Generative AI Engineer — Full Stack Developer — Data Engineering & Analytics

Summary — Generative AI Engineer and Full Stack Developer with 3+ years of experience building AI-powered applications, cloud-native platforms, data pipelines, analytics solutions, and enterprise SaaS products. Experienced in Azure OpenAI, LLMs, Retrieval-Augmented Generation (RAG), Agentic AI, LangGraph, React, Next.js, TypeScript, Python, Node.js, ASP.NET Core, PostgreSQL, SQL, BigQuery, Tableau, and ThoughtSpot. Skilled in solution architecture, AI automation, REST APIs, CI/CD, hybrid search, vector search, observability, and data-driven systems.

Technical Skills

Generative AI	Azure OpenAI, OpenAI APIs, LLMs, RAG, LangGraph, AI Agents, Agentic AI, Prompt Engineering, Prompt Evaluation, Hybrid Search, Vector Search, Embeddings, AI Observability, Responsible AI
Frontend	React.js, Next.js, TypeScript, JavaScript (ES6+), Redux Toolkit, HTML5, CSS3, Material UI
Backend	Python, ASP.NET Core Web API, C#, Node.js, Express.js, REST APIs, Microservices, API Integrations, Authentication & Authorization
Data & Analytics	SQL, PostgreSQL, SQL Server, Google BigQuery, Tableau, ThoughtSpot, Data Modeling, ETL, Data Pipelines, Data Validation, Dashboard Development
Cloud & DevOps	Azure App Service, Azure DevOps, GitHub Actions, CI/CD Automation, Docker, Cloud-Native Applications
Practices	Agile, Scrum, Solution Architecture, System Design, Performance Optimization, Technical Documentation, Stakeholder Management
Tools	Git, Postman, Jira, Splunk, Figma, GitHub Copilot, Windsurf AI

Work Experience

Nova Prime Solutions Pvt Ltd, Hyderabad

Aug 2023 – Present

Generative AI Engineer — Full Stack Developer

- Designed and deployed AI-powered applications using Azure OpenAI, LLMs, Retrieval-Augmented Generation (RAG), LangGraph, AI Agents, vector search, and prompt orchestration frameworks.
- Built scalable React, Next.js, TypeScript, ASP.NET Core, Python, and Node.js applications supporting enterprise SaaS and e-commerce platforms.
- Developed REST APIs, backend services, and third-party integrations while implementing authentication, authorization, and secure application workflows.
- Designed PostgreSQL and SQL data models, optimized queries, and supported analytics, reporting, business intelligence, and data pipeline initiatives.
- Built operational dashboards and reporting solutions using SQL, BigQuery, Tableau, and ThoughtSpot to support data-driven business decision-making.
- Implemented AI observability, model monitoring, CI/CD automation, Docker-based deployments, and cloud-native application delivery.
- Collaborated with product, business, and engineering stakeholders to translate requirements into scalable technical solutions and AI automation workflows.
- Participated in solution architecture, Agile ceremonies, code reviews, testing, technical documentation, troubleshooting, and production support activities.

Toast, Inc. – Chennai

Aug 2022 – Aug 2023

Software Engineer (Internship)

- Built enterprise APIs, reporting systems, analytics solutions, and backend services using ASP.NET Core, SQL Server, React, and TypeScript.
- Optimized SQL queries, reporting workflows, operational dashboards, and application performance supporting enterprise SaaS platforms.
- Collaborated with engineering teams on application development, testing, debugging, Agile delivery, code reviews, and cross-functional initiatives.

Projects

- Built Generative AI applications leveraging Azure OpenAI, LLMs, RAG pipelines, vector search, AI Agents, AI automation, and Agentic AI workflows.
- Developed cloud-native solutions integrating React, ASP.NET Core, Python, PostgreSQL, Azure services, CI/CD pipelines, analytics dashboards, and REST APIs.

Certifications

- Microsoft Azure Fundamentals (AZ-900)
- GitHub Copilot Certified and Windsurf AI Certified

Education

Sri Sairam Engineering College — B.E Computer Science

2019 – 2023

CGPA: 9.28
