KEY COMPETENCIES

Nodejs	AWS	MongoDB	Team Leader
Javascript	Docker	Redis	Learner
Express	Kubernetes	Traces/Metrics	Problem solving
MySQL	System Design	Observability	Organisational skills
Typescript	Okta	Database Design	

PROFESSIONAL EXPERIENCE

Nielsen	Member of Technical Staff 2	Aug 2024 - Present
- Architected a high-performance API Gateway in Node.js, centralizing OIDC-based authentication (Okta) and RBAC for microservices; reduced p90 latency by 83% (from 600ms to 100ms) through strategic caching, indexing & optimization - Streamlined IDP via Okta, OAuth tokens, jwt access & refresh, federation, auth servers, SAML, OIDC application and implementing scalable role and group-based access across critical applications - Drove infrastructure cost reduction by overhauling the centralized logging solution down from 5000\$ to 1500\$/mon - MCP Gateway to secure Model Context Protocol servers across the organization; engineered a multi-tenant authentication provider using Node.js, Okta, OAuth 2.0 as base for the gateway.		
Techmojo	Member of Technical Staff 1	Jan 2024 - July 2024
Fanart watermark: A service where a user can upload a fanart and admin will approve the art and a watermark of that username will be placed on a particular position of the art.		
Sunstone	Software Engineer	Mar 2022 - Dec 2023
- Led a team of 3 for engineering a high-availability microservice enabling students to autonomously reserve specific test/interview slots by selecting mode, date, and time, ensuring automatic slot reservations. - Designed a nudge system which pings the user on the stage/journey he is currently residing, this helped move forward with the lead stages		
Stepping Cloud	Software Developer / SAP SF Consultant	July 2019 - Feb 2022
- Developed an Alumni Portal enabling former employees to access company insights, interact with previous managers, and streamline requests for crucial exit documents (e.g., Form 16, FnF settlement) - A centralized email broker service where all the email notifications request would go and that initiated the final trigger to the end user. It provided the system with a single point of initiation of request.		

EDUCATION

B.Tech in Computer Engineering

Zakir Hussain College of Engg. and Technology, AMU
2015 - 2019

CERTIFICATIONS

Problem Solving (Basic, Intermediate, Advanced)

HackerRank

Code With Node

Udemy

PROGRAMMING/ ONLINE

- HackerRank: 3100+ Rating in Algorithmic
- CodeChef: 2 Star, 1466 Rating, 100+ ques solved
- LinkedIn: 2000+ connections, 50+ Endorsements
- Github: 30+ Repositories
- HackerRank Bronze Medal in University Codesprint 5
- VP of the Entrepreneurship Cell at College
