PROFESSIONAL SUMMARY

Full Stack Engineer (Backend-focused) with 2.3+ years building scalable fintech and distributed systems. Leading system design for a live crypto platform with 10,000+ users and 80,000+ daily events. Core expertise: Node.js, FastAPI, BullMQ, Redis, PostgreSQL, and AWS. Recently extended platform capabilities with a production RAG-based AI support chatbot LangChain, Gemini, Qdrant vector database deployed live on jaimax.com. Proven track record shipping end-to-end products from architecture to zero-downtime production deployments.

KEY ACHIEVEMENTS

- Reduced transaction failure rate by 30% — designed event-driven architecture with BullMQ, retry logic, and idempotency.
- Improved API response time by 50% and cut DB load by 40% — implemented Redis caching layer across high-traffic endpoints.
- Scaled platform to 10,000+ active users processing 80,000+ daily events — zero-downtime AWS infrastructure (EC2, ALB, VPC, CloudFront).
- Eliminated manual KYC verification entirely by building an OCR-based automated KYC validation system using Tesseract OCR / Google Cloud Vision across multiple verification workflows.
- Engineered three-phase JMC Mining System (Normal, Recovery, Resurrection) — zero revenue loss during any outage cycle.
- Sole engineer for JAIMAX FORCE HRMS — full backend, frontend delivered independently, used daily by the entire organization.
- Built production RAG AI support chatbot (LangChain, Gemini, Qdrant) — deployed live on jaimax.com, eliminating manual support queries with 24/7 instant AI responses.

TECHNICAL SKILLS

Core:	Node.js, FastAPI, BullMQ, Redis, PostgreSQL, MongoDB, AWS, React.js, Next.js
Languages:	JavaScript (ES6+), Python, HTML5, CSS3
Backend:	Express.js, REST APIs, MVC, Microservices, Event-Driven Systems, SOLID, ACID
Frontend:	React.js, Next.js, Tailwind CSS, Bootstrap, Redux Toolkit, RTK Query
Databases:	PostgreSQL, MongoDB, Redis, Cloud Firestore — Polyglot Persistence, H/V Scaling
Msg Brokers:	BullMQ, Redis Queues, Worker Threads, Cron Jobs, Event-Driven Architecture (DLQ, Retry, Idempotency)
Cloud/DevOps:	AWS (EC2, VPC, ALB, S3, CloudFront, SSM), Docker, CI/CD, Zero-Downtime Deployments, Git
Security:	JWT, OAuth 2.0, AES Encryption, DigiLocker KYC, OWASP Top 10, RBAC, Rate Limiting
Payments:	Razorpay, PhonePe, PayU, OCR Verification (Tesseract, Google Cloud Vision), Webhooks
Blockchain:	Smart Contracts, Custodial Wallets, Token Swaps, Web3.js, Ethers.js, MetaMask, Binance BEP20
Observability:	Distributed Tracing, Application Logging
Secondary:	WebSockets, Firebase (Auth, Firestore, Cloud Functions, Push Notifications), Formik, Yup, Mailgun, SendGrid, Amazon SES, AdMob
AI & LLM:	RAG (Retrieval-Augmented Generation), LangChain, Gemini API, Qdrant (Vector DB), Prompt Engineering, Embedding Pipelines, AI Chatbot Development
Tools:	Postman, Swagger, VS Code, GitHub, GitLab

PROFESSIONAL EXPERIENCE

Senior Full Stack Engineer | **GALAXY TECH SOLUTIONS PRIVATE LIMITED**

Jul 2026 – Present

AI Marketing & Business Agency Platform | Hyderabad | On-site

- Building Business AI, a monorepo-based AI marketing platform — a complete business & marketing agency solution for managing social media, campaigns, client workspaces, analytics, and team collaboration from a single platform.
- Built AI-powered content generation features — including AI poster and AI video generation — with LLM integration across multiple services.
- Building the Next.js frontend consuming Fastify-based backend microservices, with each service dedicated to a specific platform capability.
- Implemented individual and agency workspace switching — enabling users to move seamlessly between personal and agency-managed contexts.

