3 Lotus Zing, Sector 168 Noida, UP. -201305

*Senior Business Analyst | Product Owner with 12+ years of IT experience, including 8+ years in Business Analysis, Agile Delivery, Product Development, and Enterprise System Integration across **EdTech, Academic Operations, BFSI, Wealth Management, Insurance, P&C and Superannuation** domains. Proven track record of leading cross-functional teams and delivering web, mobile, cloud-based, and enterprise applications from concept through design, development, testing, deployment, production support, and business adoption.*

*Deep expertise in requirements elicitation, stakeholder management, business process analysis, and the preparation of high-quality **BRDs, FRDs/FSDs, process flows, user stories, acceptance criteria**, and functional specifications. Experienced in **translating complex business requirements into scalable, customer-centric solutions** across the **Salesforce ecosystem, Mulesoft, Mendix, Sonata / Guidewire PolicyCenter, ServiceNow implementations**, API integrations, and enterprise cloud platforms for **global clients across the UK, USA, Singapore, ANZ, Europe, China, and UAE**.*

*Experienced in backlog management, product delivery, Agile methodologies, enterprise transformation, and large-scale system implementations. Strong understanding of **Generative AI, Agentforce, AI Agents**, and intelligent automation, leveraging emerging technologies to streamline processes, enhance decision-making, accelerate delivery timelines, and drive continuous improvement. Recognized for delivering high-quality solutions, leading testing, release management, production support, and building strong stakeholder relationships to achieve measurable business value.*

Core Skills

Business: -

- Business Analysis | Scrum Master | Agile Delivery | Sprint Planning | Product Backlog | Product Roadmap | MVP | User Stories | Acceptance Criteria | Stakeholder Management | Requirements Elicitation | Requirement Gathering | Requirement Modeling | Functional & Non-Functional Requirements | Functional Specification | BRD | FRS | SRS | BDD | Process Mapping | BPMN | Gap Analysis | Business Process Improvement | Change Management | Risk Management | Data Analysis | UAT | Documentation | Prototyping | QA & Testing | Test Planning | Test Management | Functional, Regression & Web Testing | Database Testing | REST API Testing | Salesforce (Configuration & Integration) | API & Third-Party Integration | Web Services | Microservices | Azure DevOps | Guidewire | Confluence | MDM | Workflows | RCA | Policy admin | Process Improvement | Release Management | Onshore/Offshore Delivery | Team Leadership | Time Management | KPI Reporting | Insurance | Superannuation | Wealth Management | Life Insurance | Investments | Generative AI | Agentic AI | LLMs
- Story boarding | Interviews | Requirements Workshops | Focus Groups | Observation | Surveys, etc.
- JIRA | Wrike | Confluence | HP ALM | Sonata | Salesforce | Boomi | ServiceNow | MDM | X-Ray | Superb | FTP | SoapUI | Mendix | Miro | Guidewire PolicyCenter | Guidewire insurancenow | MS-Visio | Microsoft 365 | Mural | FIGMA

Technical: -

- C, C++, Visual Basic, HTML and DHTML, MS-SQL, PostgreSQL, API, JSON, XML, Jenkins, Swagger, ServiceNow, CI/CD.

Professional Experience

- **Strategic Business Analyst | Product Owner | Scrum Master** with **12+ years** of IT experience, including **8+ years** in Business Analysis and Agile Delivery, delivering Digital Transformation, Product Management, Enterprise Integration, Cloud Transformation, and AI-enabled solutions across **EdTech, Academic Operations, Banking, Payments, Wealth Management, Insurance, P&C, Superannuation, Investments, and HR/Payroll** for global clients across the **UK, USA, Singapore, ANZ, Europe, China, and UAE**.
- Led **15-member cross-functional Agile teams**, improving team velocity (Focus Factor **50% → 80%**) and accelerating delivery timelines by **10–15%** through process optimization, backlog prioritization, and continuous improvement.
- Proven expertise in managing end-to-end product delivery, from discovery, requirements elicitation, and solution design through Agile delivery, UAT, implementation, **production support** and release management
- Expert in requirements elicitation, stakeholder management, business process analysis, gap analysis, process re-engineering, backlog management, and creating **BRDs, FRDs/FSDs, Epics, Features, User Stories, Acceptance Criteria**, Process Flows, Functional Specifications and implementation roadmaps.

