Professional Summary

Experienced financial professional with 5+ years experience in fund accounting and derivatives trade processing and reconciliation. Proficient in trade booking, trade settlements and NAV calculation. Committed to delivering high-quality results, resolving complex discrepancies and contributing to organizational growth through innovation and collaboration.

Professional Experience

State Street Corporate Services

Fund Accounting

Oct 2024 - Aug 2026

- Manage fund accounting activities for mutual fund investment funds and pension funds, ensuring accuracy, timeliness, and compliance with accounting standards.
- Perform daily, monthly, and quarterly Net Asset Value calculations, ensuring all components are correctly reflected prior to NAV finalization.
- Ensure accurate NAV calculation through detailed reconciliation of trades and cash balances.
- Actively involved in trade booking and trade settlement processes, ensuring IM trade data is accurately matched with custody data.
- Record capital stock transactions, subscriptions, redemptions, dividend reinvestments, income, and expenses in the accounting system accurately.
- Reconcile fund accounting books with custody records, investigating and resolving breaks as required.
- Perform security pricing to maintain accurate market valuations for reliable NAV reporting.
- Utilize market data sources such as Bloomberg and Refinitiv to source, validate, and review security prices in accordance with pricing policies.
- Validate and clear cash breaks, ensuring alignment between accounting records, custody systems.
- Collaborate with cross-functional teams to resolve trade and cash discrepancies efficiently and within SLA.
- Review tasks and activities performed by the team to prevent internal errors and strengthen quality.
- Provide training and development sessions to team members and new joiners, supporting knowledge transfer, process understanding, and performance improvement.

Derivatives Accounting & Trade Processing

Dec 2020 - Sep 2024

- Processed manual trades from multiple sources, including SWIFT, Secure Transport, Managed File Transfer, fax and Interaction Management tools.
- Handled margin, interest, fees, forex, and tax postings across various funds and accounts.
- Managed broker conversions, as well as fund mergers and liquidations.
- Performed Asset ID generation for newly introduced securities.
- Coordinated with Client Delivery Management, Client Operations, Asset Management Services, and onshore teams to resolve trade and cash breaks.
- Conducted security-level position reconciliations between Investment Managers (IM) and Brokers.
- Identified discrepancies and posted required accounting entries to reconcile the Risk Management System and reporting data.
- Utilized and maintained group-level macros for forex, fees, and interest postings to improve efficiency.
- Updated and maintained control reports to prevent late postings and ensure compliance with timelines.
- Worked on Trade Review Services to clear trade alerts raised due to price factor issues.
- Supported internal and external audits by providing data, explanations, and required documentation.
- Delivered refresher training to existing team members to reduce processing errors and provided production training to new joiners.
- Performed **bulk trade uploads for derivative transactions**, reviewing trade files for completeness and validating required trade attributes before processing to minimize downstream trade breaks and processing exceptions.

- Performed **pre-upload trade validation** by checking key attributes including fund/account, security/Asset ID, buy/sell indicator, quantity, price, trade date, settlement date, currency and broker/counterparty details before uploading transactions into the processing system.
- Investigated and resolved **STP trade breaks and processing exceptions** arising from incorrect or incomplete trade attributes, security setup, settlement details and accounting information, coordinating with Client Operations, Asset Management Services, brokers and onshore teams for timely resolution.
- Utilized **TLM** for trade lifecycle monitoring, reconciliation and exception management, investigating unmatched trades and processing breaks and following through with relevant teams until resolution.
- **Validated and maintained Standing Settlement Instructions (SSI)** for derivative trade processing, identifying missing or incorrect settlement details and coordinating corrections with the relevant teams to prevent settlement failures.
- Processed derivative transactions through the **trade lifecycle from receipt and validation through booking, settlement, reconciliation and downstream accounting**, covering margin, interest, fees, FX and tax-related postings across multiple funds and accounts.

Accomplishments

- Achieved Pinnacle award in 2022 for maintaining accuracy.
- Recognized as Best Performer at the company's R&R event in 2023.
- Received client appreciation for resolving the backdated trades issue for one of the critical clients.
- Received appreciation from onshore team for smooth broker conversion for complex IMs.

Process improvements

- Implemented automation for trade and cash workflows to reduce manual steps and improve control effectiveness.
- Running macros for Forex, interest processing and backdated margin checks to flag late instructions and support quality reviews.
- Enhance productivity tracking and control reporting to enable timely follow ups on aged breaks and operational issue.
