TECHNICAL SKILLS

- **Testing Tools** : TOSCA,UFT
- **Test Management Tool** : ALM, JIRA
- **Scripting Languages** : VB Script, Descriptive Programming, Groovy.
- **Data Base** : SQL server

PROFILE SUMMARY

- Overall 4+ years of experience in **Automation Testing** with strong technical skills using **TOSCA, UFT, SAP Automation** and also involved in **Manual Testing**.
- Expertise experience **UFT/QTP Automation, TOSCA Automation, SAP MM, FICO, S/4 HANA and Katalon Studio**.
- Created Modules in **TOSCA** for different Applications using **XSCAN/TOSCA**
- Test Automation of **GUI & Non-UI Applications, Excel,XML,API,Web Services** applications using **TOSCA**
- Worked with all Modules of **TOSCA** like **Modules, Test Cases, Requirements, Test Case Design and Executing Lists**
- Understand the functional flow and automate the web-based and Desktop Applications using **TRICENTIS TOSCA Test Suite** Extensive Experience **Sanitary Testing, Regression Testing and Smoke Testing**
- Experience In **VB Script and Descriptive Programming**
- Framework which I worked and designed includes **Hybrid framework (Functional, Keyword and Data driven framework)**.
- Developing, maintaining and enhancing **automated scripts using QTP/UFT**.
- Expertise in automation testing of Web, Window, desktop and mainframe applications.
- Hands of experience in **BFSI Domains**
- Worked on **Agile & Scrum** development environment
- Performed **functional, Automation and Regression** including monitoring of test progress and providing test reporting,
- Experience on **Functional Testing, System Testing, and Regression testing, Integration testing** and End to End Testing.
- Defining and implementing program **Test plans and Defect management**,
- Exposure to all stages of **SDLC & STLC**.
- Proficiency in **Test Case writing and executing**.
- Having experience on Tools Like **ALM, JIRA**
- Experience in on **SQL Server**

EDUCATION HISTORY

B. Tech from PRESIDENCY UNIVERSITY - 2022

WORK EXPERIENCE

- Worked for **IBM INDIA PRIVATE LIMITED** as a software Test Engineer from - **August 2022 to April 2025**
- Worked as Software Test Engineer in **Deloitte USI** from - **June 2025 – April 2026**

PROJECT :1

Project : **One Report**
Client : **Bank of Hawaii**
Role : **Software Test Engineer**
Testing Process : **TOSCA Automation**
Environment : **C#.Net, SAP MM, FICO, SAP S/4 HANA.**

Description:

One Report system is a comprehensive corporate and small business banking solution providing a single unified view of the corporate banking relationships across asset and liability products, limits, trade finance and cash management. Corporate customers of the bank gain the flexibility to view details of each account, capability to make Inter-bank and Intra-bank payments, access to trade finance information and transactions, and the ability to perform cash management activities. This also supports comprehensive authorization workflow, Transaction Limits, Electronic Invoice Presentment and Payment (EIPP) and Corporate Administration.

Responsibilities:

- Lead, Manage and Drive QA teams in **Agile methodology**
- Generated the Generic **Test Scripts\Functions** for re-using across the project
- Created Modules in TOSCA for different applications using XSCAN/TOSCA Wizard
- Development of Regression Suite on thin client/Thick client the test cases using TOSCA
- Test Automation of GUI&NON-UI Applications
- Development of Regression Suite on thin client/Thick client the test cases using **TOSCA**
- Monitoring of All Interfaces which are related to **SAP FI**
- **IHC-SEPA** Payments-Non SEPA Payments-Collection and Payment
- Involved in Analysis for **TRM**
- Asset Integration with **GL Accounts, Creation of Asset Master and Sub Asset Master**
- Involved Automation Framework Concept of Data-Driven framework in TOSCA
- Created Automation test framework using TOSCA

PROJECT :2

Project : **DUR**
Client : **Medco, U.S**
Role : **Software Test Engineer**
Testing Process : **UFT Automation**
Environment : **Java, Mainframes-Rumba, Windows XP.**

Description:

Drug Utilization Review – It is an application where every claim passes through for review. DUR process determines whether or not a drug in a prescription meets specifications for use as detailed in rules. Rules (Provided by Clinical Rule Station) generally are of a clinical or financial basis. As a result of meeting a condition, a claim may be rejected or a warning produced or passed.

Responsibilities:

- Understand the User Stories
- Lead, Manage and Drive QA teams in **Agile methodology**
- Generated the Generic **Test Scripts\Functions** for re-using across the project
- Building Share Object Repository.
- Updating daily and Weekly Status on **Jira**
- Converting User Stories in to **Automation Scripts.**
- Participated in Peer-Reviews for Automation Scripts.
- Executing the Automation scripts using UFT for Regression Cycle

- Involved in creation of detailed test plans test cases and test scenarios for different application modules according to functional requirements and business specifications
 - Attending Weekly Status calls and sending the status report to the Manager.
-

PROJECT :3

Project : **Personal Umbrella**
Client : **EXIDE**
Role : **Test Engineer**
Testing Process : **Manual Testing**

Description:

- Umbrella insurance is extra liability insurance. It is designed to help protect you from major claims and lawsuits and as a result it helps protect your assets and your future. It does this in two ways:
- 1.Provides additional liability coverage above the limits of your homeowners, auto, and boat insurance policies. This protection is designed to kick in when the liability on these other policies has been exhausted.
- 2.Provides coverage for claims that may be excluded by others.

Responsibilities:

- During the initial Phase I was involved in understanding the Business Requirements and Use Cases.
 - Generating the Test cases from the Use Cases.
 - Involved QA teams in Agile methodology in Product based company
 - Execution of test cases and defect reporting.
 - Prepared the test data for the manual test case execution.
 - Prioritized, evaluated, monitored defects and Analyzed Defect History.
-

PROJECT : 4

Project : **Canada Post**
Client : **Innova Post**
Role : **Test Engineer**
Testing Process : **UFT Testing /API testing/ Functional Testing**

Description

Canada Post is Canada's primary Crown postal operator, serving over 16 million addresses nationwide. **Innova Post** served as the dedicated IT shared services provider delivering technology solutions to support postal operations. The project involved end-to-end quality assurance of EST Online and EST 2.0 — enterprise mailing platforms supporting **domestic and international shipments** for individual and business customers. The platforms handled various mailing types catering to a wide range of customer needs across the **Canadian postal ecosystem**.

Responsibilities:

- Led a team of 3 offshore QA engineers and acted as the direct liaison between 6 offshore developers and the QA function, ensuring efficient communication of defects, test outcomes, and blockers.
- Performed **Regression, Sanity, Functional, and API Testing** across EST Online and EST 2.0 using **UFT, Katalon Studio, Postman, Ready API**.
- Logged and tracked all **bugs and defects** in **JIRA** with appropriate priority and severity tagging for timely resolution.
- Served as the primary QA resource for a major **Java 8 to Java 11 Security upgrade**, executing the full regression suite and reporting several critical production-impacting defects.
- Played a key QA role in the **De Minimis tariff change** project, validating updated trade threshold calculations between USA and Canada.
- Conducted monthly **Blue/Green** deployment landing tests in production and performed post-deployment validation to ensure all functionalities were working as expected.
- Attended **daily Scrum stand-ups**, participated in **sprint planning**, and provided **weekly status reports** to the QA lead and project manager.
