

KUNAL GOSAVI

Senior Network Engineer (Qualcomm)

Bangalore | 7083118084 | gamingforlife1121@gmail.com |
[linkedin.com/in/kunal-gosavi-b529661b6](https://www.linkedin.com/in/kunal-gosavi-b529661b6)

TECHNICAL SKILLS SET

Networking: Routing & Switching, WAN, VXLAN, Data Center Networking

Protocols: OSPF, EIGRP, BGP, STP, QoS, MPLS, IPSEC

Technologies: vPC, MLAG, VXLAN EVPN

Vendors: Cisco, Aruba, Arista

Load Balancers: Citrix NetScaler (MPX/VPX), F5 LTM

Wireless: Aruba, cisco [Monitoring only]

Automation: Ansible, Jenkins

Other: Network Troubleshooting, Design, Documentation, Deployment

CISCO Certifications

- CCNA R&S (Cisco ID: CSCO13195601) (Exp in 2023)
- CCNP R&S (Cisco ID: CSCO13195601) (Exp in 2023)
- CCIE R&S (Written: EXP in 2023)

Devices worked on and training:

- Cisco catalyst 2960, 2960-s, 3560, 3750, 3850, 3650, 3750-E, Nexus series-4500, 6500 5k 7K and 9k.
- Cisco routers-2900, 800 series, 1000 and 2000 series, 4300 series, CSR 1000V, Some ASR series routers.
- Arista DCS-7000 series
- Citrix 3000/5900/7100
- BIG-IP Virtual Edition

- Training:

I-MEDITA (BANER, PUNE)

CCNA R&S, CCNP R&S and CCIE R&S

EMPLOYMENT HISTORY

Senior Network Engineer

Qualcomm (Sept 2025 – Currently working)

KEY RESPONSIBILITIES

- Manage and support enterprise and data center network infrastructure using Cisco, Aruba, and Arista platforms.
- Handle daily operational tasks, including incident response, troubleshooting outages, and resolving network issues.
- Perform installations, upgrades, and configuration changes on Arista switches/routers and load balancers (Citrix & F5).
- Support global network deployments, including implementation of data center routers and switches.
- Collaborate with cross-functional teams and business units to gather requirements and deliver scalable solutions.
- Work extensively with protocols: OSPF, EIGRP, BGP, STP, QoS, and technologies like VXLAN and MLAG/vPC.
- Utilize Ansible and Jenkins for network automation and device provisioning.
- Lead and contribute to technology refresh projects, upgrading end-of-life network devices.
- Create detailed network documentation, topology diagrams, and cutover plans.

KEY PROJECTS

San Diego Data Center Bring-up

- Participated in deployment of 16 leaf and 4 spine architecture during global shutdown.

Cumulus to Arista Migration

- Successfully migrated ~100 switches from Cumulus to Arista infrastructure.

Arista EOS Upgrade

- Led upgrade of Arista switches to 4.32M OS version ensuring minimal downtime.

Load Balancer Upgrades

- Performed Citrix MPX/VPX and F5 OS upgrades across environments.

VLAN Renumbering Project

- Executed renumbering of 30 VLANs in San Diego data center with proper planning and validation.

Technical Consulting Engineer

Capgemini (Sept 2022- Sept 2025) | Bengaluru (WFH)

- Troubleshooting as first line for any outages in the network and any network related issues.
- Monitoring and maintenance of network devices such as Cisco Routers, Switches & Data Center devices such as Nexus switches, ASR devices.
- Coordinating with Telco/Last mile providers for end-to-end connectivity & maintaining customer's network uptime.

- Work as a break fix for end user issue related to AnyConnect VPN and home office equipment, wireless.
- Performing configuration on Nexus 9k series switches during migration.
- Configuring CPE routers for HSRP, NAT. doing fail-over testing.
- Experience in troubleshooting networking products such as Wireless devices, AP, controller etc. by using Splunk, WLC, DNAC.
- Perform necessary checks, apply monitoring tools and respond to alerts.
- Configuring & Troubleshooting PE routers for MPLS (LDP & L3VPNs).
- Configuring BGP (best path manipulation, communities, route-filtering as per customer needs) on both PE and CPE routers.
- As per customer need doing traffic engineering/route manipulation at PE side.
- Configuring Eigrp/OSPF/BGP as a PE-CE routing protocol. Also performing distribution on PE routers.
- Currently working with ISPs like AT&T, Verizon, Vodafone Emea with 40gig & 100Gig links.
- Preparing network design document (SNDD) for upcoming migrations with help of MS Visio
- Preparing device configuration templates (SMOP)for upcoming migrations
- Working with team during Cisco migrations.

Network Analyst Engineer

GTT| Pune

- Worked on layer-1 **media** like Copper and Fiber.
- Have experience in DSL technologies like Ethernet over copper, DIA, ATM, MDNX, ACI.
- Providing first-line investigation and diagnosis using approved tools, systems and procedures.
- Resolving/fulfilling incidents/service requests that are in scope.
- Engaging and arranging external technical and non-technical support where hands and eyes support are required on-site.
- Following-up with external technical and non-technical support organizations including 3rd parties until incident/request resolution/fulfilment.
- Understanding of and familiarity with Customers' services and solutions.

Network Associate Engineer

Airtel| Hyderabad

- Configuring & Troubleshooting PE routers for VRF and MPLS.
- Configuring BGP (best path manipulation, communities, route-filtering) on both PE and CPE routers.
- Configuring Eigrp/OSPF/BGP as a PE-CE routing protocol.
- Performing redistribution on PE routers.
- As per customer need doing traffic engineering/route manipulation at PE side.

- Doing packet level trouble-shoot in ISP core routers.
- Configuring QOS policers and shapers as per allocated bandwidth values.
- Configuring CPE routers for HSRP, NAT. doing failover testing.
- Making sure fast route convergence by configuring BFD between PE/CPE.
- Monitoring customer (Airtel-primary, VI-Secondary) links, if down/flapped raising fault tickets for same and handing escalations. - Fetching bandwidth utilization reports every two hour for customer links, if observed high then troubleshooting for same.
- Performing maintenance activities on CPE routers.
- Coordinating with team for transmission issues.
- Monitoring CPE routers with SNMP.
- SOFTWARES: Wireshark, GNS, Putty and Secure CRT.

Network Associate Engineer

Tata Communications Ltd | Bengaluru

- Working in protocols like BGP, OSPF, Eigrp and Static Routing.
- Configuring Policers on PE and Shapers on CPE
- Checking readiness of ISP core routers before performing configuration activity on CPE.
- Configuring HSRP.VRRP and GLBP for redundant default gateway - Monitoring customer routers with IP SLA, SNMP.
- Performing activities on CPE routers within given time frame - Features like Multicasting.
- Handling Customer Escalations.

Junior Associate

Wipro Limited | Pune

- Experience in routing protocols like RIP, BGP.
- Configuring new Routers at CPE site.
- Experience in VRF, GRE.
- Prechecking PE routers before CPE configuration.
- Taking Access of Routers with the help of Field engineer.

EDUCATION

July 2016

BE (Computer Engineering)

Amrutvahini College Of Engineering,Sangamner

STRENGTHS

- Good Communication Skill
- Well time management
- Positive Attitude
- Dedication about work
- Function under pressure

EXTRA CURRICULAR ACTIVITIES

1. Participated in paper presentation at CONNOISSEUR-2K15
2. Participated in Hack-Tricks National level workshop
3. I-phone application Development workshop
4. Proficiency in C-programming workshop
