PROFESSIONAL EXPERIENCE

Senior Business Analyst — India INX (India International Exchange, IFSC) Ltd. May 2026 – Present

Project: BlackRock Global Mutual Fund Onboarding

Leading complete business analysis and solution design for onboarding global mutual funds into India's international investment ecosystem through India INX.

- Led end-to-end onboarding journey design for Global Mutual Funds, coordinating across domestic and international stakeholders.
- Gathered and documented business requirements from internal and external stakeholders through structured workshops and interviews.
- Prepared BRDs, FRDs, Functional Specifications, User Stories, RTM, Process Flows, and supporting business documentation.
- Designed the Investor Onboarding Journey and Distributor / Sub-Distributor onboarding workflows.
- Defined KYC, AML, and Due Diligence processes for investor onboarding.
- Designed Order Aggregation logic for Purchase, Redemption, and Switch transactions.
- Designed end-to-end Fund Flow across Investors, Distributors, Standard Chartered Bank, India INX, JP Morgan, EBIX, and Global Fund Houses.
- Led API integration efforts with Calastone and multiple external systems.
- Designed Holdings Allocation process through EBIX and defined Order Management workflows.
- Designed reconciliation processes covering Order, Fund, Holdings, and Unit Allocation reconciliation.

- Prepared comprehensive UAT test cases and supported SIT/UAT execution.
- Coordinated with Technology, Operations, Compliance, Product, and Business teams; managed production issues, defect resolution, and change requests.
- Participated in Agile ceremonies including Sprint Planning, Daily Stand-ups, Backlog Grooming, Sprint Reviews, and Retrospectives.

Key Achievements

- Successfully designed the complete end-to-end onboarding journey for Global Mutual Funds onto India INX.
- Delivered business analysis for onboarding BlackRock Global Mutual Funds, a flagship regulatory and platform initiative.
- Reduced manual operational effort through targeted process automation, improving overall workflow efficiency.
- Delivered complete functional documentation across multiple business modules, supporting scalable platform delivery.

Deputy Manager (Business Analyst) — ICICI Bank

May 2018 – May 2026

- Elicited, analyzed, and documented business requirements through stakeholder interviews and workshops; prioritized features and identified process-improvement opportunities aligned to growth goals.
- Built business cases and financial models, including cost-benefit and ROI analyses, to support investment prioritization and go/no-go decisions.
- Prepared and presented proposals, management reports, and data-backed recommendations to senior leadership and cross-functional stakeholders.
- Partnered with IT, Finance, and Operations to design, implement, and operationalize business solutions; tracked delivery, change adoption, and issue resolution.
- Conducted market research and competitor benchmarking to identify customer trends, product/process opportunities, and risks.
- Developed and maintained business process documentation, including process maps, flowcharts, and use cases, to improve clarity, controls, and throughput.
- Identified business and operational risks; defined mitigation actions and contingency plans in line with governance standards.
- Defined, monitored, and reported KPIs and operational metrics to drive continuous improvement and inform decision-making.
- Led and coached a team of officers to strengthen credit card product knowledge, service quality, and escalation handling.
- Deputed to Bhubaneswar to onboard and train new employees on credit card and retail liability processes; standardized product workflows and SOPs.

Key Achievements

- Improved the iView banking application by implementing frontend and backend changes, boosting performance by 70% through optimization.
- Enhanced business processes, leading to increased efficiency and productivity.
- Deployed business solutions that drove revenue growth and improved profitability.
- Led cross-functional teams to achieve business goals on schedule and within scope.
- Fostered strong relationships with stakeholders across senior management and customer groups.

PROJECTS EXPERIENCE

- iView, iCRM360, IVR, and CIB applications — frontend/backend improvements, system integration, and user experience enhancement.