- Strong **Insurance domain** expertise with hands-on experience in **Sonata/Guidewire PolicyCenter**, exposure to **BillingCenter, Policy Administration, Reinsurance and Claim Center**, supporting policy administration, implementation, enhancements, regulatory initiatives, and compliance-driven transformation programs.
- Experienced in Guidewire InsuranceNow Cloud implementation, delivering requirements, functional design, integrations, UAT, and end-to-end insurance platform transformation initiatives.
- Hands-on experience delivering enterprise solutions across the **Salesforce Ecosystem (Sales Cloud, Service Cloud, CPQ, Agentforce)**, **Mendix, Mulesoft, ServiceNow, Sonata / Guidewire PolicyCenter, Boomi, APIs, Microservices, Workflow Platforms, Cloud Applications, ETL, ERP, ITSM** and Third-Party Integrations.
- Strong knowledge of **Generative AI, Agentforce, Agentic AI, LLMs, Prompt Engineering, RAG, AI Assistants, Workflow Automation**, and Intelligent Automation, enabling AI-driven business solutions.
- Experience defining AI use cases, business rules, governance frameworks, adoption strategies, and success metrics to deliver AI-enabled business solutions.
- Experienced in managing international stakeholders and clients across BFSI, Wealth Management, Insurance, Payments, and enterprise transformation initiatives, with strong expertise in Small Commercial Lines and multi-vendor solution delivery.
- Recognized for influencing global senior stakeholders, leading cross-functional teams, mitigating risks, and delivering scalable, secure, business-critical solutions across global organizations.
- Strong understanding of the end-to-end insurance lifecycle, covering policy administration, underwriting, billing, claims, customer servicing, renewals, and policy closure.

Business Analyst | Scrum Master (Agile Delivery) **Study Group | July 2024 – Sep 2026**

- **Lead Business Analysis and Agile delivery** for enterprise transformation across **EdTech, Academic Operations, Insurance, Wealth Management, Superannuation, and HR/Payroll**, driving digital modernization, cloud transformation, AI adoption, and business value realization.
- **Manage and coach 15–30+ member cross-functional Agile teams**, facilitating Scrum ceremonies, improving delivery predictability, mitigating risks, and ensuring successful releases and production readiness.
- **Led a 15-member Agile team as Scrum Master**, improving Focus Factor from **50% to 80%** and delivering high-quality solutions on schedule across multiple concurrent initiatives.
- **Improved delivery timelines by 10–15%** through backlog prioritization, dependency management, process optimization, and continuous improvement.
- Partner with business, product, architecture, engineering, data, and vendor stakeholders to elicit requirements and produce **BRDs, FRDs/FSDs, Epics, Features, User Stories, Process Flows**, and scalable solution designs.
- Deliver enterprise solutions across the **Salesforce Ecosystem (Sales Cloud, Service Cloud, CPQ, Agentforce)**, **ServiceNow implementation, Guidewire PolicyCenter, Mendix, Mulesoft, Boomi, REST/SOAP APIs, Workflow Platforms, Cloud Applications**, and third-party integrations.
- Drive **cloud enablement, enterprise integration, workflow automation, API-led architecture**, and technology modernization initiatives to improve operational efficiency and customer experience.
- Lead **Generative AI, Agentforce, Agentic AI, AI Assistants, Prompt Engineering**, and intelligent automation initiatives to streamline business processes and enhance decision-making.
- Collaborate with business and technology teams to define **AI use cases, governance frameworks, business rules, adoption strategies**, and success metrics for AI-enabled enterprise solutions.
- Own the **end-to-end delivery lifecycle**, including discovery, requirements analysis, solution design, backlog management, sprint execution, UAT, implementation, **production support**, release management, deployment, and business adoption.
- Support **production operations** by managing incident resolution, root cause analysis, change requests, data governance, reporting, operational controls, and continuous service improvement.
- Influence senior stakeholders, manage dependencies and delivery risks, and successfully deliver **business-critical digital transformation and modernization programs** across enterprise environments.

