SUMMARY

Experienced professional with 5+ years overall, including nearly 2 years and 11 months as a QA Test Engineer skilled in manual and automation testing. Currently, I am working as a Business Analyst, utilizing 1 year and 2 months of specialized experience in gathering and analyzing requirements to develop effective business solutions. Known for attention to detail and effective collaboration with cross-functional teams.

KEY COMPETENCIES

- Manual & Automation Testing
 - Business Requirement (BRD)
 - Functional Requirement Docs (FRD)
 - End-to-End Process Validation
 - SOAP & REST API Testing
 - JIRA & Confluence for Sprint Management
 - SQL for Data Verification
 - Test Case Design & Execution
 - Cross-Functional Collaboration
-

PROFESSIONAL EXPERIENCE

SPEKOND TECHNOLOGIES

Nov 2024 - Present

Business Analyst

- Gathered and analyzed client requirements through stakeholder meetings.
- Developed BRD and FRD documents tailored to client needs.
- Communicated requirements to development and QA teams.
- Managed User Stories and project tasks in JIRA.
- Led cross-functional teams and daily stand-ups to monitor progress.
- Conducted unit testing and ensured compliance with requirements.
- Maintained ongoing client communication for requirement updates.
- Managed Requirements Traceability Matrix (RTM) for complete coverage.
- Performed and documented SOAP API testing and integration.

Aroha Technologies QA

Jun 2021 - May 2024

Test Engineer

- Developed and maintained automated test scripts using Selenium WebDriver and Python.
- Executed automated test cases to ensure software quality.
- Tested REST APIs with Postman for endpoint and data validation.
- Analyzed test results and reported issues to development teams.
- Used SQL for database validation and verification.
- Troubleshoot and debugged automated test failures.
- Managed test cases and defects using JIRA.
- Collaborated with developers, product managers, and analysts.
- Participated in requirement reviews, assessing testability and risks.
- Supported QA process improvements and best practices.

Imarticus Learning

Jan 2021 - Mar 2021

Career Advisor and Grade Analyst

- Managed below-the-line (BTL) marketing activities to drive outreach and engagement.
- Conducted cold calls to promote data science-related courses and successfully converted inquiries into qualified leads.
- Worked in a target-driven environment, consistently meeting monthly performance goals.
- Clearly explained the importance of skill development to users and guided them on suitable career paths.

Marketing and Web designer

- Designed promotional pamphlets for a self-defense organization using CorelDraw to enhance brand visibility.
 - Created engaging social media content and managed uploads to promote the organization online.
 - Developed branding materials including logos, certificates, and bag designs to support marketing initiatives.
 - Coordinated with multiple vendors to gather quotations and identify cost-effective options for production
-

TECHNICAL SKILLS

Requirement Management	:	BRD, FRD, RTM, Use Cases, User Stories
Project Management	:	JIRA, Confluence, Agile Scrum
Testing	:	Manual and Automation
Programming	:	Python
API Testing	:	SOAP and REST
Database	:	MySQL
Version Control	:	GitHub
Operating System	:	Windows
AI Testing	:	Prompt Engineering

DOMAIN KNOWLEDGE & PROJECTS**PROJECT: COMPLAINT****DESCRIPTION**

Compliance domain application designed for organizations to manage and track their compliance readiness. The application supports subscription-based access, allowing users to take assessments, upload relevant documents, and receive AI-driven analysis to evaluate compliance levels and identify gaps. The system also facilitates automated generation of policy documents based on assessment outcomes and uploaded content.

RESPONSIBILITIES

- Gathered and analyzed client requirements and documented them in Functional Requirement Documents (FRD) and Business Requirement Documents (BRD).
- Translated requirements into user stories, use cases, and tasks for development and QA teams.
- Facilitated requirement walkthroughs and ensured clear understanding across cross-functional teams.
- Conducted manual testing of the application to validate features against defined requirements.
- Managed and led daily stand-up meetings, ensuring effective team collaboration and progress tracking.
- Handled Jira sprint planning, including backlog grooming, task assignment, and sprint reviews.
- Participated in client meetings, gathered feedback, and ensured timely updates and revisions were communicated to the team.

PROJECT: BIOMETRIC

DESCRIPTION

Biometric verification application for MM business, focused on enhancing security through voice and facial recognition. Gathered and analyzed requirements, collaborated with stakeholders, and defined functional specifications to support secure and seamless user authentication.