Tech Stack: Next.js, Fastify, Node.js, Microservices, LLM Integration, AI Content Generation, REST APIs

Full Stack Engineer | JAISVIK SOFTWARE SOLUTIONS PRIVATE LIMITED

Apr 2025 – Jun 2026

Crypto Fintech | On-site | Promoted from Associate Web Developer

- Promoted to lead all system design, AWS infrastructure, and architecture decisions for the platform.
- Designed event-driven architecture with BullMQ, DLQ & retry logic → reduced transaction failures by 30%.
- Built Redis caching layer across APIs → cut DB load by 40%, response time by 50%.
- Engineered JMC Mining System (3-phase: Normal → Recovery → Resurrection) → zero revenue loss during outages.
- Designed J-Wallet custodial wallet — AES-encrypted key storage, BEP20 deposits, token swaps.
- Built OCR-based payment verification across Razorpay, PhonePe, PayU → eliminated manual reconciliation.
- Deployed highly available AWS stack (EC2, ALB, VPC, S3, CloudFront, SSM) — zero-downtime deployments.
- Built real-time internal community chat system using WebSockets — enabling live peer messaging across the platform.
- Integrated Firebase push notification system for mining status updates and real-time platform announcements — delivered instantly to all active users.
- Owned full product lifecycle — design, deployment, monitoring, and incident resolution.
- Built a production RAG-based AI customer support chatbot, LangChain, Gemini, Qdrant vector DB — developed as a live chat widget on jaimax.com for 24/7 automated user support.
- Sole engineer — owned full backend (REST APIs, DB schemas, auth, RBAC, payroll, PDF pipelines) and frontend.
- Built React.js + Tailwind CSS UI for HR, Admin, Manager, and Employee roles with granular access control.
- Integrated Firebase push notifications for real-time logout alerts and session-expiry warnings across all employee roles.
- Delivered: Attendance, Leave management, Payslip generation, dynamic letter PDF export, Feedback & Document modules.

Tech Stack: Node.js, FastAPI, BullMQ, Redis, PostgreSQL, MongoDB, AWS, React.js, WebSockets, Firebase, Ethers.js, Web3.js, LangChain, Gemini API, Qdrant

Associate Web Developer | JAISVIK SOFTWARE SOLUTIONS PRIVATE LIMITED

Apr 2024 – Mar 2025

Crypto Fintech | On-site

- Delivered end-to-end KYC, payments, dashboards, and backend automation for a live crypto product.
- Built DigiLocker KYC automation → real-time identity verification, Indian regulatory compliance.
- Integrated Razorpay & PhonePe — secure transaction handling, webhook processing, automated reconciliation.
- Designed BullMQ job queues with dedicated workers for mining ops, background tasks, and scheduling.
- Applied Redis distributed locking → eliminated race conditions in concurrent mining workflows.
- Migrated payment & order services from monolith to microservices with secure proxy routing.
- Built RBAC role dashboards, RTK Query API integrations, and dynamic PDF reporting UI.

Tech Stack: Node.js, Express.js, BullMQ, Redis, MongoDB, PostgreSQL, React.js, RTK Query, DigiLocker API

Full Stack Developer | DIGITALLY VIBE

Sep 2024 – May 2026

Digital Technology Agency | Remote | Self-employed

- Designed and shipped College Circle (MERN) and Thrivewell Healthcare (Next.js) from architecture to production.
- College Circle: Firebase Auth, Cloud Functions, real-time sync, RBAC, Redux/RTK — live at collegecircle.cc.
- Thrivewell: SEO-optimized Next.js platform with Firestore real-time admin dashboard — live at thrivewell-healthcare.in.
- Enforced OAuth 2.0, protected routes, secure API communication, and CI/CD pipelines throughout.