Project: Insurance Integration & Transformation Program

Client: Zurich Insurance, UK | **Domain:** Insurance | **Role:** Business Analyst

Project Summary: The program supported **Study Group's student insurance operations**, where international students undertaking short- and long-term study programs in the UK were provided insurance coverage through **Zurich Insurance**. The solution enabled Study Group to manage end-to-end insurance-related requests and interactions across policy administration, customer servicing, billing, claims, and third-party systems.

Key Responsibilities:

- Gathered and analyzed business requirements and translated them into BRDs, FRDs, Epics, User Stories, Acceptance Criteria, and functional specifications.
- Conducted AS-IS, TO-BE, and gap analysis, identifying process improvements and integration requirements.
- Worked closely with business stakeholders, Product Owners, Architects, Developers, QA, and third-party vendors to ensure successful solution delivery.
- Led requirement discussions and supported backlog refinement, sprint planning, reviews, UAT, and release readiness within Agile delivery.
- Defined and validated Salesforce, API, Guidewire, and third-party integration requirements, including data mapping and business rules.
- Worked on Guidewire PolicyCenter, BillingCenter, and ClaimCenter implementations, integrations, functional validation, and business process alignment.
- Supported functional, integration, regression, and UAT testing by preparing scenarios, validating results, managing defects, and coordinating with QA teams.
- Managed stakeholder communication, dependencies, risks, issues, and cross-team coordination across multi-vendor delivery environments.
- Ensured requirements traceability from business objectives → requirements → user stories → development → testing → UAT → production release.

IT Business Analyst | (Scrum Master Responsibilities)

Bravura Solutions LLP | December 2019 – February 2024

- Delivered end-to-end projects as a Business Analyst | Scrum Master, improving delivery timelines by 10% through Agile execution, stakeholder alignment, and process optimization.
- Led requirements elicitation and translated business needs into BRDs, FRDs/FSDs, Epics, Features, User Stories, Acceptance Criteria, Process Flows, and Functional Specifications.
- Facilitated Agile ceremonies including Sprint Planning, Backlog Refinement, Daily Stand-ups, Sprint Reviews, and Retrospectives, driving predictable and high-quality delivery.
- Collaborated with Product Owners, business stakeholders, architects, and development teams to prioritize backlogs, manage dependencies, mitigate risks, and maximize business value.
- Delivered enterprise solutions across Salesforce, ServiceNow, Mulesoft, Mendix, APIs, Microservices, Workflow Platforms, Cloud Applications, and Third-Party Integrations, ensuring scalable and business-critical outcomes.
- Performed API analysis, system integration validation, and data analysis using Swagger, JSON, XML, MS SQL, and PostgreSQL, supporting migration and transformation initiatives.
- Led QA, UAT, defect management, release planning, and production deployment activities, ensuring successful and stable releases.
- Managed production support, incident resolution, and service requests through ServiceNow, maintaining operational stability and business continuity.
- Delivered transformation initiatives across Insurance, Wealth Management, Investments, Health & Welfare, Life Insurance, and Superannuation domains, driving operational excellence, customer experience, and continuous improvement.

Project: Aware Super & CareSuper Transition Program**Client:** Aware Super & CareSuper (Australia)**Domain:** Wealth Management | Superannuation | Insurance**Role:** IT Business Analyst **Team Size:** 10+

Skills and tech Environments: Requirement gathering, BRD, Epics and Feature, Scrum and team management, Project management, Project Planning, SRS, Documentations, Web Application Testing, Mobile Testing, Regression Testing, Functional Testing, Smoke testing, Web application and windows application- Salesforce, sonata, SQL, Jenkins, API and all browsers (iOS & Android devices)

Project Summary:

Delivered multiple transformation and integration projects for leading Australian superannuation funds, supporting enhancements across member onboarding, insurance, investments, claims, and retirement services. Collaborated with business and technical teams to gather requirements, manage Agile delivery, and ensure successful implementation of Salesforce and third-party integrated solutions.

