Software Engineer

Professional Summary

Highly skilled Java Full Stack Developer with 4+ years of experience designing and developing scalable, high-performance web applications using **Spring Boot, Microservices, Angular, Kafka, AWS, and Kubernetes**. **Strong foundation in System Design, Design Patterns**. Experienced in RESTful APIs, event-driven architecture, **JWT** authentication, unit testing (JUnit & Mockito), and database optimization. Proficient in Agile/Scrum workflows using **Jira**. Passionate about building clean, maintainable, and production-ready code for enterprise-grade.

Technical Skills

- **Backend:** Java, Spring Boot, Spring MVC, Spring Data JPA, Spring Security, Hibernate, JUnit, Mockito
- **Frontend:** Angular, HTML5, CSS3
- **Database:** MySQL, MongoDB, PostgreSQL
- **Architecture & Tools:** Microservices, Kafka, REST API, JWT, Docker, Kubernetes, AWS (S3), API Gateway
- **Concepts:** System Design, Design Patterns (Singleton, Factory, Strategy), OOPs, Multithreading, Exception Handling
- **DevOps & CI/CD:** Maven, Jenkins, Git, Postman, Swagger
- **Project Management:** Jira, Scrum/Agile

Professional Experience

NextQbicle software technologies private limited

Java Full Stack Developer

|Nov 2021 – Dec 2025

- Developed and deployed **RESTful APIs** using Spring, Spring Boot and Spring MVC.
- Designed microservices architecture with synchronous (REST) and asynchronous (**Kafka**) communication.
- Built reusable Angular **components** and managed frontend-backend integration.
- Implemented **JWT-based authentication** and role-based access control.
- Conducted unit and integration testing using JUnit & Mockito ensuring code reliability.
- Optimized database queries in MySQL and MongoDB, improving performance by **~40%**.
- Applied SOLID principles and design patterns (Factory, Singleton).
- Deployed microservices on **AWS EC2 with Docker & Kubernetes**, configured auto-scaling.

Key Projects

CRM – Customer Relationship Management

Tech Stack: Spring Boot, Microservices, Kafka, Angular, AWS (S3, RDS), MySQL, MongoDB, Redis, Kubernetes, API Gateway

- Designed and developed microservices for CRM modules such as **Lead Management, Contact Management, Sales Pipeline, Campaign Management, Customer Support, and Notification Services**.
- Implemented **API Gateway** with Circuit Breaker patterns and fallback mechanisms to ensure high availability.
- Managed **synchronous REST communications** between CRM services and **asynchronous event streaming** using Kafka for lead updates, campaign triggers, and support ticket events. - Built a **workflow/state machine** for automated lead-to-customer lifecycle transitions (Lead → Qualified → Opportunity → Customer).
- Implemented **Redis caching** for frequently accessed CRM data such as leads, customer profiles, and campaign metadata.
- Utilized **AWS S3** for storing customer documents, campaign assets, and attachments; **MongoDB** for flexible customer activity logs; **MySQL** for core transactional CRM records.
- Developed Angular-based **dashboards, lead forms, sales pipeline views, customer profiles, and support ticket screens** with real-time updates via event streaming.

Marketplace (LOCCA)

Tech Stack: Spring Boot, JWT, PostgreSQL, AWS, Kubernetes

- Developed backend microservices for **Product Management, Seller Management, Customer Management, Order Processing, Payments, and Real-Time Deals**. - Implemented **JWT authentication** and **role-based access control** for Admin, Seller, and Customer user types.
- Designed and implemented **RESTful APIs** for product listing, inventory updates, order placement, order tracking, and payment workflows.
- Built **asynchronous workflows** using message queues (e.g., Kafka) for order events, payment confirmations, and inventory updates.
- Implemented **caching strategies** (Redis) for frequently accessed data such as product details, price information, and seller performance stats.
- Ensured **performance optimization, centralized logging, monitoring, and containerized deployment with Kubernetes**, enabling seamless scaling and high availability.

Education

B.Tech in Computer Science and Engineering, Dr.A.P.J. Abdul Kalam University, Lucknow

Additional Highlights

-
- Experience designing scalable distributed systems with Load Balancer, Cache, and API Gateway.
 - Strong knowledge of Microservices best practices, and circuit breaker patterns.
 - Worked in Agile/Scrum environment using Jira for sprint planning and backlog management.