Tech Stack: React.js, Redux/RTK, Next.js, Node.js, Express.js, MongoDB, Firebase Auth, Firestore, Cloud Functions

KEY PROJECTS

► Jaimax Coin – Crypto Ecosystem & Automation Platform (JAISVIK SOFTWARE SOLUTIONS PRIVATE LIMITED)

- 10,000+ active users • 80,000+ daily events • Razorpay, PhonePe, PayU multi-gateway payments.

- J-Wallet: AES-encrypted custodial wallet, BEP20 deposits, token swaps • failures reduced by 30% via event-driven BullMQ architecture.
- Real-time internal community chat via WebSockets • Firebase push notifications for mining updates and platform announcements.
- Full observability: Prometheus, Grafana, Loki, Promtail • Zero-downtime AWS deployment.

Tech Stack: Node.js, BullMQ, Redis, PostgreSQL, MongoDB, AWS (EC2, ALB, VPC, S3), React.js, WebSockets, Firebase, Web3.js

Live: <https://www.jaimax.com>

► Jaimax AI Customer Support Chatbot — RAG Pipeline (JAISVIK SOFTWARE SOLUTIONS PRIVATE LIMITED)

- Built a production RAG-based AI customer support chatbot deployed as a live chat widget on jaimax.com — handling user queries on platform FAQs, wallet usage, mining, and payment support.
- Architected the full RAG pipeline using LangChain + Gemini — document ingestion, chunking, embedding generation, semantic retrieval via Qdrant vector DB, and response synthesis.
- Built FastAPI backend to serve the RAG pipeline with streaming responses — integrated as a React.js chat widget live on the platform, available 24/7 to all users.
- Eliminated repetitive manual support queries — instant AI-powered answers grounded in verified Jaimax documentation with zero hallucinations via Qdrant semantic retrieval.

Tech Stack: Python, FastAPI, LangChain, Gemini API, Qdrant, React.js, Prompt Engineering, Embedding Pipelines

Live: <https://www.jaimax.com>

► Jaimax Force — Internal HRMS Portal (JAISVIK SOFTWARE SOLUTIONS PRIVATE LIMITED)

- Sole engineer (backend, frontend) — REST APIs, RBAC, payroll engine, PDF generation — entire org uses it daily.
- Modules: Attendance, Leave, Payslip, Salary, Letter generation (PDF), Feedback, Document verification.

Tech Stack: Node.js, Express.js, React.js, Tailwind CSS, MongoDB, PostgreSQL, Redis, JWT

Live: <https://www.force.jaimax.com>

ADDITIONAL PROJECTS

► College Circle — Student Collaboration Platform

- Cross-institution MERN platform: resource sharing, communities, real-time messaging, event discovery.
- Firebase Auth, Cloud Functions, RBAC (student/contributor/admin), Redux/RTK, optimized MongoDB schemas.

Tech Stack: React.js, Redux/RTK, Node.js, Express.js, MongoDB, Firebase Auth, Firebase Cloud Functions

Live: <https://www.collegecircle.cc>

► Thrivewell Healthcare — Full Stack Web Application

- Next.js healthcare platform — appointment booking, SEO-optimized interface, real-time Firestore admin dashboard.
- Fast load times, clean UI/UX, scalable architecture for reliable digital healthcare delivery.

Tech Stack: Next.js, Firebase Firestore, Tailwind CSS, Firebase Cloud Functions

Live: <https://www.thrivewell-healthcare.in>

EDUCATION & LANGUAGES

B.Tech — Computer Science & Data Science Engineering

2020 – 2024

Narsimha Reddy Engineering College, Hyderabad | **CGPA: 7.27 / 10**

Languages: English (Professional) • Telugu (Native) • Hindi (Conversational)

SOFT SKILLS

Problem Solving • System Thinking • Communication • Time Management • Adaptability • Leadership • Active Listening
