

Professional Summary

Data Governance and Management professional with **5.9 years** of experience **driving data governance, data quality, metadata management, data lineage, and regulatory compliance initiatives** across **banking and enterprise environments**. Experienced in **implementing governance frameworks, activating Critical Data Elements (CDEs), supporting GDPR-aligned data classification and lifecycle management**, and **partnering with cross-functional stakeholders** to strengthen data-driven decision-making and risk management.

Employment History

American Express

Data Governance & Management Analyst

Aug 2024 - June 2026

Governance & Program Leadership

- Collaborated with **business stakeholders, data owners, and technology teams to identify systems of record, critical data elements, and source application dependencies** for enterprise data governance initiatives.
- Supported **source-to-target mapping activities by documenting source system attributes, business definitions, transformation logic, and downstream reporting requirements**.
- Maintained **metadata, lineage, and traceability documentation within governance platforms**, enabling transparency across data flows and supporting audit and compliance requirements.
- Partnered with **data engineering and product teams to validate data requirements**, resolve data definition discrepancies, and ensure alignment between business and technical specifications.
- Coordinated **data readiness activities, including test data identification, data validation support, and stakeholder sign-offs, enabling parallel development and testing activities**.
- Developed and maintained **governance artefacts including business glossaries, data dictionaries, lineage records, data quality inventories, and evidence documentation packs**.
- Facilitated **governance reviews and change management processes** to ensure data requirements, mappings, and lineage records remained current and compliant with organizational standards.

Risk & Escalation Management

- Conducted **Risk & Control Self-Assessment (RCSA)** in collaboration with Control Management, strengthening control clarity and risk visibility.
- Drove resolution of cross-functional escalation issues, aligning with impacted Directors and reducing activation delays

Process Ownership & Transformation

- Designed and standardized SOPs for Data Catalog Assessment process, improving documentation integrity and review discipline.
- Implemented Airtable-based intake automation and workflow enhancements, improving operational efficiency and reducing manual follow-ups.
- Presented process enhancements and operational efficiency opportunities in governance forums including micro-learning series prototype, operational efficiency work allocation, Excel based dashboard for Data catalog review request.

Capgemini

Associate Consultant

Sept 2021 - July 2024

HSBC – UK & AMEA Regulatory Reporting (DUSE-3 Data Discovery)

- Executed **end-to-end Data Discovery for IRR-PRA and IRR-ASP** prioritized **~1000 CDEs** under DUSE framework.
- Performed **lineage documentation, metadata management, and regulatory traceability in Collibra** by performing **data tagging, stitching**.
- Partnered with **Data Owners, Process Owners, and IT** to discover Data Quality controls, providing visibility to data-related risks to leadership.
- Appointed to **manage & provide updates** for team of **6 analysts via JIRA**, improving POD productivity by 20% to team lead.

Securitas – Global Data Governance Programs (2 Projects)

- Conducted **current-state data governance assessment** and contributed to **drafting policies and standards** later adopted globally for **Data privacy and security** and Data sharing globally.
- Authored **BRDs and technical specifications** to support structured governance implementation.
- Created **Collibra Marketplace** and supported the **decommissioning of data warehouse** and adoption of **data lake** with the **drafting medallion structure for data access control**.
- Supported **GDPR compliance** efforts by **classifying customer data assets, defining retention and deletion schedules, recommending data handling controls, and documenting privacy requirements** for enterprise data governance implementation.

Skills

- Data Governance & Stewardship
- Data Quality Management
- Metadata Management & Data Lineage
- Regulatory Compliance (GDPR, CCPA, BCBS 239, IRR, IRR-PRA)
- Business Glossary & Data Catalog Management
- Stakeholder Collaboration & Cross-Functional Leadership
- Data Privacy & Security
- Collibra, Manta, Qalibrate, Airtable
- Process Automation & Workflow Optimization

Tools

AI literacy:-

- EU AI Act
- Prompt Engineering
- ChatGPT - Custom GPTs and Brainstorming.
- Canva AI
- Lovable

Core (Data Governance & Quality):

- Collibra - Data Catalog, Metadata Management, Stewardship
- Manta - Data Lineage
- Qalibrate - Data Quality
- Visio
- Airtable

Supporting (Project & Process Enablement):

- JIRA - Project & Task Management
- Airtable - Process Automation & Tracking
- Confluence- Knowledge Sharing
- RCSA- Closure of MAP 1.13
- Qlik sense

Education

Bachelors of Commerce(Hons)

2016-2019

Jagannath International Management School, Kalkaji
(GGSIPU)

Trainings/Certifications

- Future of AI by BlueDot Impact
- Master of Claude by Coursiv.
- Introduction to Claude Cowork by Anthropic