RESPONSIBILITIES

- Gathered and analyzed client requirements and documented them in Functional Requirement Documents (FRD) and Business Requirement Documents (BRD).
- Translated requirements into user stories, use cases, and tasks for development and QA teams.
- Facilitated requirement walkthroughs and ensured clear understanding across cross-functional teams.
- Conducted manual testing of the application to validate features against defined requirements.
- Managed and led daily stand-up meetings, ensuring effective team collaboration and progress tracking.
- Handled Jira sprint planning, including backlog grooming, task assignment, and sprint reviews.
- Participated in client meetings, gathered feedback, and ensured timely updates and revisions were communicated to the team.

PROJECT: TRAVEL AGENCY

DESCRIPTION

The flight booking application, developed for clients Fly High and MSC Cruises, is tailored specifically for travel agencies to streamline ticket reservations. It supports multiple user categories including general passengers, marine personnel, army staff, and crew operators, each with customized booking workflows, fare rules, and document requirements to meet their unique needs.

RESPONSIBILITIES

- Gathered and analyzed client requirements and documented them in Functional Requirement Documents (FRD) and Business Requirement Documents (BRD).
- Translated requirements into user stories, use cases, and tasks for development and QA teams.
- Facilitated requirement walkthroughs and ensured clear understanding across cross-functional teams.
- Conducted manual testing of the application to validate features against defined requirements.
- Managed and led daily stand-up meetings, ensuring effective team collaboration and progress tracking.
- Handled Jira sprint planning, including backlog grooming, task assignment, and sprint reviews.
- Participated in client meetings, gathered feedback, and ensured timely updates and revisions were communicated to the team.
- Performed SOAP API testing, identified issues, and documented test results and API specifications.

PROJECT: E-PROCUREMENT

DESCRIPTION

Procure to Pay (P2P) is an integrated process that manages the procurement and payment of goods and services. It starts with identifying needs and ends with payment to the supplier. Key steps include requisitioning, purchasing, receiving, invoicing, and payment. This process aims to ensure efficiency, compliance, and cost-effectiveness in managing a company's procurement activities.

RESPONSIBILITIES

- Collaborated with stakeholders to gather requirements and ensure alignment with business needs.
- Designed and executed automated test scripts using Selenium to streamline regression and functionality testing, significantly reducing testing time.
- Conducted thorough analysis of test results, identifying trends and areas for improvement to enhance Product quality
- Participated in user acceptance testing (UAT) to validate functionality against user requirements.

PROJECT: EDUCATION TECHNOLOGY

DESCRIPTION

Worked on an experiential learning platform that bridges skill gaps for graduates by identifying industry- required skills and designing tailored boot camps. It assesses college curricula to create bridge programs that up skill candidates according to employers' needs. Integrated with iCapability, iLearn, and iProductivity, the app allows users to register and enroll in skill-building programs. Admins can add mentors, service providers, and create various programs.

RESPONSIBILITIES

- Automated testing processes using Selenium and Python, improving testing accuracy and efficiency across multiple iterations.
- Integrated testing with APIs using Postman, ensuring the reliability and functionality of service interfaces.
- Collaborated with product managers and developers to identify critical testing paths and enhance overall user experience.
- Facilitated feedback sessions to refine testing strategies and methodologies based on user input and performance metrics.

PROJECT: ENERGY EFFICIENCY

DESCRIPTION

The UK's commitment to achieve net-zero carbon emissions by 2050 requires reducing heating emissions, facilitated by effective home insulation in walls, floors, and roofs. The ECO Green Deal replaces earlier schemes, offering grants, loans, and subsidies to enhance energy efficiency in homes. Energy companies like IEO serve as intermediaries, assisting homeowners in qualifying for government-funded boiler replacements or upgrades to support these environmental goals.

RESPONSIBILITIES

- Conducted comprehensive Smoke and Functional Testing to validate application functionality and user requirements.
- Engaged in Regression Testing and issue resolution, utilizing Jira for effective bug tracking and reporting.
- Worked closely with cross-functional teams to ensure timely delivery of features while maintaining high-quality standards.
- Prepared detailed test execution reports and participated in daily status calls with stakeholders to communicate progress and roadblocks.

EDUCATION

Master of Computer Application Jan 2026

Majors: Computer Science and Information Technology

Bachelor of Science

Majors: Computer Science

EXTRACURRICULAR ACTIVITIES

Black Belt in Karate
