Business Analyst || Project Management || Scrum Master

[vibhued@gmail.com](mailto:vibhued@gmail.com) 

Bringing extensive experience in Business Analysis and Quality Assurance in Financial Services, with a proven record of delivering Agile-driven, stakeholder-centric solutions for leading UK banks like Lloyds and HSBC on the client side. Targeting a hybrid role as a Business Analyst, Project Manager or Scrum Master to contribute to agile-led transformation in dynamic financial environments.

## PROFILE SUMMARY

- Dynamic Business Analyst with over 8 years of domain expertise, backed by 14 years of professional experience, leading regulatory, digital, and business change initiatives across Tier 1 UK clients in Life & Pensions, Insurance, and Banking sectors.
- Showcased excellence in end-to-end requirements elicitation, gap analysis, and stakeholder engagement, translating regulatory mandates into actionable business solutions using industry-standard methodologies.
- Proficient in driving FCA-compliant implementations such as Fund Closures, Remediation, PPI, Plevin Commission and Customer Communication programs—ensuring adherence to quality benchmarks and audit readiness.
- Proven capability to lead business process re-engineering initiatives, design 'as-is' and 'to-be' process maps, and facilitate impact assessments and option analysis to guide senior stakeholder decision-making.
- Expertise in Agile and Waterfall methodologies, with proficiency in JIRA, SharePoint, RAID/RACI framework and cross-functional team coordination across onshore/offshore delivery models.
- Delivered critical change projects on digital platforms like TCS BaNCS and Mainframes, supporting migration programmes, actuarial updates and compliance-driven MI reporting.
- Recognized as a collaborative change enabler with excellent interpersonal and communication skills; consistently drives business value through structured analysis, documentation excellence & post-implementation support.

## CAREER TIMELINE

## ACHIEVEMENTS

- Spearheaded business analysis for critical Fund Management and fund closure changes on TCS BaNCS for Lloyds Banking Group, ensuring timely and accurate delivery across SDLC phases.
- Delivered end-to-end business requirements for FCA compliance and regulatory change initiatives including National Minimum Pension Age Updates, PPI, Plevin Commission, payments and Lifestyle Remediation.
- Authored detailed functional and non-functional requirements, health check scripts & process maps outlining current and future state customer journeys.
- Led Project Working Groups (PWGs), facilitating artefact analysis using GAP Analyse, Stakeholder Workshops, Business Cases BRD, FRD, Used Cases, User Stories, Roadmaps and Process Flowchart to drive actionable outcomes & project clarity.
- Enabled informed decision-making by preparing option papers, business proposals, and effort estimates for strategic project investments.
- Built strong Risk & Compliance Teams across business, IT, actuarial, operations and compliance teams in a high-performing onshore-offshore delivery model.

## Senior Business Analyst Allegis Group (Client: HSBC)

Jul 2025 – Present

Project: Global Markets Regulatory Reporting Automation

### Key Responsibilities

- Working as Senior Business Analyst supporting Global Markets Regulatory Reporting transformation and automation initiatives.
- Conducting requirement gathering workshops with Regulatory Reporting SMEs, Operations, Risk, Data Governance and Technology teams.
- Preparing Business Requirement Documents (BRD), Functional Requirement Documents (FRD), User Stories, Process Flows, Data Mapping Documents and Impact Assessment reports.
- Creating end-to-end data flow diagrams for regulatory reports by identifying source systems, upstream/downstream dependencies, data refineries, transformation layers and reporting platforms.
- Performing detailed analysis of regulatory reporting processes to identify automation opportunities, process gaps, control weaknesses and data quality issues.
- Collaborating with business and technology teams to define future-state reporting processes and automated reporting solutions.
- Supporting change management and business readiness activities including stakeholder communications, governance updates and implementation planning.
- Managing RAID logs, requirement traceability, action trackers and governance reporting.
- Coordinating SIT, UAT, defect management, release readiness and post-production support activities.
- Preparing executive-level governance packs, project status reports, risk assessments and progress updates for senior leadership.
- Supporting strategic automation initiatives to improve reporting accuracy, operational efficiency and regulatory compliance across Global Markets functions.

Aug'22 – Present | Business Analyst | Diligenta UK, Peterborough, UK (Subsidiary of TCS)

Clients: Scottish Widows/LBG | Domain: Life, Pensions & Annuities

### Key Result Areas:

- Producing detailed business requirements using the MoSCoW model, conducting risk assessment sessions, and creating RAID logs to manage project risks effectively and ensure smooth project execution.
- Delivering key projects such as Fund Closures, Fund Name Changes, Actuarial Changes, FCA/Pension Regulatory Projects, Customer/IFA/Trustee Mailings, Lifestyle Remediation, Migration Support, and MI for Vulnerable Customers.
- Conducting requirement workshops with business users, Ops SMEs, IT teams, actuaries and finance SMEs, while collaborating with Client BAs, PMs, Docs Team, IT and BAT/UAT teams to deliver a cohesive change portfolio.
- Preparing detailed training materials and user guides for system and process changes, planning Go Live support, and facilitating post-implementation training for both business and system users.
- Leading end-to-end business analysis activities by capturing, refining, and translating business needs into clear user stories and functional requirements.
- Collaborating with senior stakeholders, product owners and cross-functional teams to define project scope, KPIs & deliverables.
- Facilitating Agile ceremonies including daily stand-ups, sprint planning, and retrospectives to ensure team alignment and delivery efficiency.
- Driving process improvement initiatives by identifying gaps, mapping current workflow & recommending optimization strategies.
- Conducting feasibility studies & impact assessments to evaluate business readiness and regulatory implications of proposed changes.
- Preparing dashboards and analytical reports to provide visibility into project health, risks, and decision-support metrics.
- Supporting data governance efforts by validating data quality, lineage, and compliance with organizational standards.
- Mentoring junior analysts and contributing to the continuous improvement of business analysis frameworks and best practices.
- Acting as a domain SME across multiple projects, offering guidance and ensuring consistency in requirements and solutions.

May'19 – Jul'22 | Quality & Business Analyst | Equinity Paystream, UK

Clients: HSBC & LBG

Sep'17 – Sep'18 | PPI Complaints Officer | Cordant People UK, Bristol, UK

Client: HSBC | Domain: Banking, Insurance & Pensions

### Key Result Areas:

- Assessed and documented the customer side of change (CSOC) and people side of change (PSOC) for multiple upgrades and initiatives involving Mortgages, Credit Cards, Loans, and Insurance products.

- Delivered key projects including:
  - Premium Refund Calculations system update
  - KYC & CDD (Customer Due Diligence)
  - Plevin Commission & PPI Regulatory Change
  - Data Subject Access Request (DSAR)
  - ONTU Project (Offer Not Taken Up)
  - Batch Run Optimisation projects on legacy platforms
- Facilitated project working group (PWG) sessions, collaborated with IT and Business SMEs, and contributed to baseline requirement finalization and design documentation.
- Supported the Quality Assurance team in drafting test design specifications and conducted thorough reviews and approvals of business, functional, and non-functional test outputs.
- Generated weekly/monthly Management Information (MI) reports for senior stakeholders to track status, risks & progress.
