Work Experience

Accenture, Bangalore

Assistant Project Manager – Change Management & Business Transformation Dec 2025 to Till Date

- Lead change management and transformation initiatives for Banking and Financial Services clients.
- Drive stakeholder engagement, business readiness, communication, and adoption strategies for enterprise programs.
- Directed the team on 25 members, organizing and leading requirement-gathering workshops (interviews, questionnaires, interface/document analysis, brainstorming, and focus groups) to ensure complete coverage of business needs.
- Delivered a major enhancement that achieved 80% on-time trade matching and settlement, through rigorous reconciliation of internal and external data, and strengthening reference and static data governance.
- Partner with business, operations, and technology teams to support digital transformation and process modernization.
- Manage UAT readiness, production rollouts, hypercare support, and governance activities.
- Handling the Stand-up calls to take updates on the Jira and understand the readiness for automation of activity.

State Street India Pvt Ltd

Project Manager/Senior Business Analyst

Sept 2021 to May 2025

- Led a Greenfield project for Claims Monitoring process across financial services, managing end-to-end delivery and ensuring alignment with enterprise architecture and business strategy for global banks.
- Strengthened governance and controls by establishing clear data ownership, embedding traceability frameworks, and improving reference data accuracy, reliability, and regulatory compliance.
- Designed and published KPI dashboards in Power BI to provide stakeholders with real-time visibility of sprint progress, enabling transparent reporting and informed decision-making.
- Facilitated Agile delivery by implementing weekly Scrum ceremonies, driving backlog refinement, and closing knowledge gaps through continuous team coaching.
- Enhanced stakeholder engagement through regular status meetings and feedback forums, ensuring alignment of deliverables with business expectations.
- Introduced process improvements such as an internal contact management tool that reduced reliance on external data sources and streamlined stakeholder communication.
- Documented detailed user stories with acceptance criteria, prototypes, and business value, ensuring traceability from requirements to testing and delivery.
- Performed gap, scope, and impact analyses using modelling techniques (UML, BPMN, Visio, Lucidchart) to define AS-IS/TO-BE processes and identify optimization opportunities.
- Led a 14-member team in requirements elicitation through interviews, questionnaires, interface analysis, document analysis, brainstorming sessions, and focus groups.
- Partnered with cross-functional teams during development, integration testing, functional testing, and UAT, ensuring error-free delivery and seamless transition into BAU.

Broadridge Financial Services

May – 2017 to Aug - 2021

Associate Project Manager/Business Analyst

- Spearheaded the implementation of the settlement system (IMPACT) to extract and monitor real-time settlement status using IMAD references, significantly improving operational visibility and accuracy.
- Delivered a major enhancement that achieved 80% on-time trade matching and settlement, through rigorous reconciliation of internal and external data, and strengthening reference and static data governance.
- Led AS-IS vs. TO-BE analysis, driving business requirements elicitation and documentation, and translating them into actionable solution designs.
- Directed a team of 8 members, organizing and leading requirement-gathering workshops (interviews, questionnaires, interface/document analysis, brainstorming, and focus groups) to ensure complete coverage of business needs.
- Partnered with cross-functional teams across development, integration, functional testing, and UAT to deliver an end-to-end solution, ensuring full compliance with business and regulatory expectations.
- Coordinated UAT activities, validating sprint outputs and ensuring error-free client delivery through structured testing and issue resolution.
- Embedded data governance principles into settlement operations, enhancing decision-making, risk management, and overall control effectiveness.

JP Morgan Chase India Pvt Ltd

Apr – 2007 to Nov 2016

Operational Analyst

- Ensured accurate reconciliation of trade positions by validating static data attributes, coordinating with global agent banks, and resolving discrepancies through robust reference data controls.
- Coordinated large-scale securities transfers by validating reference data, static client data, and settlement instructions, ensuring alignment with market regulations and client requirements.
- Conducted comprehensive market restriction and eligibility checks, embedding static data validations to ensure smooth security transfers and regulatory adherence.
- Managed post-trade settlement activities with a focus on TMPG Claims, leveraging reference data to investigate, resolve, and prevent recurring discrepancies.

Education

- **MBA in Finance – Manipal University, Bangalore**
- **Bachelor of Commerce – Bangalore University, Bangalore**
