

MANOJ JAIN

Solution Architect | Generative & Agentic AI | Cloud-Native Systems | Java & Python

+91-9910776093

manoj.jain100@gmail.com

Dynamic strategic and technical leader with extensive expertise in software development, solution architecture, and technical leadership. Proficient in designing and implementing innovative, scalable solutions leveraging skills in Java, Microservices, Cloud technologies and AI to drive impactful results across diverse industries.

Core Competencies

High-Level and Low-Level Design (HLD, LLD)

Microservices Architecture

Cloud-Native Application Development

Digital Transformation & Legacy System Modernization

Agile Project Management & Scrum Mastery

Cross-Functional Team Leadership

Performance Optimization & Scalability

Stakeholder Management & Communication

Risk Mitigation & Problem Solving

Continuous Improvement & Process Optimization

Code Quality & Best Practices Enforcement

Team Mentoring & Knowledge Sharing

Requirement Gathering & Analysis

Project Delivery & Timely Execution

Client Relationship Management

Innovation & Technology Adoption

Collaboration with Cross-Departmental Teams

Change Management & Adaptability

Cost Optimization & Resource Management

Profile Summary

- A highly skilled and results-oriented technical professional with 18 years of experience in software development, specializing in Java/JakartaEE, Microservices, and Cloud technologies. Consistently delivering innovative, scalable solutions that drive business growth and operational excellence across diverse industries.
- Architecture and implementation of multi-agent GenAI platform for IT operations integrating LLM model with enterprise tools.
- As a Solution Architect at HCL Technologies, strategically lead design and development processes, ensuring alignment with business goals, and managing cross-functional teams to deliver complex projects within time and budget constraints.
- Demonstrated strong system design skills with extensive knowledge in microservices architecture. Successfully implemented & optimized microservices-based solutions over the last 5 years across diverse domains, including airline, fintech, insurance, & SIEM, resulting in enhanced scalability, performance, and modularity of critical systems.
- Proficient in cloud-native application development with expertise in GCP and AWS, delivering highly scalable, resilient, and cost-efficient solutions. Known for driving operational efficiency and cost optimization, achieving a notable reduction in deployment time through the adoption of industry best practices and continuous improvement efforts.
- An influential leader with strong mentoring skills, fostering a collaborative work environment that maximizes team performance. Passionate about staying ahead of industry trends, integrating emerging solutions such as container orchestration and serverless architecture to scale operations and optimize performance.
- Demonstrates advanced expertise in software architecture, specializing in delivering robust solutions that meet business objectives and overcome technical challenges. Notable achievements include measurable improvements in operational outcomes, user engagement, and business impact through transformative technological initiatives.
- Known for cultivating a high-performance culture by mentoring junior developers, promoting continuous learning, and empowering teams to excel. This approach has contributed directly to the success of multiple projects and organizational growth.

Work Experience

Senior Technical Architect at HCL Technologies (March 2022 - Present)

Consultant at Globallogic India Pvt. Ltd. (April 2019 - March 2022)

Team Lead at Infogain India Pvt. Ltd. (March 2016 to March 2019 and May 2012 - September 2015)

Lead Engineer at HCL Technologies Ltd. (November 2009 - May 2012)

Software Engineer at Q3 Technologies (April 2008 - October 2009)

Senior Programmer at Chrysalis Information Systems Ltd. (August 2006 - March 2008)

Major Projects Undertaken

Project Title: GenAI Multi-Agent Platform

Client: IKEA (Sweden)

Employer: HCL Technologies

Tenure: Nov 2024 – Till present

Tools & Environment: Python, MongoDB, Neo4j, FastMCP, Entra ID, Docker, Jira, LLM Orchestration, Microservices, Vector DB, Knowledge Graphs

Application Description: A multi-agentic AI application for IKEA's IT Operations, integrating RAG and Knowledge-Augmented Generation (KAG) capabilities for intelligent automation and decision support. The system featured agent-based orchestration enabling collaborative problem-solving across IT functions. Additionally, delivered the MCP Scaffolding framework, empowering developers to spin up MCP servers rapidly and standardize application development.

Solution Design/Development:

- Involved in the design and implementation of ODIN platform, microservice architecture, agent registry, tool integration, memory management, and LLM-driven orchestration.
- Design for multi-agent orchestration, agent lifecycle, tool abstraction, and context-aware query planning with LLM model.
- Utilized design patterns, best practices, and modern technologies for scalable, maintainable, and high-performing solutions.
- Collaborated with IKEA stakeholders to align architecture with evolving business needs and GenAI adoption strategies.

