SUMMARY & CAREER OBJECTIVE

Finance professional with 1.10 years of experience in OTC Derivatives, specializing in settlements IRP, FX and CD. Experienced in end-to-end trade lifecycle management and collaborating with global stakeholders while ensuring operational accuracy, risk control, and compliance. Seeking to contribute my analytical and operational expertise in a growth-oriented organization.

RELEVANT EXPERIENCE

eClerx

September 2024 - July 2026

Financial Analyst (Full-time)

- Managed the end-to-end trade lifecycle and settlement processing for OTC derivatives, including **IRP, FX, and CD**. Processed **100–200+** trades daily while ensuring operational accuracy, timely execution, and adherence to settlement deadlines.
- Maintain positive and professional relationships with External Clients & Client Service (Customer Relation) Management.
- Ensure completion of BAU tasks, activities and operational deliverables within daily, weekly, monthly and quarterly deadlines
- Collaborated with **Front office, middle office, legal and counterparties** to resolve the trade economic and non-economic discrepancies, minimize trade breaks and ensure timely settlement.
- Created SOPs and structured training material for onboarding, reducing training time and improving domain knowledge transfer.
- Maintained dashboards to track settlement status, pending items, and key operational metrics.
- Prepared and maintained **daily/monthly reports** ensuring accuracy and timely delivery to stakeholders.
- Managed large datasets, ensuring data integrity, completeness, and compliance with internal guidelines.
- Automated and optimized reporting processes, improving efficiency and reducing manual errors.
- Assisted in UAT testing for system enhancements and new process implementations related to derivatives processing.
- Actively participated in knowledge sharing and cross-training within the team to improve overall productivity.
- Proactively identified potential settlement risks around cut-off breaches and implemented corrective actions.

ACADEMIC PROJECTS

Cpm and Pert in project management

February 2023 - March 2023

- Worked in a team to understand the network diagrams to map project activities.
- Calculated expected project duration and identified critical paths to optimize scheduling.
- Presented findings with recommendations to improve project planning and resource allocation.

Portfolio Management Services

August 2022 - September 2022

- Designed and managed a mock investment portfolio across equity instruments.
- Performed fundamental and technical analysis to select securities based on risk-return objectives.
- Monitored portfolio performance using key financial ratios and market benchmarks.

TECHNICAL SKILLS

MS Office Suite (Word, PowerPoint, Excel), Variance Analysis, Trade Lifecycle Management (Confirmation to Settlement), Cash & Securities Matching
