Professional Summary

Business Analyst with **6 years of experience** across **Banking, Asset Management, and SaaS domains**, specializing in **data governance, data quality management, business analysis, and data analytics**. Proven expertise in defining **DQ frameworks, data controls, and compliance processes**, alongside delivering **Power BI dashboards, SQL-based insights, and workflow automation**. Adept at bridging business and technology through strong stakeholder engagement, Agile delivery, and cross-functional collaboration.

Core Competencies

- **Business Analysis & Documentation:** BRD, FSD, User Stories, TTI Mapping, Use Case Modeling
- **Data Governance & Quality:** DQ Dimensions Collection, Control Definition, Control Mapping, Compliance Reporting
- **Data Analytics & Reporting:** Power BI, Excel Dashboarding, Storytelling with Data
- **SQL & ETL:** Joins, Aggregates, CTEs, Window Functions, Data Profiling & Validation
- **Project Delivery:** Agile (Scrum/Kanban), Waterfall, Sprint Planning, Backlog Grooming, UAT
- **Product Management:** Roadmaps, Feature Prioritization, Release Planning, MVP Delivery
- **Stakeholder Engagement:** Requirements Gathering, Product Demos, Executive Presentations
- **Process Optimization:** Workflow Automation, Business Process Re-engineering (BPR)
- **Testing & Support:** Functional/Regression Testing, UAT Coordination, Issue Triage

Technical Skills

- **Tools:** JIRA, Confluence, MS Visio, Draw.io, Excel (Advanced), PowerPoint
- **BI & Visualization:** Power BI (DAX, Custom Visuals), Tableau
- **Databases:** MySQL
- **Documentation:** BRD, FSD, UML Diagrams, Wireframes, BPMN
- **Platforms:** Web Applications, SaaS Products, Data Warehousing, Reporting Dashboards

Professional Experience

Senior Consultant – EY | Dec 2025 – Present

- Led data strategy assessment initiatives by collecting stakeholder inputs and documenting current- and future-state recommendations in Confluence.
- Conducted data quality, data governance, and data readiness assessments for analytics and AI initiatives.
- Analyzed data ownership, stewardship models, metadata, and control frameworks aligned to governance standards.
- Created and tracked user stories, epics, tasks, and defects in Jira ensuring delivery traceability.
- Collaborated with Data Engineering, Analytics, Product, and Architecture teams to validate data lineage and transformations.
- Defined data quality rules, KPIs, and remediation workflows for critical business data.
- Supported stakeholder workshops, validations, and business sign-offs.
- Prepared assessment reports, maturity models, current/future-state diagrams, and executive presentations.

- Ensured alignment with business objectives, regulatory expectations, and EY methodologies.

Senior Business Analyst

HTC Global Services | Bangalore | Sep 2023 – Oct 2024

Client-Society General

- Gathered and translated business requirements into functional specifications and wireframes for digital platform upgrades.
- Led documentation efforts including BRDs, FSDs, and TTI (Traceability) matrices for regulatory and internal audit requirements.
- Developed SQL queries for deep-dive data validation, profiling, and ad hoc reporting.
- Designed self-service Power BI dashboards, automating KPIs and reducing reporting TAT by **70%**.
- Facilitated Agile ceremonies (daily stand-ups, sprint reviews, retrospectives) and managed Jira tickets for epics/user stories.
- Managed cross-functional teams (QA, Dev, Ops) during UAT and production issue resolution cycles.
- Supported post-production monitoring, RCA, and implementation of corrective action plans.
- **Led Data Governance initiatives, including Data Quality (DQ) dimensions collection, control definition, and control mapping for compliance and audit readiness.**
- **Collaborated with Data Stewards and business stakeholders to embed DQ checkpoints into workflows, improving reconciliation accuracy and reducing data quality issues.**

Business Analyst

Standard Chartered | Bangalore | Apr 2021 – Aug 2023

- Partnered with Product Owners and business stakeholders to define user journeys and convert them into actionable product backlogs.
- Created interactive wireframes using Balsamiq and Visio for approval workflows and loan servicing modules.
- Delivered high-impact Power BI dashboards used by senior leadership for portfolio management and SLA tracking.
- Executed UAT cycles, coordinated testing across multiple teams, and validated data using SQL extracts.
- Prioritized product features using Moscow technique and maintained roadmap alignment with business goals.
- Collaborated with developers to resolve blockers, clarify requirements, and ensure adherence to SLAs.
- Identified process bottlenecks and proposed automation strategies using macros and system triggers.

Business Research Analyst

Service 1st BPM Pvt Ltd (Formerly Usource Data LLP) | Bangalore | Jan 2019 – Jan 2021

- Conducted market research and business requirement elicitation sessions for clients.
- Drafted BRDs and user stories for client-facing applications and internal data tools.
- Built analytical reports using Excel (pivot tables, charts) and generated insights from customer segmentation.
- Participated in joint application development (JAD) sessions with clients and developers to finalize workflows.

- Played a key role in QA by validating system behavior, logging bugs, and supporting test cycles.

Customer Support Executive (Digital Officer – Axis Bank) | May 2018 – Dec 2018

- Handled outbound cold calling and customer onboarding for Axis Bank digital products.
- Provided customer support, follow-ups, and issue resolution.
- Performed quality analysis and coordinated with stakeholders for escalations.

Education & Certifications

- **MBA (HR & Marketing)** – College of IT & Management Education, Bhubaneswar

Key Projects & Achievements

- **Data Governance Enablement:** Implemented DQ framework by defining dimensions, mapping controls, and embedding quality rules into reporting workflows, reducing reconciliation errors by **40%**.
- **Automated Business Workflows:** Designed rule-based automation that improved data entry accuracy and reduced manual intervention by **60%**.
- **Power BI Real-Time Dashboard:** Delivered cross-domain dashboards integrating data from SQL Server, increasing visibility across departments.
- **Agile Process Champion:** Led agile transition efforts, establishing best practices and improving sprint delivery metrics by **30%**.
- **Stakeholder Recognition:** Earned multiple appreciations for timely delivery, detailed documentation, and proactive production support.
