Pune, India

Technical & Analytical Skills

Programming & Scripting

- Python
- SQL

Cloud & Big Data Platforms

- Azure
- AWS
- Blob Storage
- Databricks

AI & Machine Learning

- Artificial Intelligence (AI)
- Generative AI
- Machine Learning
- Model Evaluation
- Prompt Engineering

Analytics

- Collection Analytics
- Data Analytics
- Marketing Analytics
- Risk Analytics

Business & Analysis

- BRD Development
- Business Analysis
- Requirement Analysis
- Requirement Gathering
- Solution Assessment and Validation
- Stakeholder Management

Data Handling & Engineering

- Data Cleaning & Preparation
- ETL Pipelining

Databases & Querying

- MongoDB
- SQL

Career Objective

Data Scientist with **5 years of experience** in **retail lending**, portfolio risk assessment, delinquency reduction, underwriting analytics, scorecard-based segmentation and credit decision optimisation across fintech and NBFCs. Skilled in analysing **bureau data**, **repayment behaviour**, **FOIR**, **delinquency performance**, **roll rates**, **vintage curves**, and developing **risk mitigation strategies** to improve portfolio quality. Strong domain knowledge across **Personal Loans**, **Payments Bank customers**, and **digital lending**.

Proficient in **SQL**, **Python**, **Power BI**, **Tableau**, and experienced in building automated risk reports, lender decks, fraud-risk modules, collection performance insights and campaign-risk strategies.

Work Experience (5 Years)

Mahindra Finance- Manager -Business Analytics (June 2024 - till date)

Roles and Responsibilities

- Developed and validated a Personal Loan Probability of Default (PD) model using logistic regression, incorporating bureau scores, FOIR, enquiry velocity, income stability, and past delinquency signals; performed feature selection, multicollinearity checks, temporal validation, and calibration and supporting risk-based underwriting, pricing, and portfolio monitoring.
- Conducted **monthly portfolio risk assessments**, analysing delinquency, roll rates, pool performance, and risk segment transitions. Delivered detailed insights used by the **Risk & Credit teams** for decisioning.
- Managed **credit-risk evaluation for targeted PL campaigns**, ensuring **no deterioration in risk profile** while reducing marketing cost by **₹12 lakh/month**, generating **₹1.2 crore annual savings**.
- Utilised bureau scores, repayment behaviour, FOIR and delinquency patterns to launch risk-calibrated offers, resulting in **30% uptake** among dormant customers and **₹4 crore incremental profit**.
- Improved **approval rates by 25%** for Airtel Payment Bank customers through customer-journey RCA, identifying risk-relevant drop-off points.
- Conducted analytics on credit rejects, approved-not-taken (ANT) customers, and market competition to refine **credit policy and risk pricing**.
- Created risk decks covering **vintage curves**, **roll rates**, **risk segment migration**, **NPA trends**, and collection performance.
- Implemented a Voice Bot solution with vendors, reducing costs and increasing qualified leads by 20%.

Reporting & Visualization

- Power BI
- Quicksight
- Tableau

Achievements

- Mahindra Spot Award
- Awarded with Mahindra Rise Achiever award in Analytics.
- Secured 1st position in Fibe Analytics competition.
- Achieved 37th position in IIT Madras, Bootcamp 2018.
- Participated in the TECHGIG Code Gladiator 2022 hackathon.

Attributes

- Team Management
- Problem Resolution
- Effective Communication Skills
- Flexibility And Adaptability To Changing Situation
- Strong Desire To Learn And Grow
- Patient Listener
- Team Leader
- Hardworking
- Decision making skills.
- Positive Attitude: Creating a positive work environment

Personal Details

Name : Mohiuddin A Siddiqui

Date of Birth: 07/09/1995

Gender: Male

Gera- Manager - Analytics (September 2023 - June 2024)

Roles and Responsibilities

- **Sentiment Analysis Model Development using BARD:** Developed an advanced sentiment analysis model using Generative AI (Bard via Hugging Face and ChatGPT) to categorize customer email sentiments, enabling root cause analysis and driving improvements in app user experience and customer satisfaction.
- Developed the Happiness Index Dashboard to detect subtle shifts in customer sentiment, enabling proactive strategy adjustments and timely interventions to enhance customer satisfaction.
- **Google Play Store Review Analytics using ChatGPT:** Leveraged NLP and ChatGPT to analyze Google Play Store reviews, building a model to identify root causes of user feedback, enabling rapid issue resolution and significantly improving app usability and customer satisfaction.
- Created **Collections Analytics** reports improving visibility on overdue customers and enabling faster follow-up strategies.
- Automated GST and finance reports improving financial compliance accuracy.

Fibe - Business Data Analyst (September 2021 - September 2023)

Roles and Responsibilities

- Delivered monthly risk decks to lenders with detailed analysis of:
 1. Delinquency buckets (DPD 0-90)
 2. Vintage & roll-rate curves
 3. Bounce rate trends
 4. Write-off pools
 5. Fraud cases
- Conducted competitive analysis on emerging fintech lenders to refine credit-risk and underwriting strategies.
- Reduced delinquency via a new vendor-based POC—optimised customer follow-ups and recovery prioritization.
- Built fraud-risk module (fuzzy matching) detecting existing fraudulent entities → prevented high-risk applications.
- Used Tableau to convert raw risk data into actionable insights for Credit, Collections & Lender partners.

Lentra.AI - Business Analyst (November 2020 - August 2021)

(6 M full time Internship)

Roles and Responsibilities :

- Analysed performance of **credit decisioning APIs** used by banks and NBFCs.
- Standardised credit-risk API responses across vendors improving **underwriting accuracy and turnaround time**.
- Resolved production issues affecting risk scoring and customer decisions.
- Supported regression testing for risk-rule engines and credit policy workflows.

Certifications

- IIT, Madras (NPTEL) - Python for Data Science
- University of California, Davis – Visual Analytics with Tableau
- University of California, Davis – SQL for Data Science
- Udemy - Python for Data Science and Machine Learning Bootcamp
- Imperial College London - Mathematics for Machine Learning: Linear Algebra

- Google - Machine Learning for Business Professionals
- BCG-Digital Transformation
- IIT Kharagpur – Programming in JAVA

Educational Qualifications

Symbiosis Institute of Computer Studies and Research - MBA (IT) (2019-2021)

Mumbai University - BE (EXTC) (2014-2018)