Key Responsibilities:

- Led requirements discovery workshops and translated business needs into BRDs, Epics, Features, User Stories, Acceptance Criteria, Functional Specifications, and Process Flows.
- Facilitated Agile delivery across cross-functional teams, managing sprint planning, backlog prioritization, stakeholder engagement, risk mitigation, and release planning.
- Delivered complex Salesforce CRM, API, and third-party system integrations, enabling seamless data exchange, process automation, and enhanced customer experiences.
- Conducted business process analysis, gap analysis, solution design, and continuous improvement initiatives to optimize operational efficiency and support business growth.
- Led SIT, UAT, API testing (XML/JSON), defect management, production deployments, and release governance, ensuring high-quality and stable solutions.
- Successfully delivered multiple business-critical digital transformation projects, driving customer satisfaction, operational effectiveness, and measurable business value.
- Worked on end-to-end insurance lifecycle, covering policy administration, underwriting, billing, claims, customer servicing, renewals, and policy closure.

Lead Test Engineer | Business Analyst**Mercer Consulting India Private Limited | December 2013 – December 2019**

- Analyzed complex business, functional, and technical requirements (BRD/BRS/FRS) and transformed them into user stories, test scenarios, and delivery-ready backlog items, ensuring alignment with business objectives.
- Successfully delivered large-scale transformation programs for Aware Super and CareSuper within a complex global onshore/offshore delivery model.
- Led end-to-end testing, system integration, and third-party insurance provider integrations, ensuring seamless functionality, data integrity, and business continuity.
- Managed and mentored a high-performing QA team of 10+ members, driving quality excellence, productivity, and on-time project delivery.
- Owned the complete QA lifecycle, including feasibility analysis, test strategy, planning, execution, defect management, UAT coordination, and release readiness.
- Executed and governed functional, integration, regression, UAT, smoke, sanity, and exploratory testing activities, ensuring robust, business-ready solutions.
- Supported Sonata and Guidewire PolicyCenter, BillingCenter, and ClaimCenter by gathering requirements, validating insurance business processes, coordinating system integrations, and supporting SIT/UAT for policy, billing, and claims management.
- Developed testing dashboards, KPIs, and executive status reports, providing actionable insights into quality metrics, delivery health, risks, and release readiness.
- Collaborated closely with business stakeholders, developers, architects, and product teams to proactively identify risks, resolve defects, and drive continuous process improvement.
- Designed and executed comprehensive test plans, test cases, and test data to validate business requirements, ensuring high-quality software delivery with minimal production defects.
- Delivered solutions across domains including Wealth Management, Health & Welfare, Investments, Life Insurance, and Superannuation.

Project: IAG Transformation Program

Client: Insurance Australia Group (Australia)

Domain: Insurance **Role:** Lead Test Engineer

Key Responsibilities:

- Gathered requirements and created BRDs, User Stories, Epics, and functional documentation.
- Led a QA team of 10+, managing testing, UAT, defects, and release readiness.
- Facilitated Agile ceremonies, sprint planning, and stakeholder communication.
- Delivered Salesforce, API, and third-party integrations.
- Worked on Sonata and Guidewire PolicyCenter, BillingCenter, and ClaimCenter implementation, integration, and business validation.
- Executed functional, regression, integration, mobile, and UAT testing.
- Successfully delivered 20+ projects across Superannuation, Wealth, and Insurance.

Education

MASTER OF COMPUTER APPLICATION (MCA)

Swami Vivekanand Subharti University, Meerut, U.P | August 2021 - June 2023

BACHELOR OF COMPUTER APPLICATION (BCA)

Monad University, Hapur, U.P | August 2010 - August 2013

Accomplishments

- ‘Sleep Tight Award’ at Mercer.
- ‘Pragati’ awards for bringing ideas of process improvement.
- ‘AIM’ (Accuracy in Mercer) and ‘Star of the month’ for excellent performance.
- ‘Champions’ award by MERCER
