enhancement achieving 80% on-time trade matching and settlement through rigorous data reconciliation and strengthened reference/static data governance.
- Automated daily cash and securities reconciliation processes, decreasing operational reconciliation time by 4 hours per day
- Coordinated UAT activities and partnered with development, integration, and functional testing teams to deliver end-to-end solutions in full compliance with business and regulatory expectations, managing client dependencies and escalations throughout.

JP Morgan Chase India Pvt Ltd

Operational Analyst – Reconciliation & Settlements

Apr 2007 – Nov 2016

- Ensured accurate reconciliation of trade positions by validating static data attributes, coordinating with global agent banks and data teams, and resolving discrepancies through robust reference data controls.
- Coordinated large-scale securities transfers by validating reference data, static client data, and settlement instructions, ensuring alignment with market regulations and client requirements.
- Conducted market restriction and eligibility checks, embedding static data validations to ensure smooth transfers and regulatory adherence.
- Managed post-trade settlement activities with a focus on TMPG Claims, leveraging reference data to investigate, resolve, and prevent recurring discrepancies.
