ABOUT ME

Certified **Workday Integrations Consultant** with 3 years of experience in Implementation, AMS, and support projects. Skilled in designing and developing Workday integrations, collaborating with clients, gathering business requirements, and implementing solutions.

AREA OF EXPERTISE

- Integrations
- Custom Reports
- XSLT Transformations
- Security
- Business Processes
- EIB & CCW
- Calculated Fields

EXPERIENCE

2022 - NOW

Cognizant Technology Solutions

Workday Integration Consultant

- Worked closely with clients to understand their needs, gathered requirements, and built integration solutions.
- Fixed integration errors by checking logs, troubleshooting Workday Studio issues, and helping clients resolve data problems.
- Designed and developed integrations using EIB, Core Connectors, PECL, Workday Studio, and RaaS reports.
- Provided ongoing support for AMS and post-launch projects by fixing issues, improving performance, and making updates based on user feedback.
- Customized Workday Studio integrations to automate daily data checks and meet business requirements.
- Performed Workday Release Testing to make sure integrations worked correctly and followed compliance rules.
- Created change requests and detailed documentation, including build guides, test plans, and migration documents to ensure smooth updates and transitions.
- Built, tested, and verified integrations during implementation, then retested in Sandbox with updated data before migrating to production.