Soft Skills

Technical Skills

- **Programming Languages:** Java 17, Python 3.x
- **Frameworks & Technologies:**
 - Spring 5.x and Spring boot 3.x
 - Hibernate, EJB, JMS, Quarkus
 - RESTful Services, GraphQL, SOAP
 - JUnit, Mockito
- **AI & Agentic System:** LLM, RAG, Vector DB, Langchain, Langgraph, Multi Agentic Framework, MCP, Agent Evaluation & Orchestration, Agent Observability
- **AI tools:** Co-pilot, Claude code
- **Microservice Arch:** SAGA, Event-Driven-Architecture, CQRS, Circuit Breaker, Aggregator, Asynchronous messaging, Distributed tracing
- **Cloud Platforms:** AWS, GCP
- **Web/App Server:** Tomcat, JBOSS
- **Containerization & Orchestration:** Docker, Kubernetes
- **CI/CD Tools:** Jenkins, GitHub Actions
- **Quality/Security analysis tools:** SonarQube, Veracode
- **Infrastructure as Code (IaC):** Terraform
- **Message Brokers:** Apache Kafka, GCP Pub Sub
- **Version Control:** SVN, GitHub, Gitlab
- **Databases:** Oracle, MySQL, PostgreSQL, MongoDB, Redis
- **Observability Tools:** Datadog, New Relic, Prometheus, Grafana
- **Logging:** ELK, Splunk
- **Software Development Methodology:** Agile Scrum, TDD
- **Project Management Tools:** JIRA, Rally, TFS
- **Build Tools:** Ant, Maven and Gradle

Certification

- Google Professional Cloud Architect Certificate.
- AWS Certified Machine learning engineer Associate

Education

- M.C.A. (I.G.N.O.U.) in 2004 with 1st Division
- B.C.A. (I.G.N.O.U.) in 2002 with 1st Division
- ADSE from APTECH, Delhi with 80%

Personal Details

Date of Birth: 28th December 1980
Visa Details: B1 Visa (Valid till 2025)

- ☎ Hands-on in implementing modules and functionalities, ensuring alignment with the architectural vision.

Project Title: PLATFORM-X

Employer: HCL Technologies

Tools & Environment: Java 17, GraphQL, GIT, Maven, GCP, Docker, Kubernetes, Dspace (DAM), Bloomreach (CMS), AWS

Application Description: PLATFORM-X is an in-house product at HCL designed for companies to create content and publish websites for marketing purposes. The platform facilitates a quick and easy process for creating and managing digital content.

Solution Design:

- ☎ Designed and proposed high-level architecture and detailed specifications for new software modules and features.
- ☎ Utilized design patterns, best practices, and modern technologies for scalable, maintainable, and high-performing solutions.

Implementation Support:

- ☎ Hands-on in implementing critical modules and functionalities, ensuring alignment with the architectural vision.
- ☎ Collaborated with the development team for smooth integration of new features and modules.

Code Review:

- ☎ Enforced a rigorous code review process to ensure code quality and adherence to design principles.
- ☎ Mentored junior developers and provided actionable feedback for enhanced code practices.

Client: HCL Healthcare

Tenure: August 2023 – Sep 2024

Project Title: DXP Forum

Employer: HCL Technologies

Tools & Environment: Java 11, Microservices Architecture, Spring Boot, RESTful services, GIT, Maven, PCF

Application Description: DXP Forum is a platform offering various solutions from MasterCard, including the management of internal applications and user management.

Solution Design:

- ☎ Developed High-Level and Low-Level Design artifacts based on business requirements.

Agile Scrum:

- ☎ Led the monitoring of Scrum teams, ensuring smooth progress toward delivering new functionality in each sprint.

Code Review:

- ☎ Ensured quality deliverables by overseeing a vigilant code review process.

Client: MasterCard

Tenure: Apr 2022 – July 2023

Previous Projects Undertaken

Project Title: Logrhythim NextGen SIEM

Employer: Globallogic India Pvt. Ltd.

Client: Logrhythim

Tenure: Mar 2019 – Apr 2020

Project Title: Total Loss Valuation

Employer: Infogain India Pvt. Ltd.

Client: Mitchell International, Inc.

Tenure: Mar 2016 – Mar 2019

Project Title: GT-Motive Integration

Employer: Infogain India Pvt. Ltd.

Client: Mitchell International, Inc.

Tenure: Jul 2012 – Sep 2015

Achievements

- ☎ Designed and implemented a microservices architecture, boosting system performance and user engagement.
- ☎ Reduced deployment time through automated CI/CD pipelines, enhancing development efficiency and operational effectiveness.
- ☎ Integrated new technologies to optimize system performance, scalability, and efficiency, leading to operational improvements.
- ☎ Implemented performance optimizations, reducing processing time and significantly enhancing user experience.
- ☎ Gained recognition from senior management and clients for leadership and technical expertise, driving repeat business and client retention.
- ☎ Led the transition to cloud-native development, reducing operational costs while improving scalability.
- ☎ Fostered a culture of continuous improvement, resulting in boost in project delivery timelines and team productivity.

Passport Details: G3083775 (Valid up to June 2027)
