ACADEMIC PROFILE

Master of Business Administration (Finance) - JNTU, Anantapur - 75%
Bachelor of Commerce, Sri Venkateswara University, Tirupati. - 76%

2011- 2013
2008 -2011

PROJECTS

Darwin Project— ETD & OTC position recon Automation

- Led the end-to-end automation of the daily ETD and OTC position reconciliation process, eliminating manual intervention and improving operational efficiency.
- Designed and implemented an automated workflow that consistently produced accurate and audit-ready reconciliation results, aligning fully with the previous manual process.
- Reduced overall processing time significantly by streamlining data comparison, exception identification, and reporting, enabling faster break resolution and improved productivity for the team.

Metrics & Major Shareholding project

- Developed an automated solution using UiPath to perform Independent Shareholding Confirmation (ISC) validation directly from multiple data sources, enhancing accuracy and timeliness of regulatory reporting.
- Created standardized and scalable metric templates to capture data volumes, trends, and exception patterns, improving management information reporting and decision support.
- Built a custom Excel macro to log, track, and audit the number of activities, disclosures, and submissions processed on any given date, strengthening transparency and governance.

Eagle Star (ReDOM)— Cash & position recon Automation

- Successfully transitioned complex data sets from the legacy application to the new ReDOM platform, ensuring full data integrity and continuity of business operations.
- Authored comprehensive Standard Operating Procedures (SOPs) for the new application environment, improving process consistency, onboarding efficiency, and audit compliance.
- Automated the broker and custody position reconciliation process within ReDOM, significantly reducing manual effort while improving accuracy and timeliness of reconciliation outputs.
