Employment History

London Stock Exchange Group (LSEG):

DaaS (Data-as a- Service) – London, UK

Nov 2023 - Feb 2025

Sr. Manager - Business Analyst

Project - Bulk Data Feeds generation and Distribution capability

Domain – DaaS (Data-as a- Service)/Data Product.

DaaS - It is the data that is available in the DaaS Platform and has been published as a Product. Data as a Product is the product management principles to data with focus on ownership, usability, and quality.

- This includes building the Bulk Data feeds generation and distribution capability via **Microsoft Purview** and **Microsoft Fabric applications** to address data usability issues.

- Files are retrieved via a series of API endpoints that allow clients to request data on a frequency that meets their needs. The two data file types are:
 - Request initialization files
 - Request incremental files
- Generate initialization and incremental files for each bulk data feed product when updated data is received from **MS Purview**.
- These queries are saved, and then run at pre-defined times in **MS Fabric**, and the resulting files stored in **Azure Cloud Storage**.
- Clients would make API calls to request initialization or incremental updates to the Bulk Data Feed products that they have subscribed to, and the API would return URLs of the file generated by the above process to the client.
- The client would access the URLs and download the desired files locally into their system.

Responsibilities:

- Check for the initialization files and initialization files within Blob storage in MS Fabric
- Run the Blob Storage Reader pipeline for latest version of the data files.
- Remove the older versions of the files in Manifest Lakehouse in MS Fabric.
- Run the Query_Builder_Output Pipeline under Query_Builder_Output Lakehouse.
- When the query runs successfully, would generate the URLs that the customer can access for the subscribed data products.
- Working directly with the Product Manager and assisting to maintain **Product Backlog, Sprint Planning, Daily Stand Up**.
- Participated in **Scrum**, and **Sprint Ceremonies - Retrospective Meetings**.

Unisys:

Job Service North Dakota (JSND) – North Dakota, USA May 2021 – Oct 2023

Lead Business Analyst

Project - JSND - Unemployment Insurance Modernization

Domain – Unemployment Insurance claim processing
